Packing Eggs. I know of nothing better than hen cart about one-half inch long to pack eggs in. It is light and elastic, two very important things. The way I do it is this: Place a paper in the bottom of the basket to keep the hay in; put about one and a half inches of cut hay in; after it is pressed down put another paper over the hay, then fill the basket to the rim; make a hole with the forefinger, commencing near the rim of the basket; put the naked egg in and proceed with the next, leaving about one-half inch space between the eggs. When all are in take a handful of cut hay, free of long hay, and let it drop between the eggs to fill securely. Fill up a little rounding over the rim. Have a thin board, planed and cut the size of the inside of the rim, press down below surface of rim; with a broadawl make holes in the rim and stick nails over the lid, six or eight of them. Then stick the board in the edge of board on each side, and press nails in for a seal; the eggs will never get loose in such a basket. Always try the eggs by striking them together; if sound they will ring. I never heard any complaint about my packing.
