MIDDLE AGED MEN.—Many cases between the ages of 30 and 60, and even a few at a greater period, derive their origin in the bladder, often accompanied by a slight smacking and burning sensation, and a weakening of the bladder in a manner similar to that of the prostate. On examining the urinary deposit aropy sediment will often be found, and sometimes small particles of albumen will appear, & the color will be a dark reddish brown. These changes are of a temporary appearance. There are many men who die of this difficulty, ignorant of the cause. It is the second stage of the disease. Dr. Tanner will give a perfect cure in all such cases, and assist in the restoration of the Genito-urinary organs. Call or address as above, Dr. Tanner.
