The Test of Fitness. Dearly learned, fresh from school, Comes my all-achieved daughter!

Knows she, as her mother knew, Recipes and quiet directions; How anxious she to please;

At an inquest on the body of an unknown man found dead near a railroad track the other day it was discovered that his pockets were full of presidential buttons.

Some fellows think that all the bliss is taken by one little kiss. And never stop to linger when they might as well have nine or ten.

Now, take advice, all you young men, When you get the chance again, Just don't be so sure as you can get, Then she will think you are a man.

And if she is not satisfied, Just draw her closer to your side, Kiss her till you raise a blister, Then go and try it on her sister.

Mme. Ristori leaves October 15 for her American engagements. Callender's ministers sailed from Liverpool for New York City Tuesday.

Edgar J. Davenport has just become a member of the C. B. Clark company. Sardon first wrote "Dora," then "Fedora," and now he has named his new drama "Theodora."

Amme who quipped it so long on the local stage and dances like any other American citizen. Mme. Albani comes to this country for an extended concert tour in January, next, and will be supported by a strong combination of talent.

Terdi, the composer, is seventy-three years of age. He has snow white hair and mustache. He has written and published 125 operas.

The report is that Verdi will go to Paris this winter and conduct the orchestra at the one hundredth representation of "Aida" at the Grand Opera.

A delegation of musicians is preparing to go to Vienna on October 15, for the fortieth anniversary of the celebration of Strauss' first appearance.

"The Swan-Raven" is enjoying a most prosperous run at Niblo's Garden. It is the finest show piece ever seen on the boards of that theatre.

T. L. Downing will leave Joseph Jefferson's troupe on January 1, and star in a play by Joaquin Miller called "Tally-Ho." It is of the western type.

Frank Girard, who has been so many years with Tony Pastor, will sometime in October or November, start to sing at the Lyric Theatre, Cal., "tolerated" by the American public as the spoiled child among its supporters.

Berlin has produced a novelty in the shape of a Lilliputian opera company. The artists range from twenty-two to thirty-seven years of age, and from twenty-four to thirty-two years of age.

Miss Fanny Dayenport has engaged Mr. Henry Lee as her leading man for the season, to take the place left vacant by Mr. Mantoli. She will break up the "Elmer" Western-Love combination. Mr. Lee's salary with Miss Dayenport is to be \$265.

Miss Emma Thursby's concert tour of Norway was a complete triumph, yielding a splendid harvest of plaudits and coin. Her great success is attributed partly to the swarms of cholera-scarred Americans and English tourists, who have been unusually numerous in Norway and throughout Northern Europe this season.

Franz Materna, who weighs 250, is styled the "strongest man in the world." As he weighs 250 it is difficult to imagine what sort of a bird the writer had in his thoughts when he wrote the sentence. An ostrich, perhaps, or a turkey, or a peacock, but then an ostrich never sings, a peacock hardly weighs over eight ounces.

The annual Universal general convention will be held in Peoria, Ill., opening October 22. Most of the clergymen who have been away during the summer have returned to their posts of duty.

The Lord Mayor of London is a Methodist, and he recently preached the sermon at the opening of one of his churches. The list of the vacant Congregational churches in Illinois has been reduced from seventy to forty within the past few months, owing to the large numbers of men who have recently come from other states and from England.

The Boston Young Men's Christian Association will hold its first business meeting since June September 4. Eighty new members were reported. The employment bureau has filled forty-three permanent and twenty six temporary situations.

port to the trustees of the failure of the scheme for general regulation of athletics by the colleges, jointly, and urges that the trustees be prohibited from playing with other than college men. If reverting to the "college" idea, and that only two games with any other college in a season be permitted, and that no one be played where they require more than one day's absence of the students.

St. Louis has led the movement in the direction of kindergarten, so in connection with technical education, this city has determined to prove that an intellectual training of the mind, for any career, is greatly assisted by manual recreation as a part of a collegiate course. The workshop practice in the school is excellent, and is sought by able instructors in each department. Mining and metallurgy are taught by the aid of complete laboratories and a large collection of specimens. A graduate of the school of mines, Columbia college is the head of this department.

Woodward, the earnest and able principal of the school, has made industrial training a special subject of investigation and experiment. To him is due this excellent institution, the benefit of which has already been felt in encouraging the starting of such schools elsewhere.

Shall I learn short-hand? is a question now asked by many thousands of young men and women. And it is a question which, unless advised is extremely rare, either as touching the expediency of learning short-hand, or as to the best system or method to follow if it is to be determined upon. All calculations of the time requisite to learn the art of short-hand are fallacious, as so much depends upon natural skill with the pen and so much upon what is meant by "learning" it.

As in learning to speak a language, time is as most important element in learning short-hand, and one hour practice a day for five years is infinitely better than five hours a day for one year. It is quite safe to say that the expert who has learned in one year with any amount of practice, and one must have great natural skill with a pen as well as great application, to become a fair reporter even in one year, and that every man who reads who probably fall far short of what it should be for a lawyer or author.

Waiting. Serene I fold my hands and wait, Nor care for wind, nor tide nor sea, I have no more gainst time or fate, For lo! my own shall come to me.

I stay my haste, I make delays, For what avails this eager pace? I stand and wait, I wait and wait, And what is mine shall know my face.

Asleep, awake, by night or day, The friends I seek are seeking me; No wind can drive my bark astray, Nor chance the tide of destiny.

What matter if I stand alone? I wait with joy the coming years; My heart shall rest where it has won, And garner up its fruit of tears.

The waters know their own and draw The brook that springs in yonder heights; So flows the good with evil stars, Unto the soul of pure delights.

The stars come nightly to the sky, The tidal wave unto the sea; Nor time, nor space, nor deep, nor high, Can keep my own away from me.

SINGULARITIES. A 12-year-old girl in Lewiston, Me., has recently become the mother of a child which weighed three pounds at birth.

Mr. Shaw, a Colorado surveyor, claims to have discovered a mountain of solid alum, a mile square at the base, above the bed of the Gila river.

A peach in an Andalus county, California, has on it a quantity of ripe fruit as large as a man's thumb, and is likewise in full bloom.

While the teller of the Bank of Montreal was fishing in the St. Lawrence river a strange four-foot eight-inch long and weighing forty-two pounds jumped into his boat. He killed it with an oar.

The largest bell in the world is now said to be that of Kinto, Japan. It is 24 feet high and 16 inches thick at the rim. It is sounded by a suspended piece of wood, like a battering ram, which is struck on the outside, and its booming can be heard for miles.

Cheshire, Mass., has two large bald eagles which fly every morning over the reservoir to their nest high up on the side of a rocky cliff. The hunters look on and stare in a play by Joaquin Miller called "Tally-Ho." It is of the western type.

The microscope reveals that there are more than four thousand muscles in the caterpillar, and that the eye of a caterpillar contains one thousand nerves. There are spiders as small as a grain of sand, and they spin a thread so fine that it would require four hundred of them to equal the size of a single hair.

A strange insect, which is called the sphex, and is described by a naturalist, lays its eggs in a hole in the ground. It then flies off and builds a nest, which is a sort of a chamber, and the spider never kills it. The sphex carries the now motionless spider to its nursery and buries it with the eggs. When the eggs hatch out the grubs feed on the paralyzed prey, which is then still alive and there is quite fresh, although it has never been moved since the time it was buried.

Boston Journal: Another Florida lake has disappeared through a subterranean outlet. Peacock lake in Suwannee county, a favorite spot for picnics and amusements, on account of its beautiful surroundings and the abundance of fine trout, has disappeared through a hole in the ground, leaving thousands of dead fish for the buzzards to prey upon and contaminate the air. Although heavy rains have fallen in the vicinity the lake has been steadily receding all summer, and has probably disappeared to swell the Suwannee or some other adjacent river.

There is a sunken forest of white cedar in New Jersey which has been mined for timber over a century ago. The cedar is still standing, the sunken logs are carried on by the people of Denniseville, a village which was brought into existence through the buried wealth of lumber in its vicinity. Over a century ago the forest trees of large size are growing, and in many instances these are cut away to reach the more profitable timber three or four feet below the surface. The sunken trees are of enormous size. Their age is a matter of curious conjecture. It is probable they were buried many centuries ago by the action of an earthquake.

RELIGIOUS. The annual Universal general convention will be held in Peoria, Ill., opening October 22. Most of the clergymen who have been away during the summer have returned to their posts of duty.
