The Story of a Life

Say, what is life? 'Tis to be born A hopeless babe to greet the light With a sharp wail, as if the morn Foretell a cloudy noon and night; To weep, to sleep, and weep again, With sunny smiles between -and then?

And then apace the infant grows To be a laughing, sprightful bay, Happy, despite his little woes Were he but ornsions of his jay! To be, in short, from two to ten, A merry, moody child—and then? And then in coat and trousers clad,

To learn to say the decalogue, And break it, an un hinking lad, With mirth and mischief all agog; A truent oft by field and fen, A captune butterfiles—and then? And then increased in strength and size, To be, anon a youth full grown;
A hero in his mother's eyes,
A young Apollo in his own;
To institute the ways of men,
In fashionable sin and then?

And then at last, to be a man,
Te fall in love, to woo and wed!
With seething brain to scheme and plan
To gather gold or toil for bread; To sue for fame, with tongue and pen And gam or lose the prize?

And then in gay and wrinkled old To mourn the speed of life's declin To mourn the speed of files decline; To praise the scenes our youth beheld, And dwell in the memory of lang syne; To dream awhile the darkened ken, To drop into the grave—and then?

The remarkable growth of Omaha during the last few years is a matter of great astonishment to those who pay an occasional visit to this growing city. The development of the Stock Yards-the necessity of the Belt Line Road-the finely paved streets—the hundreds of new residences and costly business blocks, with the population of our city more than doubled in the last five years. All this is a great surprise to visitors and is the admiration of our citizens. This rapid growth, the business activity, and the many substantial improvements made a lively demand for Omaha real estate, and every investor has made a handsome

Since the Wall Street panic last May, with the subsequent cry of hard times, there has been less demand from speculators, but a fair demand from investors seeking homes. This latter class are taking advantage of low prices in building material and are securing their homes at much less cost than will be possible a year hence. Speculators, too, can buy real estate cheaper now and ought to take advantage of present prices for future

profits. The next few years promises greater developments in Omaha than the past five years, which have been as good as we could reasonably desire. New man-ufacturing establishments and large job bing houses are added almost weekly, and

all add to the prosperity of Omaha. There are many in Omaha and throughout the State, who have their money in the banks drawing a nominal rate of n-terest, which, if judiciously invested in Omaha real estate, would bring them much greater returns. We have many bargains which we are confident will bring the purchaser large profits in the near future.
