The Game She Won. She was a pretty and frank coquette. He was a young man, full of vim and vigor. They met on the lawn by the tennis net. With nobody near to see or hear. 'Then my girl's eyes were clear, 'As he foolishly bent his tall young head, 'And whispered the rules in her listening ear. 'For she did not know the game, she said.

There's no Pocket in a Shiroud. You must leave your many millions. And the ray and festive crowd, Though you roll in royal billions. There's no pocket in a shroud. Whether pauper, prince or peasant. Whether rich or poor or proud. 'Any pocket in a shroud. 'You'll have all this world of glory. 'With a record long and loud, 'And a place in song and story. 'But no pocket in your shroud. 'So be lavish of your riches. 'Neither vain, nor cold, nor proud, 'And you'll gain the golden riches 'In a clime without a shroud. -JOHN A. JOYCE.

SINGULARITIES. An elephant herd is always led by a female, never by a male. In a cave recently discovered in Kentucky are crickets as large as sparrows and rats as big as jackrabbits. A country road near Dublin is slowly burning up. It was constructed of peat, and the fire is gradually eating it up, burning trees out by the roots. At Charlotte, N. C., is a fountain, which bubbles with a cold, clear as crystal. It has its source in the adjacent mountains, and is said to be the highest in the world.

RELIGIOUS. There are 546 lady missionaries in India. The new Christ Episcopal church at Burlington, Iowa, will be dedicated next Christmas. The Presbyterians of Pennsylvania numbered 8,400 communicants in 1910. There are now 25,000. The \$50 prize for a sermon on slander, offered by Hon. T. H. Worrel, of Washington, has been awarded to Rev. G. S. Bailey, D. D., pastor of the First Baptist church, Ottumwa, Iowa. In the exploration of the old Temple area in Jerusalem one of the stones placed round about six hundred years ago, the court of Herodias has been dug up with the inscription in Greek still legible, foridding a Gentile under pain of death to pass the parapet.

How Women Differ from Men. At least three men on the average are bound to disagree with the rest just to show that they've got minds of their own; but there is no disagreement among the women as to the merits of the new 'Zodiac' Prescription. They are all unanimous in pronouncing it the best remedy in the world for all those chronic diseases, weakness and complaints peculiar to their sex. 'It transforms the pale, haggard, dispirited women, into one of sparkling health, and brings laughing again, "regibus supremis" the happy household.

EDUCATIONAL. Pennsylvania spends about nine million dollars yearly in providing for free common schools. The Rev. Dr. Hala's paper on "Half Time in Schools," in the recent North American is marked by his usual brilliant characteristics, and is a valuable contribution to the current discussion of educational theories and methods. Girls should be trained in some kind of handicraft, that, necessary, they may help themselves. There is nothing more distressing than the helplessness of well-to-do women when misfortune overtakes them; and handicrafts, such as needlework, embroidery, and the like, are the best means of securing a livelihood in such a case. The discussion of technical education in the interest of a better class of mechanics has opened up a wide field, and now it is proposed to start practical schools in which the young men and women can learn to become mechanical, civil and mining engineers, and go through the work of foundries and machine shops. A Grinnell Commission, appointed to look over the whole question, reports strongly in favor of technical schools, but urges that the hours of study be reduced to eight per week in ordinary schools to eighteen per week in the primary schools, and to from twenty-six to thirty-two in the higher schools. Elementary education will in another generation be almost universal, but the higher education will be confined to a few. The schools which give a start in life, grow ever costlier. Few self-educated or cheaply educated men can hope to face the examinations which afford entrance to the careers of men of letters, of science, of law, of medicine, of engineering, or of the professions.
