## RANGE CATTLE.

The Magnitode of the Business Keepi g C ttle on Land Not Embracid in Farm.

History of Its Introduction on the well. Great Plains-Prospects of Future Expansion,

the bureau of statistics of the tressury of fine beef, they are certainly active, department has prepared and exhaustive healthy, and vigorous. report in regard to the range and ranch cattle business of the United States. The report occupies a volume of two relation to the raising of cattle on land not embraced in farms. Attention is is thus stated by Mr Theodore J. Mc-first directed in the report to the extent Minn, of St Louis. "Early in Decemf country that is devoted or which can be devoted to this industry, and which is apparently adapted to no other useful purpose. It states this territory embraces about 1.365 000 square miles and constitutes approximately 44 per cent. of b sees about 1,365 000 square miles and constitutes approximately 44 per cent, of the entire area of the United States exbat portion of the country situated east of the Mississippi river, Arkansas and Louisians. Its area is equal to that of Great Britain, Ireland, France, Germany, Denmark, Holland, Belgium, Austria, Hungary, Italy, Spain, and Portugal, and one-nith of European Russia. A large portion of this vast territory has a very deficient rainfall, while comparatively little water in afficient rainfall. while comparatively little water is afficient rainfall. While comparatively little water is afficient rainfall. The funds which are necessary in the interior furnishings of the hadquarters building. The funds will be expended in buying carpets for several of the offices, matting for the hall floors, and chairs, as well as other articles, the purchase of which may be necessary. little water is off rded to springs and to be called a desert, as it was by the early travelers.

The expression "range and ranch cat-tle" in the report applies to cattle which, from the the time they are dropped until and which are subject only to the re straints of hording. The distriction be tween the "range" and the "ranch" cattle business herein observed, is that the former designation applies to the raising and fattening of cattle upon public lands, or upon unfenced lands generally, where the herds of different proprletors freely range and intermingle; whereas the "ranch" cattle business is carried on within inclosures belonging to cattlemen, on which only their own cat-tle graze. The very fact that the range cattle busin as is most profitably carried on in a large way, and that its successful prosecution involves organization and cooperative work, appears to have sugges-ted at an early day the conduct of the business under corporate ownership and management. Accordingly this has been one of the marked features of the enterorise almost from the beginning. Incorporated companies, chartered under the laws of this country as well as under the laws of foreign countries, are now extensively engaged in the cattle business from Texas to the northern border line

of the United States. The rasing of cattle in Texas had its origin long before the admission of that state into the union. The original or native cattle of Texas are of Spanish and Mexican origin. Their most distinctive physical characteristics are long horns, plains and in valleys and mountains fastneesses where they roam, and even be-

cover their feeding grounds. i. e , gathered together in close herds; allowed to wancer off again upon the

During the last twenty years a great change has taken place in the cattle business of Texas. About half the area of the state, including the eastern porbeen a disposition to policy in regard to the disposition of her among the ranchmen of the distant public lands than has the United States, northwest. It is admitted that it costs and the result is that the ownership of more to raise native calves in the northvast areas has been freely acquired for ranch purposes by individuals and corporations. In a few instances single individuals have acquired the ownership of additional cost. Mr Nimmo, the comupward of 250,000 acres. The result of piler of the report, thinks the industry the is that with the exception of the els of cattle raising on ranges and ranches treme northern portions of the state, is in its infancy in development as well where herds range on the public domain, as in age. He admits that the best lothe cattle business of Texas has becom ent owners or associated owners.

As recently as twenty-five years ag-Capital Stock. - - \$150,000 As recently as twenty-five years ago ter advantage, and that artes an wells for imbit Liability of Stockholders, \$60,000 aumbers for their hides and tales, as go animals are now kept. numbers for their bides and talow, as no animals are now kept. they now are in various parts of Son h America. The average price of 3-year old ateers was from \$3.50 to \$4.50 per head. Since means of transportation have been established cattle of the same ege have sold at from \$15 to \$20 per THOS. L. KIMBALI.

THOS. L. KIMBALI.

I transported in cars to eastern cities. It is estimated that Texas by

the country with about 3,000,000 during the past twenty years. During last year about 300,000 were driven north from Texas and 625,000 were sent north and east over radroads. It is claimed that cows in Texas are more prolific breeders than in any other part of the world. Owing to the mildness of the climate and the abundance of grass, calves dropped at any month in the year generally do well. They breed early and continue to rear calves till late in life. A hundred calves a year. Probably the free life led by the cattle for many generations has exerted a powerful influence in causing the national house of representatives, the bureau of statistics of the treasury of fine beef, they are certainly active,

The raising of cattle on what are familiarly known as the "great plains," which extend from Texas to M ntana, the history of this important discovery ber, 1864, a government trader, with a about the first of July, wasgon-train of supplies drawn by exen, Maj. Towar has been unusually severe snow storm, he was be Msj. Cras. I. Wilson, of New York compelled at once to go into winter quarclusive of Alaska. It is as large as all ters.
