S.S.S. MARK.**

I am an old man. For 25 years I suffered with ulcers on my right leg as the result of typhoid fever. Amputation was suggested as the only means of preserving life. The doctors could do nothing for me, and so I went to Dr. Swift. Please excuse your letter, I have a short time to live. Dr. Swift's specific has given me a complete and instant cure and added ten years to my life.

Wm. R. Rane, H. H. Co., Ga.

I have taken Swift's specific and gotten contrac-
tured at a medical college at a dislocation, while I
was a medical student. I am grateful to say that it
gave me a quick and thorough cure after my pa-
rents had given up hope of my recovery.

AUGUSTUS WENDEL, M. D., Newark, N. J.

My wife from early girlhood has been suffering from rheumatism and neuralgia, and I must frankly say her derived more benefit
from Swift's specific than from all the others after long and faithful trial.

H. J. L. PRINCE, Oxford, Ga.

Swift's Specific is entirely vegetable. Treatise on
Blood and Skin Diseases made free.

Town Lots in Denver Junction,
Weld County, Colorado.

Denver Junction is a new town of about 200 inhabitants, laid out in 1884, on the great transcontinental railway across the continent, at the junction of the Colorado River, 19 miles from Denver. The town is on a flat bottom land of the Platte River, the finest location between Omaha and Denver, and is surrounded by the best-laying lands west of Kearney Junction. Neb.; climate healthy and bracing; altitude 3,600 feet. Denver Junction is to become the principal point of the U. P. R. R. Co., are putting up many of their buildings here, while the B. & M. R. R. Co., are expected soon to connect at this place. The present chance for good investments in town lots will scarcely ever be equaled elsewhere. For sale by the lot or block in good terms by

THE CITY'S HOPE.

How Omaha's Rising Generation is preparing for Life's Battle.

Our Educational Institutions and the Youth They are Training For Honored and Useful Lives.

The hope of the nation is her youth, and on the proper training of the rising generation depends the weal or woe which will befall our country's institutions. States, cities and communities are to be affected in the same manner. That the youth may be trained in the way they should go, that they may become intelligent men and women, fitted to occupy the highest and most honored positions obtainable, has been the supreme object of the lives of some of our noblest men, encouraged by the expenditure of vast amounts of wealth. Omaha has not been slow to appreciate the value to the city of an educated youth, and has laid a foundation for future greatness in the numerous public schools which she has erected, and the liberal manner in which they are supported. But despite the weighty importance of these institutions the public interest in them seems to flag unless something of special importance occurs which for a time may attract attention. Parents often fail to realize that the children of to-day are to be the men and women of to-morrow, and become lax in fifty impressing upon their minds the necessity of school attendance. General attention will, however, be brought to the schools in the next few days, when the year's work will be completed and the schools closed for the summer vacation.

In starting upon a round of the city's schools to see what had been done and was being accomplished, a Bee reporter visited

THE CASS SCHOOL.

It was just at the close of the noon recess, and the children came trooping into the building ready for their afternoon work. Everything was done in an orderly manner, their hats hung up and their seats taken without confusion. The school is under the management of Miss Grace H. Wilbur, as principal, and has 310 pupils, a decrease in attendance of about 150 since the beginning of the school year. The building contains eight rooms, each under the supervision of a lady teacher. The pupils are about evenly divided among the different grades. The highest or sixth grade is under the charge of Miss Bennett as teacher, and the two pupils who have shown the most proficiency in their studies are Grace Bement and Nicholas Backus. The next lower room is in charge of Miss Crane, who has two classes in her grade—"5th C" and "5th A." William Thornton leads in the 5th C. class, and Mattie Kirby in the 5th A. Miss Kendall instructs the scholars in the 4th B. and 4th C. classes, and Matilda Olsen and Chris. Backus are at the head of their respective classes. Miss Littlefield, who has charge of the 3d C. and 4th A. classes, reports Ida Hammond and Jennie Hultman as her brightest pupils. The teacher of the 3d B. and 3d A. classes is Miss Robinson. Charley Branson and Mabel Cheeney stand at the head of the 3d C. class, and Stella Kirchner and Henry Huberman hold a similar position in the 3d A. Ralph Dodge, in 2d A., and Hattie Graham, in 1st C., are the best students under the care and instruction of Mrs. Perkins. Miss Wilbur, the principal, has charge of the second grade, and she reports her four best scholars to be Matilda Carlson, Miller Wood, Anna Kalish and Olga Mohr. The "babby room" is in charge of Mrs. Lemon, and the children are divided into two classes—1st A. and B. Edith Cheney leads the former, and Nellie M. Day the latter.

"Love is the governing power in this school," said Miss Wilbur, "there having been only one case of corporal punishment during the year, and yet the children are under splendid control." Twenty-five special promotions have been made from the various grades during the year for special proficiency. The rooms in the building are bright and pleasant, and the blackboards upon the walls show excellent work by the pupils in drawing. During last winter it was very difficult to keep the building warm, as it is only heated by stoves. But preparations are now being made to put in furnaces before the beginning of the next term.

THE DODGE SCHOOL,

at the corner of Dodge and Eleventh streets, is under the charge of Miss Jenny McKeon as principal. When the Bee man arrived he found 240 scholars busy with their lessons and examinations. The number of pupils is about 100 less than at the beginning of the school year, the attendance having decreased materially during the present term. There are eight rooms in this building, each presided over by a teacher, and the scholars are divided into six grades. Miss McKeon has charge of the highest class, her two classes, being "5th B" and "6th A." Willie Buehler and Willie Henn are the most proficient in their studies in the former class, and Joseph Hirshstein and Julius Taylor in the latter. A large number of original designs in drawing by the pupils were shown, which are of a high order and show marked improvement. In fact, the information was recently imparted that the drawing teacher admitted that the scholars of this school were becoming more proficient than their instructor. In the 5th A. class, under the charge of Miss Butterfield, Maggie Speer and Charlie Wiles excel in their studies. The scholars in this room also show a special proficiency in drawing. Charlie Wiles has not been out of school since he was born, and August Utz, Willie Travay, Maggie Clifton, Henry Legsd and Maggie Speer have only missed one half a day in the same time. Miss Hartley has charge of the scholars in the 4th B. class, and Hannah Hockstrem and Clydie Spann are two best scholars. Dudley Wigington and Louis Motz took the highest in attendance, having been present every day during the year. The scholars in this room have made remarkable advancement in reading music and their music teacher is proud of them. Miss Cave's best scholars in the 3d B. and 3d C. classes are Olaf Olson and Charles Bartlett, while Katie and Anna Winslow have been present every day during the year. In the 2d C. class and Miss Briggs, Jessie Merritt and Fred Horton are the leading pupils, and in the 3d B. class, under the same teacher, Minnie Jorgenson and Frank Wingington excel. Mary Livesey has been present every day during the year. Anna Bozewitz and

Nathan Netzner are the two most proficient pupils in the 2d C. class under Miss Buchanan, and Willis Sharpen and Minnie Goldstein lead the 2d B. class. Charlie Anderson has been present every day during the year. Miss Needham has charge of 1st C. and 2d A. classes, and when the Bee reporter visited her room it was almost time for recess, and the little folks were beginning to be uneasy and restless. But when they were asked to sing, the expression of their faces changed, and all were immediately on the alert, and with evident pleasure sang several verses of "Sweetly Glide," after which they were dismissed. There are fourteen scholars in the 2d A. class, and they are all to be promoted. Hans Nicholson and Laura Schrank have shown the most proficiency in their studies in this class, and in the 1st C. Blanchie Hermiston and Treas. Harris are the best scholars. Joseph Adler has not missed a day from school during the year. The "babby room" is in charge of Miss Eddy, and some of the pupils are almost babies, hardly old enough to attend school. In the 1st B. class, in this room Cora Mitchell and Joseph Flynn are the infant prodigies, and in the 1st A. Anna Anderson and Birdie Sheffel lead all the others in their studies.

AN OREGON TOWN.

The Growth of Huntington, on the Oregon Short Line—Celebrating the Fourth.

Correspondence of the Bee.

HUNTINGTON, Ore., June 14.—This town is located in the Burnt River canyon, three miles from the Idaho line, and is the terminus of the Oregon Short line and the O. R. & N. road. Everything is transferred except full carloads of freight, which go through. Pullman sleeping cars run through from Omaha to Portland. The companies are putting up a new frame depot, 40 by 220 feet, two stories high. The depot hotel will occupy a portion of it. It will cost \$18,000.

There is a mine here called the James G. Blaine, starting in the hill from one of the streets. Some seem to think that it will strike a fair silver ledge.

There is considerable prospecting for gold along the Burnt and Snake rivers.

Several good placer and quartz locations are being worked.

Omaha gets a fair trade from this part of the country.

"Our Country Forever," is the flaming headline of the Fourth of July programme at this point. We never do things by halves, and as this is the first celebration of Independence day in this city we propose to do it on a grand scale. A salute will wake the natives at early morning, to be followed at 11 a. m. with orations, declamations and apostrophes to the eagle; music by the glee club and brass band, an excursion on the Oregon Short Line to the new steel bridge over the river; several fast purses will be hung up for fast horses, the whole to conclude with a pyrotechnic and terpsichorean display in the evening. The small boy will not be last nor least in the procession.

Miss Bennett is the most proficient in their studies are Grace Bement and Nicholas Backus. The next lower room is in charge of Miss Crane, who has two classes in her grade—"5th C" and "5th A." William Thornton leads in the 5th C. class, and Mattie Kirby in the 5th A. Miss Kendall instructs the scholars in the 4th B. and 4th C. classes, and Matilda Olsen and Chris. Backus are at the head of their respective classes. Miss Littlefield, who has charge of the 3d C. and 4th A. classes, reports Ida Hammond and Jennie Hultman as her brightest pupils. When Baby was sick, we gave her Castoria.

When she was a child, she cried for Castoria.

When she became a miss, she clung to Castoria.

When she had children, she gave them Castoria.

ED MAURER, 1213 Farnam St.

THE HORSE HEAVEN FLAT.

Description of a Rich and Prolific Region in Washington Territory.

Correspondence of the Bee.

BROWN, Yakima County, Washington Territory, June 6.—As I am a farmer in the country known as the Horse Heaven flat, I will give you an idea of our country. This scope of country is situated between the Columbia and Yakima rivers and is a fine rolling prairie mostly adapted to wheat raising. I settled in this country September 20, 1883. I am one among the first settlers. As to climate, this cannot be excelled, and for what raising this country is ahead of all others. For this reason a man can put out a large crop and get it harvested without difficulty, as wheat will stand here three months after it gets ripe without danger of straw falling or the wheat shelling out, and can thresh and take care of the grain without going to the expense of making bins for the grain, as it does not rain here from the middle of June until the middle of September. The ranchers thresh their grain and sack it up and ship it in the field and throw a little straw over it and it is all right. It will lay out that way all winter without much damaging. When the Cascade division of the Northern Pacific is completed to the Puget Sound it will afford us the best market in the world. This country is also handy to the O. R. & R. R. Horse Heaven is between the O. R. & R. R. and the U
