# Large Lots at Reasonable Prices:

# Good Investment **R**H South Omaha.

Since the completion of the new packing and slaughter houses, South Omaha is making a wonderful ane rapid growth. Besides the large pork and beef house erected for Hammond & Co., other dealers have commenced the erection of similar institutions and still others are contemplated for the near future. <sup>5</sup>Several dwellings have been built and twenty or thirty are now building. Employment is now furnished to about one hundred and fifty families, and conservative estimates place the figure at eight hundred to one thousand families that will find employment there a year hence. This offers great inducements to laboring men to secure homes now while they are cheap. Speculators will also find it to their advantage to buy at present prices. The company have made no change from the original prices, but some parties who first purchased lots have resold them at splendid profits, in some cases at double the purchase price. If in so short a ime handsome profits are made, what will be the result when everything is fully developed ? In the few other cities that are favored with a first class cattle market, fortunes have been made by investors in real estate, and the same is certain to follow in South Omaha. While the whole city of Omaha will be greatly benefitted by the growth and development of the cattle interest, South Omaha lots will enhance in value more rapidly than any other by reason of the prox imity to the works.
