Town Lots in Denver Junction Weld County, Colorado.

Denver Junction is a new town of about 200 nhabitants, laid out in 1884, on the great trunk railway across the continent, at the junction of the Julesburg Branch, 197 miles from Denver. The town is on second bottom land of the Platte River, the finest location between Omaha and Denver, and is surrounded by the bost-laying lands west of Kearney Junction, Neb.; climate healthy and bracing; altitude 3,600 feet. Denver Junction bids to become an important point, as the U. P. R.

TRENTON, N. J., July 20.—A heavy become an important point, as the U. P. R. R. Co., are putting up many of their buildings here, while the B. & M. R. R. Co., are expected soon to connect at this place. The present chance for good investments in town lots will scarcely ever be equaled elsewhere. For sale by the lot or block in good terms by

AFINE LINE OF

CUSTER AND HER PLANS.

Highland and Valley Dotted With Thriv ing Towns and Waving Fields.

Northwestern Nebraska Rapidly Set tling Up-Custer County Towns and the Men who Make Them,

Correspondence of the BEE. SARGENT, Custer Co., Neb., July 25. -Since writing the BEE last, many changes have taken place in this grand northwestern country. New faces, new honored people. I have but recently reabout 225 miles. At the southeastern end of the line I found a bustling little city even in the hot days of July, while at the other end was heard the noisy voice of the cowboy industriously employed in herding the thousands of head of cattle that were silently grazing on the

luxurious grasses that grow everywhere in dale and on hill top alike. Along the route were seen the finest looking crops that have been seen for many a day. Wheat on the average throughout the valley will yield eighteen bushels to the acre. We saw some that will probably go twenty-five bushels to the acre. Oats will average thirty bushels to the acre. Corn—well, the yield, barring hallstorms—will be tweenese and will go probably forty bushels to the acre. It was noticed all along the line that much more corn has been planted this year than in former years. Thousands f acres of raw prairie have been broken, more than has been done at any other season to our knowledge. Cattle never looked better than they do now and with the abundance of luxurious grasses we have this year will send thousands of No. 1 beef cattle into market this fall. Upon the whole a kind and beneficent Providence has blessed the labor of man-at least so far-and all accord in one voice that this year will yield the finest harvest that has ever been gathered. Of course, I speak of the val-ley as a whole. In some places—but they are few—hall storms have destroyed portions of crops; the most deatruction of which lies about Grand Island. Some two weeks since, hall did considerable damage to crops in Dry Valley, located some twelve miles south

of the middle Loup valley.

The building of the U. P.R. R. to
Loup City has given a new impetus to
land seekers and to those hunting business locations in northwestern Nebraska. Loup City is a thriving town of about eight hundred inhabitants, and is beautifully situated on the north bank of the Middle Loup tiver, and surrounded by a fertile farming country. The business houses and residences are tasty and well built. The court house is built of brick and and stands in the center of the public square, surround by shrubs and shade trees. The Loup City flouring mill is one of the leading enterprises of the town. This place will receive a great boom from the rathroad. Fifteen, miles further up the valley is located the new further up the valley is located the new town of Arcadia, Valley county. While the town of Arcadia, Valley county. While the town site is not the best, the town itself promises to become an important trading point. They have an excellent bridge here and a first-class farming community to the ground. Two or three rods away, receiving it as pitched on by Michael Heary, was in which had till now been fully extended, droeping to feel the water. As soon as BAYES LABOR, Time and Soap Americally, and gives universalisatisfaction. No family rich or poor should be without it.

Sold by all grocers. Beware of imitations well designed to mislead. Prarting to back the town up. They already have a lumber yard, hardware, farming implements, livery stable, general store, hotel, billiard hall, furniture store, blackamith billiard hall, furniture store, blackamith shop, etc. A good druggist will find this shop the flash. On recovering, they found Mr. Green lying dead, and they found Mr. verance, and have great expectations of

A Case Resombling that of Gen. Grant.

Some ten years ago I bad a scrofulous sole on my right hanc which gave me great trouble, and under the cld time treatment healed up. but it had only been driven into the system by the use of potash and mercury, and in March. 1886, it bloke out in my throat, and concentrated into what some of the doctors called cancer, catig through my cheek, destroying the coof of my mouth and up, or lip, then attacked my tingue, palste and lower lip destroying the palste and under lip entirely and had my torgue eating out to the top of my fof cheek bone and up to the left eye. I could not tak any solid food, but subsisted on liquids, and my tengue was so far gone I could not tak. Such was my wret had, helpless condition the first of last October (1884), when my friends commenced, and the feartul sparture in my cheek has been closed and firmly knitted together. A process of a rewunder lip is progressing finely, and the tongue which was almost destroted is being recovered, and it seems that nature is supplying a new tongue. I can tak so that my friends can readily understand me, and can also eat solid food again. If any could those facts I would refer them to Hon. John H. Travler, State Senator of this district, and to Dr. T. Bradfold, LaGrange, Ga. May 14, 1886.

Treaties on blood and skin discases mailed free.

The standard possess a great deal of perse verance, and have great expectations of seeing their town outstrip Loup City yet. They are looking for the railroad this fall.

Twenty-three miles of a pleasant drive brings us to Sargent; the metropolis of the upper Middle Loup country. Sargent is the general headquarters for land hunters and others. It has a large and to the upper Middle Loup country. Sargent; the metropolis of the upper Middle Loup country. Sargent is the general headquarters for land hunters and others. It has a large and town land located and promises some day to become the country sea of a new country. The business consists of a bank, of a new county. The business consists monsoon, storms occur in which the cf a bank, two blacksmith shops, haraess lightning runs like snakes all over the store, and one newspaper, the "Loup Valley Eagle." The farming land around the place is the best, thus giving the town substantial support. A good bridge is being built across tho river at this point, and with the present railroad outlook will boom above all other points in this valley. Six miles above Sargent is the town of West Union. This is the oldest town in the upper country. It has a newspaper, general store, furniture store, hardware store, boot and shoe store, lumber yard, drug store, hotel, etc., and is surrounded by good farming land. Three miles above this point is the new town of Walworth. It has about the same business as West Union, and a little the lead on making a town, as West Union is too near Sargent ever to amount to anything. There are yet thousands of acres of good government land up this valley, and par-

TRENTON, N. J., July 20,-A heavy rain and thunder storm broke out here this afternoon, accompanied by terrible flashes of lightning. A young china decorator named Frank Knowles, while atanding with three other young men under a shed, was struck by the lightning and knocked senseless, while his companions were almost blinded by it. Knowles' clothing was torn from his shoulder down, and his shoes were also torn away. He was severely burned in the limbs and feet, and suffered much. His injuries, however, are not fatal, and ter. A careless bolt was dropped upon a he is on fair way to recovery. The lightning came down the telephone north of us; for the unfortunate man had

Crabs Killed by Thunder Sterms, "Why soft-shell crabs are killed by thunder-storms," said Eugene G. Black-sound, and the fire was extinguished by ford, "has never, to my knowledge, been the neighbors. I imagine that the crab is then in an extremely sensitive state. While in that attack and out of its element, if it can see Main street was struck, but no damage lightning or hear thunder, it almost instantly dies. Whether on train, steamboat or in crates in the market, seventyhouses, newly broken land, etc., are to thunder-sterm. But if they are put in the craos are killed by a tree was seen to be smoking, but the wire bountifulness of a promised harvest, all slight rumble of the thunder, we do not occurred. is peace and contentment among her lose so many. Every dealer in soft-shell crabs, the minute he sees the sky overcast, bundles his crates of soft crabs into turned from a trip from the head of this his thickest ice-box, and until the storm valley to Grand Island, a distance of passes over speculates upon his probable loss by the rumbling thunder.'

Mules Knocked out by Laghtning.

From the Dover (Cal.) Era. During the thunder storm on Friday of last week a large buttonwood tree shattered. At the time the bolt descended a team of mules attached to the boat of Col. Sambert were within a dozen feet of the tree, and the boy was holding one of the animals by the bridle.

Strange to say, the boy was little affected, but the mules were knocked from the asserted itself and they got up and went in the old court house yard looked up-on their way. The shattered tree stood ward, and it seemed that the concussion canal horse, some distance from it, was of the court house door, though no signs killed by the shock.

When the electric current commenced its grand pyrotechnic display Sunday afternoon, the young couple, whose residence that feathers were a non-conductor, and inflicted no other injury. that the safes: place on earth during a thunder storm was in a feather bed. A vote was taken on the subject, and it was unanimously agreed that the bed was the proper place for them, so to bed they went. They had been there but a few seconds when the lightning struck the house and tore the end of the building broader is a under the bows of the ship. out in which their bed stood. Neither

Killed by a Flash.

Lockport (N. Y.) Journal. On Tuesday afternoon, in company with the Rev. B. T. Davies, we called on the near relatives of the late George H. Green, and visited the spot where his terrible, sudden and lamented death occarred. He was engaged at the timearrival of neighbors saved the horses, of the older han traveling in this way to 500 yards. The younger fish frequently charred wagon and rack, but the hay fell awkwardly in this attempt to regain was entirely consumed. During the day hundreds of sympathizing friends visited the fatal spot, and listened with mournful eagerness to the detailed particulars of the tragic event.

Tropical Lightning.

My experience confirms the remarks of Dr. Van Danckelman in Nature (p. 128) respecting the little damage cone by lightning runs like snakes all over the sky at the rate of three or four flashes in a second, and the thunder roars without a break for, frequently, one or two hours at a time. During twelve years' residence in India I heard of only two human beings and, I think, three buildings being struck, although in parts of Lower Bengal the population amounts to more than 600 to the square mile. I always attributed the scarci'y of accidents to the such a height that most of the flathes pass system is decidedly beneficial." from cloud to cloud, and very few reach the earth. The idea is supported by the fact that in the Himalayas, at 6,000 feet are frequently struck. I have seen more than a dezen pine trees which had been injured by the lightning on the top of one mountain between 8,000 and 9,000 very thin stratum of air then intervening between the clouds and earth.

Lightning in California.

Sisson's Correspondence San Francisco Post. thunder storm. Not a splinter was charred, but stakes of the wood were driven into the ground and fragments of it her daughter of indigestion. strawn for 150 feet about. Are spiral trees more subject to lightning shocks than straight ones? And could not trees be split up by at-taching short rods to them? These are questions for the scientific economist. The fragal farmer of this section asks no questions of the sort, but calm'y leads up his wagon, not staying to thank Joye the thunderer for his services as a wood splitdefied science and lightning by carrying a long steel sheep-hook. They say that his clothes and boots were torn from him. and his bones broken, but his skin was Miss Jennie Logsdon, while doing some unmarred. I did not see the man, but
