Marriage of an Estimable Pair of Lincola's Best People. THE GOVERNOR THE MASTER.

The Survey Made for the Elkhorn Valtey Road-Enterprise at the Stock Yards-A Breezy Budget of Capital Small Talk.

A MANAGER MERRILY MATED.

[PROM THE BEE'S LINCOLN BURRAU.] A grand wedding occurred Tuesday night at the new Tremont hotel, the contracting parties being Thomas Fitzgerald, one of the proprietors and managers of the hotel, and Mary I. Gaylord, formerly of Bridgeport, Conn., now of this city. Father Kennedy, of the St. Theresa catholic church, of Lincoln, officiated. At 5:30 p. m. the party assembled in the beautiful parlors of the new Tremont. The groom was dressed in conventional black, and the bride in cream silk trimmed with real lace. After the ceremony was performed a company numbering 500 partook of a sumptuous supper. Mr. Egan, who was to have responded to the toast, the "New Tremont," was unable to be present, and D. G. Courtney made a few remarks, in which he complimented the proprietors on ostablishing so line a hotel as the Tre-mont, and also spoke in good terms of the bride and groom. The presents received by the bride and groom were numerous and costly. Among the most expensive was a beautiful dia mond collar pin and an elegant gold watch to the groom, presented by guests of the house. At 19.33 p. m. the happy pair took the west bound train for Denver.

where they will spend a couple of weeks and return to Lincoln and take up their abode at the new Tremont. The kind feelings of hundreds of admiring triends follow them. THE MATHEWSON MATTER.

It is reported that the supreme court intends to tile an opinion in a few days in the case submitted to the court by the board of public lands and buildings, asking it to define the power of the board and the governor in relation to the appointment of a matron of the insance hospital, and that the court will hold that the governor alone has the appointing power. This decision will give Dr. and Mrs. Mathewson, together with the governor, full sway at the asylum, and board will have nothing to do but allow the salaries of the officers and employes of that institution.

THE SURVEY MADE. The Elkhorn Valley railroad company are making a new survey from Fremont to Lincoln. At first it was rumored that the company would use the maps and profiles formerly prepared and adopted by Engineer McNair, for the former Lincoln & Fremont railroad company, but Mr. Price, the railroad contractor, says that the railroad companies are too smart to use the field notes or profiles of any other than their own engineer.

A PUSHING ENTERPRISE. The Stock Yards company has ap-pointed a committee to visit the Nebraska City packing house in order to inform themselves and the company of what is necessary in building a similar institution in Lincoln at its yards. The com-mittee consists of John Fitzgerald, I. D. McFarland, and J. T. Imhoit. The com-pany held a meeting at the Commercial hotel. Tuesday night and it was determined to push forward not only the packing house enterprise but numerous other important matters will be instituted

NEARLY AN ACCIDENT. Jacob Roche, the republican candidate for treasurer of this county, met with

watch, and it subsequently appeared that he had the wrong pig by the car. On be-ing released the indignant pr.soner im-mediatoly sued the policeman and the city for \$20,000, and the suit is still pend-ing in the district court.

A large crowd went yesterday from this city by special train to the Turling-stock farm sile, which is down on the Nebraska City railway. Many noted cattle and stock men from Dinois and lowa were in the city and left with the

excursion The wedding of Mr Ed, Harris and Miss Funk, of this city, took place yes-torday noon at the Congregational church. Mr. Harris is a Lincoln boy, the son of George S. Harris, formerly hand commissioner of the Barlington and Missouri, and Miss Funk is the daughter of Fred Funk, Fsq., proprietor of the Lincoln opera house. Mr Harris is engaged in the banking business at Ord, in this state, where he intends to make his home in the future. The good wishes of many friends follow the happy couple. An attempt was made Tuesday night to burglarize Woltermade's saloon. The thieves made the break between I and S o clock in the morning and were fright-ened away. Several tools used by the burglars were found on the ground.

SUMMER COMPLAINT cured and im mediately relieved by DUFFY'S PURE MALT WHISKEY, \$1.25 per bottle, sold by Druggists and Grocers.

The Locksmith's Art. Chicago News: "Tell you something about lockamithst" exclaimed au old craftsman, dolefully; "there are none any more. The trade is dead. Looks are all made now by machinery, except, perhaps, safe and prison locks; those are hand-made because they afford greater security than the other kind. Time was when the lock-maker was a smith and bell-hanger as well, and the trade was a good one, but it is all changed now, and we do nothing now except repairing, or occasionally deplicating a key that has been lost. "The factory-made look has taken the

place of the hand-made article, and driven us out of the business. Now, per-haps, twenty men are required to make a lock which formerly was the work of one man. These men superintend machinery by which certain parts of the lock ar made. One man handles a punch, and cuts out the tumblers, another makes the

shuers, the springs are made by another, and so on, until all the parts are ready to be put together. None of these men-could make a lock without assistance from other workmen, and they have no knowledge of the principles of locks "Before the era of machinery all locks were madd by hand. That is why old

lock-smiths understand their business so well. But there are very few, smiths of the old school in the business now, Most

of them have quit making locks, and are making sewing machines. The princi-ples on which sewing machines are made can be easily understood by any lock-smity, add there is more money to be mage in the new business.

"Yes, the modern lock is superior to the old fashioned one, and for this reason, it is harder to pick. The old lock was made to accommodate a large key, so that no matter how fine the construe ton inside an accomplished cracksman could always get an idea of the works. The key-hole being large, he would in-sert a wire, the end of which being covered with wax would receive an impress on of the style of key required to oper

the lock. It was an easy matter to make a key after this model in wax, so that almost all the old locks could be picked with but little difficulty. "The patent lock of to day; requiring a flat key, delies any altempt at picking the works, because the key-hole is so

small and the slots are too numerous. For that reason skeleton keys are useless to timeves nowadays, and cracksmen rely for success principally on their possession of duplicate keys

LUCK COINS AND CHARMS.

THE OMAHA DAILY BEE, THURSDAY, OCTOBER 29, 1885.

Spitting on a Coin as an Oblation to Dame Fortune.

Articles Carried to Keep off Disease and Appease the Witches- A Euperstitions Undertaker -florseshoes.

Denver Tribune-Republican: Yesterday an extravagant gentleman stopped at a Denver fruit store and purchased 5 cents worth of peanuts of the presiding genius, who happened to be a small boy, whose brown skin and black eyes denoted that he was a child of sunny Italy. As the gentleman was in no hurry, and as the dirty awning over the peanut stand afforded some shelter from the rain, the gentleman lingered, ate his purchases and chatted with the boy. When he had finished his chat, he gave the boy a nickel. The youth smiled, thanked

his benefactor, spit upon the coin and put it in his pocket. "Why did you spit upon that nickle be fore you put it into your pocket." asked

the gentleman. "Me spita on a nicks for lucks," replied the dago, with a pleasant grin.

SPITTING ON A COIN. The act of spitting on a g lt coin to bring luck was not a new taing to the questioner, but it set his mind upon the subject of lucky coins, and during the day he inquired among his acquaintances with a view of ascertaining how many of them carried luck coins or pocket pieces. He found that almost every man whom he met carried some sort of a com, medal or odd article in his pockets either as an oblation to Dame Fortune or as sou-VCD TS. The greater number of coins were

either from foreign mints or were coms of the United States, either counterfeit or so badly defaced as to ba of no use as legal tender for anything. Several were 1-cent pieces, which until very recently were almost useless in Colorado, as only have dimes and nickels were used as small change.

A TREASURED NICKEL. One young married man who had just declared that he hadn't got a cent with h m, tshed a very black nickel out of his

ket when the matter of souvenirs ame up. He said that taat dida't count for money, as he had carried it for ten years and wouldn't spent it. When asked why he treasured it so carefully, he smiled sheepishly, and said "Well, I don't care about it now, but I've carried it so long I don't like to part with d. When I first got it I was a young fool. was dead massed by a little g rl, and l couldn't get acquaintéd with her, al though 1 fried every way known to pol te society. Finally, one evening, 1 was st-ting in a theater with a half eye on the stage, and an eye, and a half on her, when she suddenly pulled her handker. chief from her pocket and out dropped this nickel, and "if "folled directly at my feet. I picked # up, and I've carried it ever since

"Quite a remarkable tale," said one of his hearers.

"You were a dishonest fellow," remarked a second, "you ought to have re-turned at to the lady."

"Yes," said another," and you might have got acquainfed by that means. You were a tool as well as a knave."

"Was that young, lady your present wifey" asked mother. "No," said the ulan with the nickel, "and don't you tell the story to your wife or she'll tell mine."

ALL KINDS OF WITCH THINGS. Further inquiry revealed the fact that a great variety of articles are carried about in people's pockets for all sorts of reasons. Any quantity of people carry "buckeyes" or horse elestnuts as pre-ventives of rheumatism. One old geneman wears a brass ring which used to be a part of a pair of suspenders. This 'Jail work," as it is known to the was also a warder against rheumatism. trade, is the only branch of our business where machinery is not used. THE UNDERTAKER'S APPRENTICE. A I the locks for jails and penitentia One undertaker's apprentice was found with a bracelet upon his freekled wrist. ries are made of wrought-iron and con-He was a red-heatled, long-necked lad, with an air of reckloss abandon. He structed with from two to five tumblers finished off smooth on the inside and held together by steel screws and brass clamps. The parts when thus joined are swore and distributed tobacco juice with a perfect producty; and the discoverer of al solutely air-tight and the only opening the bracelet was astonished at such a display of a sthetic sm. He asked nim why he wore the bauble, and the boy rein the lock is the key-hole. Such a lock is as durable as can be made. "The principle of the modern lock is very old. I have a book here which gives a description of a lock found among plied that it was a sure thing to prevent blood-poisoning, to which he was more or less itable in handling corpses. When usked where he got the bracelet, he replied that he got it of the wrist of one the ruins of the great temple of Karnne, and which was in use more than forty centuries ago. The leading principles of of their subjects There were horseshoes everywhere and this lock have served as the foundation of all kinds, gold, dram on I, woo lon, jet, for most of the inventions of recent tin and paper. These were worn as watch charms, as bracelets, as wall or-The locksmitas of China, we are told, had centuries before the birth of Christ perfected a lock out of which a naments. They were hung over doors sharp bumboo thorn would dart and strike the hand of any one wrongfully tampering with it. The end of this amand beaund saloon bars and in store windows. Everybody knows that they are the most locky things in the world, and boo thorn was steeped in a poisonons de-coction, and should the luckless thick if a person can find one in the street or upon a country road where a horse has just east it, if the linder knows when she or he is well of it will be plexed up caretully, mud and all and carried off. to full belief for the reason that as the Chinese themselves chaim, gunpow-REEPING THE DEVIL AWAY. The horseshoe superstition is a rem-nant of the old habit of gaurding against der was manufactured by them at the time, a celestial safe-blower could easily render the patent lock harmless by the witches and witch-craft. The old eastoin was as now, to hang it over or upon the house door to keep the watches of the aid of a few grains of powder. The mediaval locks were among the most elaborate and delicately contrived devil out. There is one of I superstition which has specimens of these articles ever progrown to be a portion of architecture, if the term may be used, and which is never duced. They were enveloped in stael, covered with beads and floral designs. and were mostly found on the doors of noticed. Any one can see it by simply looking at an ordinary door where the material is entroly wooden. A glance the ancient eathedrais or in the magnificent cab nets that have been the marvel will show that the solid woodwork which asses between the two upper pannels of Angostura Bitters is a household word all the door crosses at the base of the upper over the world. For over 50 years if has ad-vertised itself by its merils. It is now adver-fised to warn the public again t components. pannels, and then between the lower ones, forms the figure of a cross. It is a "st Peter's cross." St. Peter, according genuine article is manufactured by Dr to history, was crucified head down-wards. This cross was originally placed upon doors to keep the devilor the Force of Habit. witches out, and it has grown to be a custom of all emportures and building of Barber (to customer in chair)-Do you modern times.og his . Customer-I live in Buffalo.

larger salaries than any others, coutrol the movements of leading players, have now joined together in a compact which emphasizes and renders final the com-plete transfer of this game from its positon as a national sport to a place among the long line of money making institu-tions which in America are dignified with the name of sport. Ten years ago base balt managers and club directors were either sporting enthusiasts or des-perate gamblers, now they are respectable and hard headed men of business, who go about the affair of winning championships count the aftar of winning championships enant with methodical calculations and a cold blooded disregard for anything beyond the gate receipts. The advant-age of this new order of things is that it entirely eliminates from the games played under such auspices all suspicion corrupt connivance or collusion 11 there is no enthusiasm among the hired players, neither is there any temptation to dishonest play. Thus it has been made possible to place games of base bal, upon a high plane of public interestl and assure at the same time that permanence of patronage which is essential to an exhibition of so costly a character. With the National league and Americau association banded together, as at pres-ent, the future of basic ball as a field for remunerative investment seems to be well assured. Nothing can defeat the well assured. Nothing can detect the intent of the managers except a wide-spread revolt on the part of players, backed by large capital in each city where a league or association club exists. It is not at all likely that such an up-rising will occur, or, if it should occur, that it will succeed in overthrowing the monopoly established by the new agree-ment. The strong defense of the exist The strong defense of the ment. exist ing organizations, aside from the heavy cost of setting up an opposition, is in the fact that the maximum salary of players is fixed at a higher figure than any out side parties can pay with any expecta-tion of making a profit. When the receipts in all the league and association cities are averaged it is evident that \$...000 for the season is a fair, and even liberal, re-muneration for any player. The next step should be an equalization of play ing strength between the clubs of the two associations, so that the disparity between winners and losers should be less marked and distinct. The clubs

How a Street Car Conductor Saved \$2,100-The "Nigger" and the Bell Register,

New York Telegraph: - A fat man with a blue suit and a cordigan jacket but-toned under his coat stood near the place where the horse cars stop and start at Harlem yesterday, taking to a young man with lead penell smut on his nose. The fat man was connected with the street railroad company. The young one was a reporter of the Daily Tele-graph. They were talking about the growth of Harlem and Morrisanta.

"There's a palatial saloon up here in Barlem about ready for occupancy," the fat man said, 'that there's story neeted with that's worth hearing. It will cost \$3,650 to it it np, and the rent is \$4,000 a year for the entire building. which the saloon-keeper leases and partially sub-lets. It'il be the most gorgeous gin mill in Harlim.

"About three years age a fellow comes to me and says, 'I could get on as con-ductor if I only had \$.5 to put up as se-cur ty for the breast-plate bell registar,' and I lent him the money. I wasn't verdant enough to do it on the mere chance of his saving enough to pay out of a conductor's meager salary. He was a progressive young man, and knowed I had a pointer to give him that'd one, and then he drops off with a clean 2,400 to his credit in the savings bank. him my When the man came to relieve criend looks har over and seein' he was bright and not likely to go agin his own interest, he says: "I'm goin" off, and I m not goin' to starve, either. I've made morey in it, and you can, if you mant to G ve me \$3 and 1'll tix you out ' His man came down and he handed over the Lutle thing as piled up the \$2,400. It wasn's bigger, but a lutle thicker, than those 'In God We 'Trust' silver pieces, what is valued at about 86 cents. When you put it in your hand and clap it up against the register, a man up a raph pole couldn't tell, for his life, that the bell hadn't rung and the register charged to a fare. The boys call it the I suppose it's because the ro ceiver thinks there s an African in the fence when the receipts take a drop.

DAILY REVIEW OF COMMERCE.

Wheat Having a Wild Whirl, but Holding Its Own in Price.

THE MARKET A FLIRTING MAID.

Live Stock Figures Continue Unsatisfactory and Depressingly Dull-

Trade at Foreign Points-Our Home Report.

CHICAGO GRAIN MARKET. CITICAGO, Oct. 25. - [Special to the BER.]-WHEAT-"We have had a co justish market to-day," said a portly looker-on in wheat; one very quick to respond to influence on ellher side, and of the causes tending to disturb values we have had about as many on one side as on the other. If an advantage

has been scored on either side it has been by the bulls, who have \$10 to their credit." This was about 12:10, when December wheat stood at 89% c, comparison being made with yesterday's closing at 88%c. Early in the day things looked heavy, the pit being full or sellers and prices pointing downward. There were large quantities of long whent brought out, working December down from 85% to 85% (@Se, which after was the lowest point. A decided aid to the weakness prevailing when this downward range was made was the posting of 150,000 in shers, or 15 boat loads, or

posting of 150,000 tu-shers, or 1s heat leads, or red winter wheat in New York as being out of condition. On every decline, all this way down, there were quantities of stuff offered, but it seemed to come from the crowd gen-erally, rather than from any particular nouse. The decline was stopped by tack of light receipts and a desire on the part of local operators to load up at the decline. To morrow's estimate on wheat was only 112 cars. Shorts also thought wheat was only 112 cars. Shorts a so thought it a good time to cover. A combination of fortune and gossip were factors that tavored the bulls on the up turn. On the floor tele-grams reported three cargoes taken for ship-ment at Toiedo, but inter King & Co., of that e.ty, descatimed a 1 knowledge of it. A story was circumsted that amounts varying troug 150,000 to 180,000 ba, had been taken here for the same turness. Based is observed to for the same purpose. Baser is adeged to have taken it. He ped by these reports the top prices of the day were reached during the hast hour. Northwestern advices were less harrowing and not dropped out of the calcu-harrows, and the dreadfur milling association is entring less or a agure. An official or the Northern Pacific writes that the movement of wheat on that read is affected entries by prices. When "Simon says thambs up" shipments are tree and vice versa. They are slower now than on October I. Producers can hold, as a general rule, when the mark, t goes against them. Storage enpactry in St. Paul is innited. Durant has a capacity for 10,000,000 but, with 1,049,000 but in store. This

was on the 26th. Since that date it has been increased to 1.855300 bu. Towards 1253 there were a tew sates of December at 8954c, but this was hard y the general market. Later it stumped on J₂c, c.os.ng quiet at the net adance noted. PROVISIONS-During the first two hours of

the morning session the provision pit con-tained a larger crowd than at any one time this season. The chose was the unistial weakness produced oy large receipts of hous. Prices, however, only dropped of 2020-2020, and have recovered in sympachy with the gram have list.

CHICAGO LIVE STOCK.

CHICAGO, Oct. 28.-[Special to the BEE.]-CATTLE-The market remains in the same dull and unsatisfactory condition as previously noted. The very best natives on the market are not making over \$5,00665,50. The latter is the highest price this week and they were a lot that averaged 1500 and over. British markets show no improvement; American live cattle are selling this week at the extraordinary low price of 11@125ge for the estimated dressed weight, and American refrigerator beef at 8000-5c. Nebraska canned goods are selling for the lowest prices on record. The stocks are the heaviest known, not only in Chicago but to the British marmake payment as easy as stowing away a turkey dinner when you're feeling hungry. All that fellow calculated to stay on the road was four months, but what does he do but hang on for twenty. The demand was weak except better grades. Common to tar qualifies of rangers were in very large supply and they sold very slowly and as low as at any time. The market for Texaus was very flat and prices were the worst of the season. Theselay line double-wintered Indian cattle so d at \$3,10*a* 3,25. At the opening of the w.e.t. \$4,00 was about the top tor good northwestern rangers and prices now are about \$1.04.01.50 lower than het year. A few very choice heavy Montana beeves soid as high as \$4.50, but owners are astonished to see what good on s are required to fetch \$3.22.06.75. what might have been a serious accident. H s tarm hand oiled his buggy prior to Mr. Roche leaving his home at Hickman a day or two ago, and in putting the burr on one of the wheels failed to secure sufficiently tight to one of the axles. The result was that the wheel came off, the team ran away and totally demolished the buggy. Mr. R. escaped with a few bruises. Mr. R. informed a reporter today that his mother was very ill and at the time of the accident he was on his way to secure the medical services of Dr. Fuller, of this city.

CITY BREVITIES.

Chancellor Manatt, of the State university, has purchased a building site in the southeast portion of the city known as Pleasant Hi I addition.

W. C. Griffith, the defeated candidate before the republican convention, for county treasurer, is now working diligently for the election of the democratic nominee for that office, Austin Humphrey. Griffith says that the Germans threatened to bolt if Roche was not nominated, and he says he will give them a dose of their own medicine

The mayor discharged one of the nayor discharged one of the escape death he would be marked policemen yesterday on the for life. But this story is hardly ent the special cound of incompetency. His name is C. H. Canaday, and the people have learned that it is necessary to be competent in order to retain a position on the Lincoln police. This is a revelation. The weather is cold and damp, with a fair prospect for a sol d freeze.

The Lincoln postmaster now puts out signal flags of many colors to inform the public what kind of weather they may expect.

The postoffice grounds are in a d'Ilapi dated condition. This state of things is accounted for by the lack of funds furnished the office to keep things in apple

Mr. Dakin, who kindly went to the expense of building an elegant band stand on the government square, expecting that the public would surely contribute toward the cost, informs a reporter that the stand cost him between \$300 and \$100 and he has not yet received but a small portion of the amount, and would thankful to those who feel inclined and will assist in hearing the expense.

One failure has occurred in Lincoln in the past few days; it was that of H. C. Lowrie. This is the first failure in some months. The inbilities are not very great, not more than \$1,500 or \$2,000. Lowrie claims his assets sufficient to pay all claims.

Registration of votes for the Elkhorn & Valley railroad bond elaction com-menced yesterday. Until recently the citizens were in the habit of voting bonds without registering, but certain attorneys contended that the bonds would beillegal without a legal registration of votes prior to election.

The question of voting bonds to the extent of \$1.5,000 for a new court house is now being agitated, and the legal question as to the right of the commissionerto issue bonds for a court house, even though voted by the people, is being dis-

cussed. It is claimed by some that the supreme court of this state in a recent decision of a cas brought from one of the western counties has held that under the present law the people cannot confer power on the counts board to issue bonds even by a vote, no matter how great the ority east in its favor. 1111

Policeman Fowler was arrested Tuesday on the charge of having made an art of three parties with malicious intent and knowing the parties to be innocent. The three parties in question were charged with lighting and shooting in Mrs. Coakley's saloon on last Sunday afternoon. They were released by the court after a preliminary examination, and forthwith had Fowler arrested. policeman seems to have lots of trouble. Before he had been on the force two

The Profession of Base Ball.

Philadelphia Record: For some years past the admir #s of base ball have clearly perceived that their favorite game was fast passing from the category of sports in the long lists of professional cutertainments that are differed to an excitement loving public during the summer months. It is not a decad³ since this city of Picha-delphia, for commune, was swarming with amateur of quicks amateur ball clubs able on occasion to give the best clubs in the country a hard-tassle. Gradually the number of these organizations has diminished, until now toere are but three or four that may justly by claim to consideration. and of these fait one-the Young America -is made up exclusively of anoteur players. The national game, as its votaries style it, is now a profession. In which employment is regular and well rewarded and to which access is becoming each season more and more difficult. And the game which amateurs play for amusement with ball and bat is quite a different affair from an exhibit on by professional players. The former is a sport: the latter a spectacle. Am dear contests are no more regarded than a passing maric. Pinples, Black Heads or Grubs, Bioteness and Eruptions on the face, leaving the skin clear and beautiful. Also cures fuch, Salt Rhenn, Sore Nipples, Sore Lips, and Oid Obstinate Ulcers. Sold by druggists, or mailed on receipt of game of billiards would be, while the games played by salaried professionals utract great crowds of spectators and form a source of large and by no means

DAIRRHOFA, worst cases relieved and enred by Di \mathbf{r} v's PURK MALT WHISKEY, Recommended by leading physicians. Sold by druggists and grocers.

Judge Andres last night married two people in peculiar condition of life, man entered his office about eight 'clock accompanied by a young woman and declared his desire to be united in the holy bonds. He had a license from the county court which authorized the transaction, and the judge straightway performed the ceremony. Upon the completion of the brief form the man with some embarrassment asked the costs, and was told that the law allowed \$3.00. Bride and groom retired for a few minutes to the hallway where they conferred, at the conclusion of which man returned and deposited \$1.25, all the twain could rike and scrape together in the world. The judge quietly inform-edition that they had better keep the funds to set up housekeeping, and they retired with thanks.

You can buy furaliture cheaper of A. L. Fitch & Co., 1 th st., bet, Farcam and Douglas, than any other place in the city.

Ladies will find it to their advantage to andne Patch's stock of yard wide emcrothered skirting flammels before purthusing elsewhere.
