

he stated that Dr. Miller is the proprietor

such improvements as are named—and perhaps others of which we have not yet thought—the fairest notion will be as carefully avoided as would one these days without elevators, electric bells and other conveniences.

And another inevitable effect of all the improvements that are to come will be the cheapening of the expense of hotel-keeping, and a consequent reduction in the high terms that now obtain.

Kissed by Mail.

United States Mail: A young post

master of a village post office was hard at work when a gentle tap was heard upon the door, and in stepped a bashful maiden of 16, with a money order, which she desired cashed. She handed it to the official with a bashful smile, who, after closely examining it, handed her the money it called for. At the same time he asked her if she had read what was written on the margin of the order.

"No, I have not," she replied, "for I can not make it out. Will you please read it for me?"

"The young postmaster read as follows:

"I send you \$3 and a dozen kisses,"

Glancing at the bashful girl, he said, "Now I have paid you the money, and I suppose you want the kisses."

"Yes," she said, "if he has sent me any kisses I want them, too."

It is hardly necessary to say that the balance of the order was promptly paid, and in a scientific manner at that and eminently satisfactory to the country maiden, for she went out of the office smacking her lips as if there was a taste on them she had never encountered before.

fore. After she arrived home she remarked to her mother: "Eh, mother, but this post office system of ours is a great thing, developing more and more every year, and each new feature added seems to be the best. Jimmy sent me a dozen kisses along with the money order, and the postmaster gave me twenty. It beats the special delivery system all hollow."

Cheap Jewelry.
Mrs. John Jacob Astor, who on dress occasions wears diamonds that cost nearly \$300,000, would no doubt smile at the cheap jewelry which adorns so many of her sex, but after all how small is the difference? Perhaps, indeed, the housemaid or sewing-girl is just as happy with

a fifty-cent brooch as Mrs. Astor is with her more costly gauds. The love of jewelry seems universal, and hence the poor must be accommodated in a manner adapted to low pay and other privations. For many years immense quantities of cheap jewelry were manufactured in New England, but as everything centers in New York, this trade proved no exception. At one time rolled gold was exten-

sively used, the metal being reduced to the thinness almost of tissue paper, but at present "plating" is preferred. Red gold, which is now the principal material, is an alloy of gold and copper, the latter being preferable to silver for the purpose, as it makes a richer color. Plating is done by the use of an electric battery, and one ounce of gold applied in this manner will plate one hundred and fifty pairs of bracelets. Mrs. Astor and

others of the creme de la creme might shudder at the thought of using a pair of these bracelets, and yet what multitudes of their sex are happy to be thus adorned!

Why He Wanted a Charter.

Wall Street Daily News: During the last session of the Kansas legislature some of the members were greatly annoyed by a man who wanted a charter. He didn't seem particular whether it was a charter for a bank, railroad, canal, navigation or manufacturing company.

and this led to the inquiry: "What good would a charter do you, anyhow?" Well, you see, I want to go practicing medicine here, and I have no diploma and can't get one. If I can get a charter for something or other and hang it up in my office you folks in this state won't know the difference. Please have the clerk fill out with red ink and tie a blue ribbon to it."

This has reached New York and is now raging in some quarters in a very surprising degree. This is shown by the exhibition at Masonic hall, recently opened under the patronage of Mrs. Hodgman, Mrs. Arthur, Mrs. Stuyvesant and other women of wealth and tone. The prizes are \$190 for the best crazy-quilt; also \$100 for the best Kensington work, and also five hundred prizes for various specimens

of needle-work. These orders brought in an assortment valued at a half million, and one of the number is priced \$4,000. This is certainly expensive quilting, and will no doubt attract many admirers, as the mania is evidently on the increase.

Postoffice Changes.
In Nebraska and Iowa during the week ending Nov. 21, 1885, furnished by Wm. Van Vleet, of the postoffice department; NEBRASKA.
