CABLES CAUSE WHEAT TO DROP.

No Large Transactions in the Corn Pit—Good Crops Reported in Iowa—The Cattle Market Strong.

CHICAGO GRAIN MARKET.

Chicago, August 20.—[Special Telegram to the Bee.]—English cables reported wheat quiet. The London dispatch said there was "rather less tone in the market owing to better crop prospects." Rains in England have ceased and the weather is reported as warmer and more seasonable. Without the depressing effect of an English bull market values here opened a few fractions on the regular bar. September opened at 75 3/4c, against the close last night of 75 1/2c, and on the open board call market of about the same figures. For the first ten minutes of the session values tended downward, September going to 75 1/4c. The rest of the day were 71 cars of winter wheat, 50 cars of spring wheat, 43 cars of corn, 20 cars of oats, English corn cables reported that cereal 3/4 higher, but in spite of this fact September opened weak and 3/4c lower than last night. The opening was at 75 1/4c, after selling down to about the pit price—75 1/4c for September wheat again firm up, going back to 75 3/4c. Any little buying seems to firm the market almost immediately, and holders of privileges on the short side protect themselves quite easily. After the first half hour the market again became quiet, and values settled back in the vicinity of the opening prices.

Corn was firmer after the opening decline and the biggest part of trading was in the October option. As in wheat, there was a strong undertone to the market, but no individual large trade. October was 44c at the opening, and in the first hour had sold up to 44 1/2c.

The trading in the provision pit was moderately large at the opening. C. H. Adams and Higgins & Gilbert bought a little September pork, and Wells, the Butcher Packing company, and the Chicago Packing & Provision company sold. A large trade in the opening, against 77 1/2c last night on 30 lower English markets. But the decline, if such it could be called, was easily regained.

The tenor of the private cables from England was that the English were feeling rather better on account of the improved weather, and were disposed to sell, while the French were getting more excited and inclined to increase their purchases. Clearances from the Atlantic seaboard, reported this morning, show an outward movement yesterday of over six hundred thousand bushels. It is probable that the clearances for the week will approximate three million bushels, exclusive of flour and Pacific coast figures. Robert Warren, who has been a good shipper of wheat, is reported to be a seller in the pit to-day, and William Dunn, another heavy shipper, was a buyer, as were also John C. Conner and Kenneth. From 10:30 to 11:30 a. m. values held steady between 75c and 76c for September. A good many puts were sold at 75c last night, and all efforts to sell wheat below that figure were unavailing. Both bulls and bears were in the pit in good force and fighting hard.

In corn there was a seeping market all day, and scarcely a transaction of over 25,000 bushels in one lot was made, October, which at 10:30 was at 44 1/2c, sold at 44c, and by 12 o'clock, one of H. H. Carr's correspondents from Iowa writes that in his opinion corn prospects had radically changed in the past ten days, and that there will be an average crop. A traveling man drove sixty miles across the country from Missouri Valley junction, on the west, to the Illinois Central at Storm Lake, and says he saw dozens of threshers turning out twenty-five to thirty bushels of wheat, and six to six bushels of oats to the acre. He winds up with the remark that western Iowa will have as fine a crop of corn as last year, but that the yield in southwestern Iowa will not be so good.

In the provision pit trading was very moderate from start to finish. Values were steadily held in nearly everything.

CHICAGO LIVE STOCK.

Chicago, August 20.—[Special Telegram to the Bee.]—CATTLE.—Today the receipts were lighter than expected. For the week thus far the total receipts of cattle are 45,000, or 3,000 more than last. The shipments yesterday were 4,835 head, the largest of the year, though the total shipments for the week are less than last week. The daily receipts for the week total 1,400 head, or 100 more than the average for the week of which a very full share were fat cattle. The offerings of smooth, fat cattle to-day were moderate and values ruled strong. Common to fair cattle of all kinds were barely steady.
