THE TALE OF A TAB

Which Shows That Young Men Should Read the Labels on Their Coats.

Pittsburg Dispatch. Several weeks ago a gentleman, known in this transaction as Eugene Reading, bought a dark gray Norfolk summer coat while making a summer trip to Boston. On the inside of the collar of the coat was fastened the manufacturer's label bearing the insignificant characters, "Lot 2133, B. 38." When Reading tore the tab off his eye caught some writing on the side which he immediately read. It was in French and he put the tab into his pocket, transacted his business and a couple of weeks after his return to Pittsburg decided to make a test of this gentle hint to mankind in general. He wrote a letter to Miss Polley, in which he told her that he had discovered her name upon the tab and congratulated her upon her excellent workmanship, saying that one who could sew so neatly must, indeed, be a young lady of other commendable and lovable qualities. He emphasized his sincerity by calling her a "pretty tailoress," and professed the strange awakening of his heart of something of a genuine regard, if no affection, for the lady who had made the garment.
