

A VERY LONG LEGAL SEIGE.

Crowded Docket of the Lancaster District Court the Coming Season.

WORK DULL AT THE STATE PEN.

Contractors Who Would Like to Get Rid of Some Their Convicts—Rock Island Harbors—Lumber News.

THE DOCKET FOR THE COMING TERM OF THE LANCASTER DISTRICT COURT will, from present appearances, be the greatest in number of cases recorded for trial ever compiled for a session of the court.

In criminal matters there are close to one hundred cases for the grand jury to investigate. It will be remembered that Judges Pond and Hayward issued a call some two weeks since for a grand jury, and if they do not transact business with more neatness and dispatch than the average American jury, they can look for a three weeks' tug-of-war when they assemble.

Of these nearly or quite a hundred cases, it would be supposed that red-handed murderers and midnight assassins would loom up in no inconsiderable numbers, but such is not the case, felonious assaults being the highest crime in the progressive list to murder, and from such charges the cases coming in a great majority to the question of drawn shutters in schools, or who sold Agent James and his companion into the hands of the town clock's record of closing hours.

However, all of these cases are of a character that promises for each one a trial and the amount of eloquence that will be expended in criminal trials when the court convenes in the coming term.

Especially will this prove true in the large array of law and order cases, of which some individual ones occupied two days in the lower court in preliminary hearings, and some in the coming term is also phoric in cases of wedded infidelity, the particulars in the greater number of them having already been published as the papers were filed.

Yesterday was the most quiet day in months in hotel circles, a reaction from busy times and conventions fairly intense. The whistle of the locomotive in the Northwestern will be sounded in Lincoln within fifteen days.

Daniel Blanchard, Friend; R. J. Cook, Omaha; P. D. DeJure, Grand Island; J. Smith, Chadron; P. Bartlett, Chas. Spencer, Plattsmouth; E. H. Kessler, A. Campbell, Omaha; R. H. Yeoman, Blair; J. H. Broadly, Beatrice; David Butler, Plattsmouth; and W. Nebraska at Lincoln hotels yesterday.

"100 Doses One Dollar" is true only of H. B. Scoville's, and it is an unanswerable argument as to strength and economy. A Strange Will.

The will of the late Peter McClelland was pronounced here to-day, says a special from Waco, Texas. Mr. McClelland died last Friday. He was the wealthiest man in McClelland county for many years, being close to \$1,000,000. The will amounts to \$1,000,000. The will amounts to \$1,000,000. The will amounts to \$1,000,000.

ROCK ISLAND RUMORS. The report has been circulated for some time that Rock Island surveyors were locating a line into this city from the south east, and the rumor was argued as a day or two ago by the report that the company were purchasing grounds for a right away up the Antelope bottom.

THE LOCAL TRAVELER'S PROTECTIVE ASSOCIATION held a regular semi-monthly session Saturday evening, but the attendance was less than expected except to add the names of three new members to the rapidly increasing roll of membership.

THE RENEWED DEMAND MADE BY PETITIONERS to the city council, asking that a vote be had at the coming election on the question of township organization in Lancaster county, is the latest move, and is only a repetition of like requests and votes for two or three years on the same question.

THE CHICAGO & NORTHWESTERN ROAD, in the laying of iron tracks in Lincoln, has made good progress the past week, and now are but ten or twelve miles out from the city laying at the rate of a mile to a mile and a half a day.

COSSIP ABOUT GAY PARIS.

The Most Beautiful and the Most Artificial City in the World.

PARIS STREETS AND PARKS.

Flat Life and Out-of-Door Amusement—The Can-Can—The Bullier—Dance—The Pictures of its Characters—What Visitors Do for Paris.

PARIS, Sept.—[Correspondence of the Cleveland Leader.]—Paris is endowed with perpetual life. The city grows and gayer as it grows older. It has made beauty a scientific study, and what with its paint and powder, its rouge pot, and its enamel, it looks like the creation of an Aladdin's lamp in a single night rather than the growth of many centuries.

Everything is new in Paris and the whole city appears to have jumped out of an orchestra. It is hard to imagine that it was a well-known town when Christ was crucified, and that its foundations had been laid when Julius Caesar was sucking his thumbs and blinking his little eyes as a raw, red baby.

The unexpected demands for extension of the city water service is giving employment to a large number of men in the work of laying mains. The contractor for the sewer system is short of help and is offering \$1.75 per day for additional workmen who are wanted at once.
