

HARRY WILKES WINS AGAIN. Splendid Races Under Disagreeable Circumstances at the Driving Park.

MEETING OF TWELVE WISE MEN. Marvin Hught's Great Scheme—A Slick Sneak—The Saunders Estate—Lost an Arm—Other Local News.

Speed and Dust. The Omaha fall races commenced yesterday at the fair grounds at 3 o'clock.

The prevalence of a strong wind during the morning had the effect of inducing some people to believe that the races would be postponed, and as a consequence a number of people who otherwise would have been present was compelled to remain at home.

Dr. Peck acted as starter and Nat Brown and Joseph Griffin as judges. These gentlemen got through with their work with much less noise than did some of their recent predecessors and did it in a most acceptable manner.

The musical Union orchestra band occupied a place in the grand stand, and played some music which enlivened the intervals between the races.

Connoisseurs were experienced because of the absence of programs, which was all the more noticeable because of the excellent programming which was done during the last year.

There were but two races, one of 2:18 class, and the other a free for all. In the first were entered Harry Wilkes, whose record is 2:14, and Arab, 2:16.

The 2:18 were entered Eva, with a record of 2:20, J. Q., 2:17, and Edymion, 2:21.

The price of admission was but fifty cents to all parts of the field. Notwithstanding the disadvantages under which the horses were run, Arab, whose record is 2:14, won the race with a record of 2:17.

First Heat—The horses got away after the second attempt to score. J. Q. won the pole. Eva second, and Edymion third.

Second Heat—This was a more uniformly contested race, the horses, at no time being more than a head apart.

Third Heat—J. Q. was again in the way to the front from the start, closely pressed by Eva, who in turn had to contend with Edymion, who was making excellent strides at her shoulder.

Fourth Heat—This was a more uniformly contested race, the horses, at no time being more than a head apart.

Fifth Heat—This was a more uniformly contested race, the horses, at no time being more than a head apart.

Sixth Heat—This was a more uniformly contested race, the horses, at no time being more than a head apart.

Seventh Heat—This was a more uniformly contested race, the horses, at no time being more than a head apart.

Eighth Heat—This was a more uniformly contested race, the horses, at no time being more than a head apart.

Ninth Heat—This was a more uniformly contested race, the horses, at no time being more than a head apart.

Tenth Heat—This was a more uniformly contested race, the horses, at no time being more than a head apart.

Eleventh Heat—This was a more uniformly contested race, the horses, at no time being more than a head apart.

Twelfth Heat—This was a more uniformly contested race, the horses, at no time being more than a head apart.

THE TWELVE WISE MEN. Proceedings of the City Council Last Night.

All of the councilmen were present at the regular weekly session of the city council held last night.

From the Mayor—Approving the ordinances adopted at the last meeting of the council. Filed.

From the Board of Public Works—Reporting estimates in favor of contractors for improvements completed or in progress. Approved.

From J. J. Galligan—Recommending additional fire boxes at the corner of Thirtieth and Farnam, Twelfth and Vinton, and Twelfth and Williams. Fire and waterworks.

From the Commissioners—Re-referring a petition asking for a redistricting of the fourth ward, as it is too late to take any action before the coming election.

From the Board of Public Works—Reporting estimates in favor of contractors for improvements completed or in progress. Approved.

involved in an argument as to the feasibility of the proposed road and the effect it would have on the traffic over the creek and other roads, which are not now favoring Omaha.

The heavy capitalists on the committee were still missing, and as they appeared to be no probability of their turning up, the suggestion of the man who had looked at the clock was followed.

The dozen business men, preceded by Mr. Griffiths, slowly filed out of the room and the lights were extinguished.

A member of the freight bureau, in the course of a conversation with a reporter last night said: "Do you want to know the reason why the capitalists were there there last night? Simply because they had a talk with General Manager Hught, of the Northwestern, and he has blinded them with his promises."

From the Board of Public Works—Reporting estimates in favor of contractors for improvements completed or in progress. Approved.

AMUSEMENTS. "The Streets of New York." A large audience, applauded debonair Joe Boniface last evening in the old-time drama of "The Streets of New York."

The play with its mingling of pathos, humor and sensation, is interesting enough in itself, but it depends largely on Boniface for its vitality, and the part of the dare devil, Tom Badger, is well moulded to the handsome actor.

The recent wonderful discoveries of iron, copper, and silver ores in northwestern Wisconsin, Michigan and Minnesota, attracted attention to a fact not generally known that the wise old Dr. Franklin, while arranging the treaty between this country and England after the revolution, so drew the boundary lines between the late hostile powers as to include in the United States the great mining regions on the southern shore of Lake Superior.

In these days, when every week gives fresh information concerning the boundless wealth in iron, copper and silver of this wonderful world the remark is often heard that the treasures here entombed are scarcely yet unlocked.

The Virgin Salt Co., of New Haven, Conn., to introduce Virgin Salt into every family, are making this grand offer: A Crazy Patchwork block, enameled in the latest fancy styles.

The Central Women's Christian Temperance Union will hold their regular meeting in the Seward Street M. E. church at 3 o'clock, Wednesday afternoon, Oct. 20.

The firemen of the paid department of this city are preparing to give their first annual ball on the night of November 25, at the exposition annex.

S. S. Hadley, of Cedar Rapids, is in the city. H. Draper, of Ashland, is at the Canfield.

John Foley, of Wahoo, is at the Merchants. L. A. Sherman, of Dunlap, Ia., is at the Paxton.

Dr. R. W. Oliver, of Kearney, is at the Canfield. Charles Meighan, of Atlantic, Ia., is at the Cozzens.

E. J. Wooley, of Louisville, Neb., is at the Canfield. W. E. Doolittle and wife, of Atkinson, are at the Paxton.

J. B. Haynes, the stenographer, has returned from a business trip through the state. Mrs. C. J. Barber, child and mother, Mrs. Ostrom went to Atchison yesterday morning.

J. E. North, the chosen second of General Lusk, has returned from the gubernatorial race, is at the Paxton.

F. W. Costeller, the Blair banker, was in the city yesterday and registered at the Merchants.

C. W. Stover, traveling passenger agent of the Atchison, Topeka & Santa Fe, is at the Millard.

J. W. Ryan, of Gage county, on of the leading democrats of that place, is in town on a visit of a couple of days.

Jas. Barnes, private secretary to Traffic Manager Kimball of the Union Pacific has gone east for a brief trip of recreation.

John White was arrested yesterday evening for nipping two hats from Kelle's hat store.

Samuel Lillis, the genial and efficient contractor of the Cedar railway company, returned this morning from Kansas City, and is stopping at the Paxton.

H. K. Burket, the well known undertaker, has returned from Cleveland, where he went to attend the National Convention of the Undertakers of the world, and reports having enjoyed himself greatly.

The bank clearances yesterday were \$678,815.39. Captain John S. W. has made room for a successor in his position of deputy city clerk.

A Scandinavian republican mass meeting will be held at 8 o'clock last Saturday evening at 8 o'clock.

A PREHISTORIC PEOPLE. The Race Who Worked the Copper Mines of Michigan.

The recent wonderful discoveries of iron, copper, and silver ores in northwestern Wisconsin, Michigan and Minnesota, attracted attention to a fact not generally known that the wise old Dr. Franklin, while arranging the treaty between this country and England after the revolution, so drew the boundary lines between the late hostile powers as to include in the United States the great mining regions on the southern shore of Lake Superior.

In these days, when every week gives fresh information concerning the boundless wealth in iron, copper and silver of this wonderful world the remark is often heard that the treasures here entombed are scarcely yet unlocked.

The Virgin Salt Co., of New Haven, Conn., to introduce Virgin Salt into every family, are making this grand offer: A Crazy Patchwork block, enameled in the latest fancy styles.

The Central Women's Christian Temperance Union will hold their regular meeting in the Seward Street M. E. church at 3 o'clock, Wednesday afternoon, Oct. 20.

A Scandinavian republican mass meeting will be held at 8 o'clock last Saturday evening at 8 o'clock.

JUVENILE GENIUS. Some of the Wonderful Discoveries Made by Boys.

Popular Science: Some of the most important inventions have been the work of mere boys. The invention of the valve motion to the steam engine was made by a boy. What left the engine in a very incomplete condition, from the fact that he had no way to open or close the valves except by the means of levers operated by the hand.

He set up a large engine at one of two miles, and a boy was hired to work these valve levers. Although this was not hard work, yet it required his constant attention. As he worked these levers, saying the words "open" and "close" in the right direction and at the exact time that he had to open or close the valves, he procured a long, strong cord, and made one end of it fast to the valve motion, and the other end to the valve lever.

Then he had the satisfaction of seeing the engine move off with perfect regularity of motion. A short time after the motion came round and saw the boy playing marbles at the door. Looking at the engine, he soon saw the ingenuity of the boy, and also the advantages of so great an invention.

Mr. Watt then carried out the boy's invention in a very practical form, and made the steam engine a perfect automatic working machine. The power loom is the invention of James Hargreaves, who was a boy or heard of such a thing. He cut out with his knife, and after he had got it all done he, with great enthusiasm, showed it to his father, who at once kicked him out of the house.

A boy about him who would spend his time on such foolish things. The boy was afterward apprenticed to a blacksmith, and he soon found that his new master was a very good man, and he took a lively interest in him.

He had made a loom of what was left of the one his father had broken up, which he showed to his master. The blacksmith saw that he had no common boy as apprentice, and he immediately had a loom constructed under the supervision of the boy. It worked to their perfect satisfaction, and the blacksmith was so pleased with the boy's invention, that he took him into his home, and made him a wealthy gentleman who was the inventor of the celebrated power loom.

You may be able to judge of the astonishment at the old home when he was discovered, to the great distress of his father, who had been so long collecting the tools of workmen and bothered them with questions. One day, after having watched some millwrights, he was discovered, to the great distress of his father, who had been so long collecting the tools of workmen and bothered them with questions.
