THE DAILY BEE.

Sworn Statement of Circulation. State of Nebraska, ss. Geo. B. Tschuck, Secretary of The Bee Publishing Company, does solemnly swear that the actual circulation of the Daily Bee for the week ending Nov. 5th, 1886, was as follows:

Table with 2 columns: Day and Circulation. Saturday, Oct. 30, 13,000; Sunday, Nov. 1, 13,000; Monday, Nov. 2, 13,000; Tuesday, Nov. 3, 13,000; Wednesday, Nov. 4, 13,000; Thursday, Nov. 5, 13,000; Friday, Nov. 6, 13,000; Average, 13,000.

Sworn to and subscribed in my presence this 6th day of November, A. D. 1886, N. P. FEEL, Notary Public.

"MILLER AND MORTON" are the leading candidates for senator in New York—Warner Miller and Levi P. Morton.

EVERY member of the legislature from Douglas county, both republican and democrat, is a pronounced Van Wyck man.

A FEW eastern papers of protective proclivities are endeavoring to boom Mr. Randall for the speakership.

THERE is a want of sufficiency and completeness about the post-election opinions which can be supplied only by the Hon. Benjamin F. Butler.

WHILE the insurance companies lost some money by last week's rise, they are reaping a golden harvest in consequence.

SAM RANDALL is nominated by the New York Sun for the presidency in 1888.

COUNCIL BEN FOLSON sails next Saturday for Sheffield, where he expects to remain for two years.

PHILIP ANDERS returned from the Knights of Labor convention in Richmond just in time to himself elected.

WE have just received in common doubtless with most other newspapers of the country, a speech in pamphlet form of the Hon. James Phelan of Tennessee.

THE English liberals do not acknowledge that they are in any way discouraged by the result of the late elections.

THE occupation and subjugation of Burma by Great Britain are proving difficult and dangerous.

THE English liberals do not acknowledge that they are in any way discouraged by the result of the late elections.

THE occupation and subjugation of Burma by Great Britain are proving difficult and dangerous.

THE English liberals do not acknowledge that they are in any way discouraged by the result of the late elections.

THE occupation and subjugation of Burma by Great Britain are proving difficult and dangerous.

THE English liberals do not acknowledge that they are in any way discouraged by the result of the late elections.

The Monopoly Missionary. Dr. Miller's mission from Wall street to Omaha has failed so far and is doomed to a dismal failure when the legislature meets to choose a United States senator.

The venal old reprobate contracted with Jay Gould to give Church Howe a walk-away, just as he did when Valentine was up for congress. He played fast and loose with McShane, but when he was found out made a point at Howe during the closing days of the campaign.

McShane's election was gall and wormwood to the contractor for Nebraska monopoly demagogues. Jay Gould has discovered that the doctor has lost his grip on the democracy.

The contract to defeat Van Wyck by holding the democrats in one corner while the railroad republicans combine on a monopoly is almost certain to fail as badly as the doctor's ill-disguised efforts to elect Howe.

Now we would like to know how many democrats in the next legislature owe their election to Doctor Miller. There is not one in Douglas county. The democrats who were elected from this county owe their success in common with the republicans who were elected to the labor ticket which was made up of candidates who had pronounced and pledged themselves for Van Wyck.

Dr. Miller had better return to Wall street and resume the speculative career which he has mapped out for himself under the shadow of Gould's private office.

The experiment of the popular vote for senator has been a success. It has been made against many discouragements. The republican republicans were in charge of the machinery in most counties and resolutely refused to allow republicans to voice their preference on the regular tickets.

The vote of course has no direct influence on the return of General Van Wyck. It does not give him a title to another six years in the senate. That title under the national constitution must come from the legislature. But indirectly the popular vote will go a long way toward determining the result.

The Judge Advocate Generalship. Washington dispatches have stated within a few days past that an effort is making to secure a re-hearing by the president of the case of Judge Advocate General Swain, who was suspended about a year ago upon the verdict of a court martial that he had been guilty of certain demerits or improprieties in connection with military law or usage.

The original Holly contract, as advocated by Dr. Miller, proposed to give us about twenty miles of four-inch mains and no reservoir. The pipes would have been laid in the main streets and no one could or should have known it better than Garfield. It was widely and inevitably regarded, whether justly or not, as the reward of personal and business favors. It was naturally very offensive to army circles, and this feeling was not lessened by the subsequent presumptuous and arrogant course of Swain.

Moines with the original Holly plant. The direct pressure alone would have given us a chance of bumping up in case the pumps failed to operate.

The direct pressure alone would have given us a chance of bumping up in case the pumps failed to operate. The difference in the cost of hydrants between the Holly contract and the present contract would have made a difference of from \$300,000 to \$100,000 to the tax payers.

AN AGE OF SUPERSTITION. Wonderful Signs.

The Sixth Century Prolife in Stories of Wonderful Signs. A VISIT FROM THE EVIL ONE. A Terrible Sensation in a Church—The Evidence of Eye-Witnesses—The Cloud That Passed Over Malta.

Chambers' Journal: Whether it was owing to the improved means of spreading intelligence afforded by the invention of printing or to the excitement of men's minds consequent upon the political and social events of the time, the sixteenth century was prolific in stories of wonderful sights in the heavens and on the earth.

While the tempest was at its height a vision from the other regions of the narrator evidently believed) made his appearance in the midst of the congregation, in the form of a black dog, the sight of a dog of that color being in such a place together with the fearful flashes of fire which then were seen, moved such admiration in the minds of the assembly that they thought doomsday had already come.

The articles of incorporation of the Des Moines base ball club have been filed for record with the secretary of state. The capital stock is placed at \$5,000. The Keokuk & Western railway has been incorporated to purchase and operate the Missouri, Iowa & Nebraska road, running from Keokuk to Van Wert.

Twenty-nine postmasters earned less than a dollar each last year. The Pasture Institute fund, Paris, has reached the sum of 1,442,000 francs. "At present," writes a visitor to the island of St. Kitts, "whistling is strictly forbidden on the streets."

The pepper mill farmers of Wayne county, New York, are worried over the decline in pepper mill prices. The rapid City Republican is of the opinion that in two more years coal from the state county fields will totally replace plant wood as a fuel in the entire Illinois country.

The new United Pacific depot at Cheyenne will cost \$75,000. The Douglas Coal and Land company, capital \$200,000, has been incorporated. Cheyenne has received underground assurances that the Burlington road will build to the city.

The new United Pacific depot at Cheyenne will cost \$75,000. The Douglas Coal and Land company, capital \$200,000, has been incorporated. Cheyenne has received underground assurances that the Burlington road will build to the city.

The new United Pacific depot at Cheyenne will cost \$75,000. The Douglas Coal and Land company, capital \$200,000, has been incorporated. Cheyenne has received underground assurances that the Burlington road will build to the city.

The other and the wiser way, the American and the republican way, is to consider soberly what ideas, what wants, what grievances this vote represents, and so far as these ideas and wants and grievances are sound and reasonable and well founded to recognize them and to take such steps as will content the uneasiness produced by their failure of recognition in the past.

These are among the problems certainly raised by Mr. George's unexpected heavy vote. "Property and order" will not suffer if they are solved in the just and humane way. And when these social and political reforms are achieved, the social order, are sound and entirely confident that Mr. Henry George's party will tranquilly disappear by absorption.

A Famous Old Scottish Air. The readers and singers of Burns' admirable songs will be glad to hear that some highly-gifted genius, whose name is not given, has recently composed a new and exquisitely original poem, such a lustre of glory on his native land would deign to acknowledge any verse composition or music in the world.

This is very sensibly put on the part of the northern poet, and is well worth being written; but the following verse, and the one that struck I believe, the true keynote to Burns' mastery of exquisite finish and true pathos. "My Bonnie Mary" reveals the author to be a man of the sensibility, and a cavalier in pledging the health of his darling when the social cup in the hour of mirth in some Northland inn passed quite freely from hand to hand.

Strength of the English Navy. William Pitt, first of his name, Magistrate of the court of the Executive government of the English navy is visited under the crown in the board of admiralty, which changes with each cabinet, and the director of the navy, the first lord being a member of the cabinet. The second lord is known as the senior naval lord, the third as the second naval lord, the fourth as the junior naval lord, and the fifth as the fourth naval lord, who sits in parliament. They are paid £18,000 (\$28,000) per annum, of which the first lord receives £4,500, and subordinate to them are the controller of the navy, the construction and engineering, the victualling, the contract and purchase, the accountant general, the medical, the hydrographic and the superintendent of reserves. Though the first lord has supreme authority and is responsible to parliament for the navy, the duties of the various practical duties of administration belong to the three naval lords, while the sixth lord controls in conjunction with the junior naval lord the victualling, the hydrographic and the superintendent of reserves. There are seventeen flag officers in commission, who, with their secretaries, receive £25,000 a year, and eighty three flag officers in commission, who, with their secretaries, receive £15,000 a year, and 582 subordinate petty officers and seamen, of 4,360 boys, 2,700 are on service in the fleet and 1,660 are on shore duty. The fleet is composed of 120 ships, of which 60 are on service on shore, there are 4,600 officers and men and in Indian troop 4,200. In the malden there are 400 staff and commissioned officers, and 12,000 non-commissioned officers and men, making a grand total of 58,800 men in the service. There are 171 ships in commission, 37 ship building, and the estimated cost of the navy for the year 1886-87 is about \$55,000,000 annually.

Economy in Bulgaria. London Telegram: The Hon. Mr. Gladstone returned from Sofia that the government of Bulgaria is being most economically carried on. A prefect gets only £250 per annum, and a cabinet minister only £1,000 a year, and the salary of the secretary of foreign affairs, who receives £120 extra to pay for his entertainment of the various foreign ministers and diplomat agents. The president of the high court of appeals receives £30 a year, while the sum of about £25,000 is devoted to public education. Bulgaria has its national bank, which is controlled by the government, and has branches at Sofia and Plovdiv.
