The street car company is putting in its turnouts, so as to render it possible to make speedier trips than heretofore, and soon Council Bluffs will have a really metropolitan line, running with such fre-quency as to render it an easy matter to reach all parts of the city at any hour of the day.

It is expected that after the first of the month the street car service will begin in earnest to make ten-minute trips, and thus better accommodate the public. The prediction is made that the company will then begin to make money out of the line, as there will be a large increase in the number of patrons, if one does not have to wait but a few minutes at the longest in order to get a car.

Tenth Avenue Conference.

In accordance with the announcement made, the city conneil and property owners on Teath avenue met yesterday morning at Kahle's hotel to consult concerning the giving to the Union Pacific of the right of way up that avenue to Fourth street. It has been suggested that instead of going up Tenth avenue that the city give the road the right of way along the alley on the south of Tenth avenue, as there would be less damage to individual property owners, and it seems that the route would be all that is needed. The railway company not seeming disposed to accept this route, this meeting was called to ascertain approximately how much it would cost to go up Tenth avenue. Mayor Groneweg was made chairman of the meeting and E. H.

Odell secretary. The expression of all the property owners present was unanimously in

fayor of letting the road take some other route, but that if Tenth avenue was to be used they should be paid damages.

There was no representative of the Union Pacific company present except George F. Wright, who was not strictly so. Mr. Wright said that he expected that Mr. Burns would be present, but that Mr. Burns had informed him that in case of his necessary absence, Mr. Wright should represent the company so far as it was necessary to have the company represented. Mr. Wright, as one of the citizens' committee, explained the situation. At the time of filing complaints with the railway commissioners against the Union Pacific, one of the causes alleged was that the company did not maintain any freight depot at or near Main street for the accommodation of the many heavy jobbing houses located in that vicinity: The company agreed to establish such a freight depot if the citizens would secure the right of way for the tracks. The company was not anxious to go up Tenth avenue, but the move was on the part of the citizens's committee, of which J. T. Stewart was the chairman, and Mr. Merriam the sec-retary. A sub-committee, of which George F. Wright was the chairman, was appointed to see that the necessary ordi-nance was passed by the council, and the right of way secured. Such was the

history in brief of the present move. The different property owners were then called in, one after another, to state the value of their property, and what they considered fair damages, with a view of enlightening the council and citizens as to what would be the probable

Mr. Allen proposed to give \$100 if the company would accept the alley route and leave Tenth avenue alone, and Mr. Kable said he would give his check for \$200 for the same purpose, thus showing how eager these gentlemen are to have some other route taken, rather

The papers in the eighty acre tract sale made by Odell Bros. & Company some time since were filed for record Monday The money consideration has been in the hands of Messrs. Officer & Pusey ever since the deal was closed, but as it required some time to complete the necessary papers they have but just been recorded. The above delay in recording the deeds has been seized upon as foundation for a report that the above real estate transaction was only a "make believe" and "in the minds" of the real estate firm interested. To publish abroad that transactions of this magnitude are "straw" affairs is not the way to help along the boom and the parties starting such canards are injuring the cities in terests.

It seemed that they set the figures for damages plenty high enough, but this was natural, and about what any one would to under the circumstances.

The value of the property thus repre-sented aggregated \$53,500, and the total damages claimed \$23,700, so that it appears that they deem the laying of the railway track along the avenue depreci ates the property about one half. There was little to be done after get-ting these statements. No one seemed to have any authority to speak for the railway company, whether it would pay any such damages. It was afterwards learned, from apparently reliable sources, that the company does not expect to pay any damages, but that it looks to the city In regard to the Union Pacific Mr. Wright said that the company desired

to have the matter settled one way or another as soon as possible, so that a might go ahead with its arrangements. It had arranged so that if the track ran along Tenth ayenne, it could get its dirt for the new bridge from the bluffs in the eastern part of the city.
