ALL communications relating to news and editorial matters should be addressed to the Editor of the Bee.

THE DAILY BEE.

Sworn Statement of Circulation. State of Nebraska, County of Douglas.

Some of these days the street car company will discover that it does not own the earth in addition to a practical monopoly of all our best thoroughfares.

PROBITY in Omaha continues to advance. But Omaha real estate values for inside property are still below what is asked for like investments in rival cities.

LAST week's clearings increased 65 per cent over last year. Business is business and Omaha is getting her full share, as shown by the most reliable of commercial indicators.

CAPTAIN GREELY would render a signal service to this city in relieving Omaha of his second lieutenant who pretends to aspire to Hazen's succession.

OUT of the forty-five members of the house who recorded their votes against abolishing the railroad commission...

HENRY WARD BECKER has expressed himself in favor of the right of women to be hanged, equally with men, but he thinks it doubtful if anybody should be hanged, and is quite sure that it should be done in private if at all.

A MISCARRIAGE of Justice. Another terrible example of the punishment of the innocent is reported. In Wisconsin two boys have been in jail for three years for committing robbery and murder.

A State Geological Survey.

Attention is directed to the article of Professor Hicks of the State University published in another column under the heading "Shall We Have a Geological Survey of Nebraska?" It is a first sensible and practical suggestion on this subject which has ever appeared in print in this state and is respectfully commended to the legislature now in session.

The BEE will willingly and heartily promote this proposition. It is liberal, broad-gauge and if secured will give to Nebraska a series of investigations into her material resources which will be of estimable value.

A Checky Performance. The call for a meeting at St. Joe of representatives of various boards of trade in the Missouri valley to secure representation on the inter-state commerce commission is a checky performance.

THE Crawfords Bill. If our national state department had at its head a statesman of ordinary caliber in the person of a man of vigor and energy like the late General Crawford...

REPUBLICAN POLITICS. The people of Canada are having plenty to think about at this time. Besides the very interesting and important question of their probable future relations with the United States they are engaged in a very earnest campaign.

Canadian Politics. The people of Canada are having plenty to think about at this time. Besides the very interesting and important question of their probable future relations with the United States they are engaged in a very earnest campaign.

Representative Nicol, of Neligh, recorded a lively and original speech in his address at the Nebraska National Convention. A large delegation of his constituents met him at the train and treated him to a shower of groans and hisses, and remarks on his conduct as emphatic as were

complimentary. He denied that he pledged himself to Van Wyck.

The Holdridge Republican pronounces the Omaha coal find an unparalleled, inexcusable fabrication. It is proper to emphasize the fact right at the beginning of this natural gas and struck an inextinguishable vein.

The Plattsmouth Journal is giving daily castigation to a clique of politicians who live and thrive and prosper on the backs of the B. & M. and who oppose the interests of the city when the company demands it.

A Lincoln paper has made the astounding discovery that the railroad commission has built a stock yard fence, induced a railroad company to purchase a lot of natural gas and a pasture, and fixed a pump handle at a station up the country.

Charles Conley, of Wabash, painted the Great Western Standard of Oil, and proclaimed himself monarch of the town. The billiard hall of Charles Schneider was particularly offensive to his royal dignity and he proceeded to wipe it out with a broom.

William Summerville, of Burlington, has been elected to the Iowa State office of agriculture at every presidential election from Jackson to Cleveland.

The prohibition regulators of Sioux City stoop to low, unmanly methods to secure evidence against liquor sellers. Last week D. W. Wood, county attorney, ordered a number of \$50 to a sixteen-year-old boy to visit saloons, purchase liquor, and turn informer.

A large section of country south of the Platte river, says a Grand Island paper, is blighting the life of the nose of our esteemed contemporary.

Real Estate Transfers. Seal estate transfers filed Jan. 28, 1887. Jeremiah C. Wilcox to the public, plat 2, bk 2, p. 10. Fred R. Case to J. E. Carson, plat 1, bk 2, p. 10.

GEOLOGICAL SURVEY.

It is supposed by many persons that we have had a survey already, that the United States geologists have done the work and published the results years ago. This is a mistake. Hayden, it is true, examined the strata of the eastern counties, and Meek studied the fossils found along the Missouri river, but no complete survey of Nebraska has ever been made.

The information furnished by a geological survey would be a valuable aid and aid to the enterprise of our own citizens. All the wealth of the state is extracted directly or indirectly from the earth. To make a careful study of this ultimate source of all our wealth is certainly a reasonable thing to do.

It is a geological survey that we need in this state. A geological survey would be a valuable aid and aid to the enterprise of our own citizens. All the wealth of the state is extracted directly or indirectly from the earth.

It is a geological survey that we need in this state. A geological survey would be a valuable aid and aid to the enterprise of our own citizens. All the wealth of the state is extracted directly or indirectly from the earth.

It is a geological survey that we need in this state. A geological survey would be a valuable aid and aid to the enterprise of our own citizens. All the wealth of the state is extracted directly or indirectly from the earth.

It is a geological survey that we need in this state. A geological survey would be a valuable aid and aid to the enterprise of our own citizens. All the wealth of the state is extracted directly or indirectly from the earth.

It continues to be the most popular book in the world. It contains more merriment than any other book, and it is a masterpiece in every sense of the word, and awakens intense admiration with all, while it produces hearty laughter.

Several other states are making arrangements for co-operation with the geological survey. The government geologists cannot enter all the states at once, hence the importance of prompt action in accepting this remarkable opportunity.

It is a geological survey that we need in this state. A geological survey would be a valuable aid and aid to the enterprise of our own citizens. All the wealth of the state is extracted directly or indirectly from the earth.

It is a geological survey that we need in this state. A geological survey would be a valuable aid and aid to the enterprise of our own citizens. All the wealth of the state is extracted directly or indirectly from the earth.

It is a geological survey that we need in this state. A geological survey would be a valuable aid and aid to the enterprise of our own citizens. All the wealth of the state is extracted directly or indirectly from the earth.

HISTORY RECORDED ON COINS.

Washington Star: "The United States" observed the coin man, after looking over rows of coppers, "ought to issue every time a new president is inaugurated a special coin, of which the obverse struck a finely engraved head of the president and a suitable inscription. The issue might be limited, of course. Why? Because history is recorded on coins."

It is a geological survey that we need in this state. A geological survey would be a valuable aid and aid to the enterprise of our own citizens. All the wealth of the state is extracted directly or indirectly from the earth.

It is a geological survey that we need in this state. A geological survey would be a valuable aid and aid to the enterprise of our own citizens. All the wealth of the state is extracted directly or indirectly from the earth.
