#### EIGHT MORE DAYS OF AGONY

Only a Short Time For the Legislature to Transact Much Business.

A HURRIED WIND-UP PROBABLE.

Armour Makes a Significant Purchase of Land in West Lincoln-Swift, of Chicago, Views the Situation-Lincoln News.

IFROM THE BEE'S LINCOLN BUREAU. There remains yet eight days of the legislative session before the members and the people enter into rest and the lobbyists go hence to return no more for two years to come. Despite the fact that the session has been extended to sixty days there are less than two dozen bills at the present time that have become laws, and the prospects are that the usual hurry and skurry to push bills through in the closing days will be repeated again the present session. Of the appropriation bills many are hanging on the ragged edge of despair and great efforts will be made the coming week to reinstate in the affections of an adverse majority some of these bills that have heretofore been pounded into the earth, metaphorically speaking. This will be true of the Norfolk asylum bill and the live stock commission bill, the latter of which was sadly mutilated in the senate under the direct efforts of Brown, of Clay. In this measure there is some diversity of opinion, but the great majority seem to be satisfied with the work of the commis-

sion and recognize the needs existing for a continuation of work in the interest of the stock interests of the state. With cattle disease raging in many of the eastern states, the necessity for a continuation of strict quarantine measures is fully recognized. strict quarantine measures is fully recog-nized and the paving process in the sani-tary commission bill indulged in by the senate is not liable to meet with accept-ance when the bill with its senate amend-ments comes before the house. It is ex-pected to-day that the bill authorizing the sale of the Saline lands adjoining the city on the west to the Nebraska stock city on the west to the Nebraska stock yards company will again be up in the house, and the report of the special committee appointed to investigate the proposed sale will be watched with a great deal of interest. In the senate work will be resumed to-day, after a three days' rest and recreation. Lieutenant Governor Shedd, who has been absent in the ernor Shedd, who has been absent in the east with his wife, is at home again and presumably will grace the senate chamber with his presence. In this branch work is apparently ahead of the house, but from present indications this body will hold night sessions as well as the house the coming week, and the same rush and burry of bills will characterize its closing hours as in previous sessions. its closing hours as in previous sessions. But at best the agony will soon be passed IS ARMOUR COMING?

The BEE has it to announce to the citi-

zens of Lincoln and all directly interested in its material advancement that Armour, in its material advancement that Armour, the packing house king of Chicago, has had a representative in this city the past week, and as a result of this visit this representative of Armour has purchased in the immediate vicinity of the West Lincoln industries an eighty-acre tract of ground and an adjoining plat numbering some thirty-two acres. It is true these deeds are not as yet on record, but it was some thirty-two acres. It is true these deeds are not as yet on record, but it was the privilege of a Bre representative to see one of these deeds, and the gentleman making the purchase for the Armour company can but admit of the fact of the purchase. The most important question that has faced Lincoln the present year is the fact of this purchase, and everyone will at once ask if this means that Armour is coming to Lincoln to locate a packing house. The answer will come in the fact that no other possible reason could be named if it did not mean a consummation of this character. It has been be named if it did not mean a consummation of this character. It has been known to a few for some months past that active and energetic measures have been advocated and put in motion looking toward the securing of institutions of this character, and there are none who are at all acquainted with the city but recognize the fact that on the securing of such practical industries rests the future of the city and the solution of the boom that at the present time and for the first time is calling capital to Lincoln for investment. Lincoln is already a railroad center, with lines radiating in every direction to the richest stock producing sections in the state. Those lines, too, are constantly being extended, until the future of the city as a railroad center is assured. A prominent citizen center is assured. A prominent citizen who, in the discussion of the city's fu-

center is assured. A prominent citizen who, in the discussion of the city's future, remarked to an eastern man that Lincoln was capable of calling in more products in every tweniy-tour hours than any town in the west, was not far off in his statement, as capitalists are beginning to learn. Another citizen, in discussing the future of the capital city as a receiving and distributing point, was not slow in pointing out the fact that the inter-state commerce law once in operation would point the solution of the discriminations that have existed in the past and cause capitalists to seek Lincoln instead of Lincoln seeking capital.

WHY NOT BREF PACKING?

The Bre also is in position to announce that Mr. Swift, one of the greatest beef packers in the country, has been in Lincoln the past few days viewing the city and its prospects while on a tour of general inspection in this western country. Mr. Swift has lately been viewing Omaha and its prospects and promises a critical and careful examination, and on the occasion of his visit to that place the papers of the city announced his business as seeking a location for an establishment of the kind in which he invests his capital. That the gentleman is visiting Lincoln with a view of investing may not be generally known, but such is the fact, and it undoubtedly would have its influence if the city put forth its best efforts to show what could be done in Lincoln and what the city in turn would do itself to foster institutions of this kind. What would be true and in favor of pork packing establishments would be true of others of a like charactor, and that Lincoln is attracting capitalists who seek such business openings argues more for the future than the staking of town lots out to remote districts in the surrounding country.

The Missouri pacific.

THE MISSOURI PACIFIC.

An official of this corporation, who made a hurried visit to Lincoln the past week, in an interview remarked that in all probability that company would do no inconsiderable amount of building in Nahraka the company was a second of the company was a second of

all probability that company would do no inconsiderable amount of building in Nebraska the coming year, and that Lincoln would be at least the terminal point for one of its new lines. No company occupying territory and lines in the state is making more preparations for new work in the purchase and contracts for supplies than the Missouri Pacific, and the purchases are not considered by those who know necessary simply for repairs. This company is undoubtedly preparing to move into the rich fields in this state, with Lincoln as its starting point.

ABOUT THE CITY.

There has been no published report as yet regarding the resources of the county poor farm for the year past and gone, and the public remains in the dark as to the kind and character of farming that is done at that, place. It is stated that the average number of inmates at the farm the last year was twenty-tour, and the fact arises to the surface at once that a farm of 160 acres, highly cultivated, stocked with horses, cattle, hogs, machinery and all the ot certas, with the superintendent and all help on a salary, ought to produce enough in a year to

keep the twenty-four without cost. The record, as heretofore published, shows that grocery bills, clothing bills, medicine bills and so on down the long lists have all been paid in cash by the county. With such a showing of expense the annual estimate asking some \$10,000 to maintain the poor and poor farm for the present year comes with wretched grace from the board of county commissioners. The district court Saturday heard and decided the case of the state against brank Skinner, one of the cases tried in the autumn term that went over through a disagreement of the jury. It will be remembered that young Skinner, who lives near Raymond, was charged with an indecent assault upon some little girl,

an indecent assault upon some little girl, and in this trial he was found guilty. The sentence of the court was a light one,

thirty days in the county jail. It is stated on authority that H. C. Rus-It is stated on authority that H. C. Russell, the new department commander of the G. A. R. in Nebraska, has made the following staff officer appointments for the current year: J. D. Miles, Schuyler, adjutant; L. M. Scothorn, Lincoln, quartermaster general; T. S. Clarkson, Omaha, senior aid-de-camp; B. F. Rowalt. Hastings, chief mustering officer. The appointment of judge advocate general remains yet to be announced, although it is thought D. C. Calkins, of Kearney, will fill the position.

will fill the position.

Among the latest announcements of Among the latest announcements of suburban towns is that one will be laid out on some of the ground purchased by A. E. Touzslin near the Capital mills and that it will be known as Touzslin Place. This plat will be crossed by both the B. & M. railroad and the Fremont, Eikhorn & Missouri Valley railway and the additional announcement is furnished that each of the two roads will build

that each of the two roads will build depots on the town site.

Hon. L. L. Mills, the prominent Chicago attorney, is in the city and will be an attendant in district court the coming week as attorney for the Chicago lumber company against Stewart and Chute, of which much has heretofore been written. The cases if tried promises to be of more than ordinary interest.

The Daily State Journal issued a twenty four norm paper yesterday illustration.

twenty-four page paper yesterday, illustrating both the progress of the city of Lincoln and the paper itself. The Journal has just put in a new Webb perfecting press, following the example of the

Omaha dailies in this line.

A divorce in high life in Lincoln is impending, one in which the facts have been kept scrupulously guarded from the public and thus far from the courts.

The great popularity and success of Salvation Oil, the great pain-destroyer, have made it a target for counterfeiters. Buy the genuine. Price 25 cts.

"Died of ammonia, poor fellow," said Mrs. Partington, on learning of a friend's death from pneumonia. "I believe I should have died, too, but for D. Bull's Cough Stirrup." Dr. Bull's Cough Syrup she meant, of course."

A senator at Albany has introduced a bill imposing a tax of \$20 on incomes of \$3,000, with an increasing ratio until half of an income of \$100,000 goes to the state.

There are many cheap cosmetics of fered for sale, which claim to contain nothing injurious to the skin. This is all bosh, all, or very nearly all are compounded from the most deleterious and poisonous drugs in the materia medica. They destroy the vitality of the skin, making the consumer prematurely withered and old. J. A. Pozzoni guarantees ered and old. J. A. Pozzoni guarantees his medicated complexion powder en-tirely free from all injurious matter, and will gladly pay \$500 to any practical chemist who can find upon analysis the slightest trace of white lead orarsenic. Use none other and you will never regret. Price 50 cents and \$1.00 per box. Sold by all druggists and perfumers.

A Dubuque, prohibition Iowa, undertaker recently ordered stock from a Michigan coffin manufactory, and added this postscript to the order: "Put in one of the caskets a gallon of Old Crow whisky, and bill as embalming fluid."

The blood must be pure, if the body ld be in perfect condition. McLean's Strengthening Cordial and Blood Purifier makes pure blood, and imparts the rich bloom of health and vigor to the whole body.

North Anson, Me., reports that thus far this winter has been the coldest in twenty-six years. There have been seventy-five snow storms, and an average depth of four and one-half feet of snow covers the ground in the vicinity of the

Prevention Better Than a Cure. Many persons are afflicted with skin eruptions, boils or ulcers. Brandreth's PILLS taken freely will in a short time effect a complete cure of all such troubles. Ulcers of long standing have been cured by them. Carbuncles have been checked in their incipency by them. The worst fever sores, bed sores, and the like have been driven from the skin by them.
Only begin in time and a few of BRANDRETH'S PILLS will prevent many a sickness. Taken freely they will cure any

The value of the cotton plant, great as it is acknowledged by all to be, seems to have the possibility of being increased, since it has lately been discovered that the bark of the root contains what promises to be an available coloring matter.

A land slide in the mountains above Chico, Cala., the other day, laid bare broad streaks of white quartz, which carries, apparently, a very large percentage

The daffodil is the flower of fashion at this season in London. Florists' windows are filled with yellow masses of the reigning favorite, and huge corsage bouquets gleam from afar through fog and smoke.

"Little, but Oh My." Dr. Pierce's "Pleasant Purgative Pellets" are scarcely larger than mustard seeds, but they have no equal as a cathartic. In all disorders of the liver, stomach and bowels they act like a charm. Purely vegetable, sugar-coated, and inclosed in glass vials. Pleasant, safe and sure. By druggists.

The Shelley club is the latest literary craze in London. Students may divert their thoughts for the time from the incomprehensible Browning to follow the smoother verse of the earlier poet.

C. V. Baxter, an experienced and successful druggist at DeWitt, Iowa, says one family there created an immense sale for Chamberlain's Cough Remedy, by using it and recommending it to their neighbors, during their seige of whooping cough, now it sells rapidly on its merits, it has no equal for coughs, colds and croup. and croup.

A Nyack, N. Y., woman opened her husband's mail and discovered that he had another wife living at Newark, N. J. Each was previously ignorant of the other's existence.

"Chamberlain's Cough Remedy gives good satisfaction."—The above was written by Geo. K. Mills, Druggist, Hazel Green, Wis.

Tony Barrios and young Zarala, of Guatemaia, are classmates at West Point. Zarala, sr., is the man who overthrew and caused the death of President

Farmers who raise turkey in Lehigh county, Pa., drive them to market as they would sheep. Sometimes flocks of 200 are thus driven along the public roads.

#### FIELD AND FARM.

The Health of Swine.

Philadelphia Record: Cholera and lung complaints are diseases that were comparatively unknown a quarter of a century back, and the typhoid fever is now said to be another disease with swine. The epidemic diseases have baffled the efforts of the best veterinary surgeons in this country, and until more light shall be thrown on the cause and cure of the diseases, and especially of cholera, the farmers can only use prevention. While the cholera disease may as yet be beyond medical skill, there are those who attribute the cause to the lack of vigor in swine as compared with the stock of former years.

We have bred the hog to conform to our own desires. We have taken away his activity and changed him to a clumsy, corpulent mass. From the pure water of the streams, the fresh air of the forests and the varied food secured by forests and the varied food secured by exertion we have removed him, substituting fifthy slop for drink, ditry sties and a continued diet of grain. Added to these disadvantages he is closely inbred, and grows up in life under artificial conditions that are not always favorable. Those who make hog-raising a specialty well know that the short snouts, dish faces, fine bone, short legs, heavy bodies and the rough hair bred away, as is the case with some of the pure breeds, has changed the present porker to a different. changed the present porker to a different creature from the one that grazes in the forests and feeds on mast.

forests and feeds on mast.

As corn is a staple crop it is usually made a staple food for hogs. When closed in pens but very little clean, fresh water is given them. If turned on the growing clover they are "ringed" in order to prevent rooting. What is necessary to prevent the epidemic diseases in herds is to give the hogs the same attention that is bestowed on all other classes. nerds is to give the hogs the same atten-tion that is bestowed on all other classes of stock. Because "anything will do for a hog," as is supposed, is no reason for confining the animal to a single dict or withholding green food and that which affords a variety. The hog is not natur-ally a filthy animal, and can no more thrive in filth than can the steer, while pure air and water are absolutely nec-essary.

essary.

In-breeding, however, has contributed its share to the injury of the hog. Not that the breeding is of the same family, but that the breeds have been bred down too fine in order to secure exterior points, thus destroying vigor. No doubt that by crossing the breeds on the farm, by using mails of different breeds every year, much of the difficulty may be avoided, but as long as farmers have their preferences of color they will be slow to make radical changes in breeding, and yet it can be done without detriment to the best qualities of hogs. best qualities of hogs.

How to Treat Small Fruits. Work among the strawberries, rasp-berries and blackberries must begin berries and blackberries must begin early. The mulch may be removed from strawberries now, and as soon as the frost is out of the ground a bag of superphosphate and one of muriate of potash should be scattered along the rows, and the hoe used, but in so doing it should be to only lightly chop in the fertilizer and not to disturb the roots, which work also cleans the ground around the plants. Fresh clean mulch may be applied after the plants are in blosson, in order to retain moisture during the warm days, and to protect the berries from dirt. Young plants, intended for a new bed, should be set out early, so as to get the benefit be set out early, so as to get the benefit of the spring rains. If put out late, and the season becomes dry, many of them will perish. In preparing the new bed plow the soil deeply, scatter fine, well-decomposed manure over the ground and harrow the surface several times, so as to have the soil in as fine condition as pos-

All the old canes of blackberries and raspberries that have not been removed before now should be cut out and the before now should be cut out and the young plants worked as early as can be done. Manure is a great factor in producing heavy crops, but as fruit-growing and stock-raising are two different pursuits enough manure cannot always be maintained for a large field; but an excellent fertilizer can be made by mixing 200 pounds superphosphate, 300 pounds kainit and 200 pounds ground fish, using a good handful around each plant early in the season and again applying another in the season and again applying another handful after giving the final cultivation to the crop. Grass and weeds must under no consideration be allowed to grow be ween the rows.

Grapes should be trimmed now and the vineyard well cultivated both ways. As a precaution against rot dissolve a pound each of sulphate of copper and copperas in four gallons of boiling water. Then add four gallons more in three or four hours after, and while the solution is warm use it for slaking freshly burned tone lime, getting the lime into as fine stone lime, getting the lime into as line condition as can be done. Scatter the lime around the vines, covering the ground well and dust the vines also. When the vines are in full leaf give a light dusting over them again. If this does not prevent rot entirely it will greatly assist in reducing its ravages, and by repeating the application for two or three seasons the disease may be eradicated.

Quite a large amount of early lettuce may be grown by sowing the seed in a cold frame, and then thinning out the plants while they are very small.

Run the roller over the wheat field as soon as the frost is out of the ground. After the soil is dry harrow the field with

Grass seed is not easily killed, and for that reason may be sown as early as may be desired. The main object should be to select clean seed.

On light spongy soils it will benefit the horses to allow them to go unshed for a while, especially when they have tender feet.

It is said that a sharp saw used on small bundles of cornstalks is a conven-ient mode of cutting them into short

Parsnips, carrots and other roots that are stored in the ground in mounds phould be taken up and placed in a cool slace in the cellar. If the soil be moist and the ground become warm they are liable to grow, which injures them. Divide your rhubarb plants at the roots

and make a new location for them. This should be done very early in the spring or in the fall. Put them on very rich ground with the buds about one or two inches below the surface.

Good implements save labor. The use of an inferior plow during the busy season not only delays operations to a certain extent, but the effects of the poor work done extend to the time when the crop is harvested. Crude petroleum, thinned down with kerosene oil, is excellent for preserving

tools from rusting.

The cellar should be protected as much as possible from cold draughts, dampness or sudden changes. A temperature as nearly uniform as possible, and neither too warm nor too cold, is best.

Sorghum seed is excellent for poultry, and as it thrives well on sandy soil it may be grown for poultry food, not as a general crop, but to supply a small proportion to feed as a variety,

It is claimed that by always selecting seed potatoes from the most prolific hills in a field the increase of yield will be annually greater. It is an experiment worthy of trial.

A sign of swarming is the building of queen cells in the hive. After the bees begin work on them the chances are that the hive will swarm in about a week

the manure heap. They will not only add to the value of the manure, but assist in preventing the escape of amonia.

As the warm weather comes on avoid feeding too much corn to the hens, as it causes them to become too fat, thereby interfering with egg production. Sulphur and old tobacco leaves burned in the poultry-house, the house being closed perfectly tight, will clean out the red lice.

A writer in Gardening Illustrated says he has found sulphide of potassium an efficient remedy for mildew on the straw-

A contemporary suggests that a cow can be easily led by the halter which commands her nose, but with difficulty by a rope around the horns.

As a sow's litters improve in size and

quality as the dam becomes older, and their milk usually increases, it is better to keep old sows for breeding than to fatten them for pork.

The more rapidly air is brought into contact with eider the faster the latter will be changed to vinegar. Draw out a little eider daily and return it to the bar-

PRIOR TO THE PROPERTY OF THE PRIOR TO THE PRIOR THE PRIOR THE PRIOR TO THE PRIOR TH

TO THE PUBLIC-

With the approach of spring and the increased interest manifested in real estate matters, I am more than ever consulted by intending purchasers as to favorable opportunities for investment, and to all such would say:

When putting any Property on the market, and advertising it as desirable, I have invariably confined myself to a plain unvarnished statement of facts, never indulging in vague promises for the future, and the result in every case has been that the expectations of purchasers were more than realized. I can refer with pleasure to Albright's Annex and Baker Place, as sample illustrations.

Lots in the "Annex" have quadrupled in value and are still advancing, while a street car line is already building past Baker Place, adding hundreds of dollars to the value of every lot.

Albright's Choice was selected by me with the greatest care after a thorough study and with the full knowledge of its value, and I can conscientiously say to those seeking a safe and profitable investment that

# Albright's Choice

offers chances not excelled in this market for a sure thing.

Early investors have already reaped large profits in CASH, and with the many important improvements contemplated. some of which are now under way, every lot in this splendid addition will prove a bonanza to first buyers.

Further information, plats and prices, will be cheerfully furnished. Buggies ready at all times to show property.

Respectfully,

## W. G. ALBRIGHT
