### SPORTING NOTES.

A Match Between Edwards and Moth-Other Matters.

Several local sporting men are very much interested in securing a match between Charles Moth, who calls himself the Græco-Roman champion of the west, and Elliott Edwards, the colored wrestler. The latter is a good man, and though Moth is a much bigger and heavier man than he is, there is but little doubt but that he is afraid of the colored man. At least all efforts that have been man. At least all efforts that have been made to bring Moth to a match have been fruitless. Edwards is very anxious for a bout with Moth, and can raise the money for a good back-ing. Moth, however, has made various childish excuses to get out of the match. "The plain truth of the matter is," said a sporting man yesterday, "Moth is a sure-thing man, and don't like to go into a match unless he is sure of winning. To show that he is afraid of Edwards, I will cite the fact that when the match beshow that he is afraid of Edwards, I will cite the fact that when the match be-tween the two men was made at South Omaha, Rothery, Moth's backer, agreed to put up the money, which Moth could not raise. Moth took him aside and told him confidentially that he hadn't better risk the money, as he (Moth) was afraid that Edwards would down him. Another thing—I wouldn't be at all surprised if Moth at the last moment would back out of his match with McLaughlin. There is no earthly doubt but that he is afraid of the doughty colonel." Jerome Pentzel to-day received a letter from William Coots, who is now in Chi-cago. Coots writes that he has settled down to hard work and is now training for a race in Jackson, Mich., with a local foot runner, for stakes of \$100 a side. The Omaha base ball boys play three games with the Des Moines club this week, and left to-day for the Iowa cap-ital.

### Aerial Cables. .

A force of men is daily engaged in connecting the multitudinous telephone wires with the patent cables, which the telephone company intends to run into its office at the corner of Harney and Fifteenth streets. The longest cable extends to the corner of Sixteenth and Dodge streets where it connects with the wires from the west These cables are about the diameter of a Tubber hose, and contain 102 wires. They will save a great deal of space and afford but little impediment to firemen in cases of fire in the buildings in the front of which they are strung.

The pursuer was Mr. Cole and the pursued was J. L. Rice. A dispute over business matters led Cole to call Rice a dead beat and the latter responded that the former was a descendant of Ananias. Thereupon Cole smote him hip and thigh and threw him out of the office. Rice retaliated by throwing a block of wood at Cole. The war is still on, though a temporary truce prevails,

# EARLY SACRIFICE.

A large eastern manufacturer, in order to close out a line of nearly 1,000 Spring Overcoats, made us an offer at a figure so low as to scarcely cover cost of the material in the garments. We bought the entire lot in addition to our enormous regular stock of these goods on hand. We had grave doubts as to whether we could dispose of such a quantity of Spring Overcoats in time to accommodate our Summer Goods. In order to dispose of them, immediately, we marked down the price of every spring Overcoat in the house, to such unheard of prices as to force sales. The sweeping reductions on these from our former prices are as follows:

A line of Hancock Cassimere Overcoats, from \$7.50 to \$4.90 Grey with silk Grey from \$11.00 to \$8.50 - \$13.00 to \$9.75 facing, A line of all wool Meltons, from A line of English Homespun cloth, a nobby style, with satin sleeve-linings, from - \$13.75 to \$10.50 We have also reduced our finest imported Meltons. This Over coat is silk lined all through and the sleeves with satin, from former price which was exceedingly low at \$14.75 to \$12.75 In making the above announcement, we beg to sav that every garment is made up from the latest styled fabrics and manu-

factured for this spring season exclusively.

### HE DIDN'T SUCCEED.

A Violin Repairer Tries & Novel Scheme of Bulldozing.

Justice Anderson rendered a decision yesterday morning in a novel case, the suit of William Wallace of the Omaha National bank against the American Express company. It appears that Mr. Wallace shipped to a dealer in New York city, a valuable violin (belonging to his daugh ter) which needed some repairs. The dealer, it seems, had a bill against some Omaha party, for \$131.50, which he de-spaired of collecting. He accordingly tried to bulldoze Mr. Wallace into collecting the bill by notifying him that as soon as the amount was forwarded, the violin would be sent on. Mr. Wallace at violin would be sent on. Mr. Wallace at once threatened to commence a suit fin New York against the fellow, who then shipped the violin to Omaha by the American Ex-press company, which corporation he in-structed to collect \$131.50 before turning over the instrument. When the violin reached Omaha, Mr. Wallace was notified that \$131.50 was due on it. He refused that \$131.50 was due on it. He refused to pay but commenced a suit in replevin against the express company to recover the violin. Judge Anderson this morn-ing decided the case in his favor.

### A BRIDGE IN TROUBLE.

The Union Pacific Unable to Use its Viaduct at South Thirteenth St.

The Union Pacific has erected its new bridge over Thirteenth street, and has apparently been ready for use for some time. But the company, for very good reasons, has decided not to use it, at least for the present, and it is not at all improbable that it will have to be condemned. The bridge is an iron one, consisting of two girders extending across the street, supported, however, at the curbs with four iron columns. It resembles the old bridge in general appearance. Since it was completed, about a month ago, it has bridge in general appearance. Since it was completed, about a month ago, it has been found to be entirely unsuited to the business required of it. It was designed as a straight bridge, upon which was to run a straight bridge, upon which was to run a straight track. The track, how-ever, at this place curves, and a segment of the curve is upon the bridge. There are two tracks, and when rolling stock is moving over them, going in either direction, an undue pro-portion of the weight, increased by the momentum is imposed upon one girder. This being almost constant, it would soon result disastrously. Yet the discovery of the mistake was not made until several trains had run across. There is still another defect and that is the same time, there is searcely room for a human being to stand between them. The uprights, therewith, are also found to have been poorly based. The bridge was built by the Morse Bridge company, of Youngstown, O., and the fault lay in he poor engineering which has been aid at the door of the late management

on the part of the Northwestern to dis-tract the attention of the people from the Chicago, Milwaukee & St. Paul.

white spools.

To the Editor of the BEE: Will you please deny the story in the Republican to the effect that Mrs. Davis' salary was secured by note. The facts are that about three years ago, acting as the New York agent for certain musical societies in the south, I contracted with W. J. Davis for his Chicago Ideal Opera company to visit certain southern cities under the auspices of these societies. In the meantime the hall of the Mozart society of Memphis burned and as this society was the prime mover in the plan, thus left without a home, it permitted the undertaking to fall through. Much loss was occas-ioned to several reputable artists and also to Mr. Davis. I personally reimbursed all those who had been led into contracts through my advice, and the transaction mentioned in the Republican refers to a final settlement in this matter, and has nothing whatever to do with matters of the National Opera com-

pany. I cannot too severely express my con-demnation of the breech of confidence of which the Republican's informant must be guilty, to say nothing of the false interpretation placed upon the mattler. Very truly, CHARLES E. LOCKE.
