PROM THE BER'S LINCOLN BUREAU. There was more excitement in Lincoln yesterday over railroad matters than there has been for years before. Representatives of the Atchison, Topeka & Santa Fe were in the city, but they as faithfully as possible preserved their incog and not more than three or four of the more favored had an audience with them, and none at all scarcely knew of their presence. The chief engineer of the Missouri Pacific was also in the city, going west to Crete at noon to hold a consultation with other officials of the road and the Nebraska man who is largely the company's representative in their movements in the state. The fact that the Missouri Pacific is establishing a grading camp at Roca, that branch from the main line has every appearance of being the coming line of the Missouri Pacific through central Nebraska. While this road is now under construction the company is invading Nebraska from the town of Warwick on their Kansas division northward to Hastings. On their western extension 100 miles of the grading has already been placed under contract. From undoubted good authority it is also learned that the Missouri Pacific is to build directly west from Crete through the heart of Saline, Fillmore and Clay counties to a connection with this line from Warwick, Kan., some twelve or lifteen miles south of Lincoin, and that work has actually com-menced on the Missouri Pacific's new line located from Talmadge, Otoe county, to Crete in Saline county, could not but leave the impression that the Missouri Pacific was not going to build out of Lin-coln, but would leave the branch to this city as it is. This new line, located between the two above mentioned points, goes directly through one of the richest agricultural districts in the state, a terriagricultural districts in the state, a territory that has heretofore been wholly controlled by the Burlington lines radiating from Lincoln, and is severed in twain by this new and independent line of the Missouri Facilic to Hastings, touching at the towns of Geneva and Clay Center. This again will cut right and left into heretofore solid Burlington territory and is the best possible evidence that the Missouri Pacific is striking with vigor and is the best possible evidence that the Missouri Pacific is striking with vigor and well laid plans at its formidable rival that has for years been in undisputed possession of the South Platte country. In the mean time the Northwestern is not idle and General Manager Fitch is expected in Lincoln to-day. The impression remains in railroad circles that Lincoln is in the grip of the Burlington road and the official organ of the B. & M. that is for that first and Lincoln afterward undoubtedly explains why the Missouri Pacific is leaving Lincoln on a branch and running a main line twelve miles to one side of the ang Lincoln on a branch and running a main line twelve miles to one side of the city, and why the Northwestern seems content to let its line end here and branch west, north of the city. One of the best posted railroad men in the west recently remarked while in the city that above any other the needs of the city were to bury the belief that the B. & M. owned Lincoln if it were necessary for the city that a power of the city that the second second

the citizens to put in a paper of their own to fight the battle. The sait well had reached a depth on Saturday last of 1,817 feet. Nothing new has been discovered, and 187 feet further will complete the present con-tract of 2,000 feet. The board of public lands and buildings are anxious to con-tinue downwards another 1,000 feet, believing that the abandonment of the ex-periment at the present depth would be ilt-timed and that another 1,000 feet, even if it did not develop salt or valua-ble mineral, would at least be an index of what was under the surface, and would have its influence on private enterprises. The auditor does not see his way clear for paying warrants further, and if the well is continued a case will have to be made for the supreme court to decide whether the auditor under the law can continue payment for some time yet to come. The recent specimens taken from the well are not indicative of sait, but come nearer formations found in coal vicinities. The plans and details for the new blind

asylum building at Nebraska City were spread at the office of the land commis-sioner yesterday, where parties contemplating bidding on the work were examining them. The plans are the work of C. F. Driscoll, of Omaha,

Evidence of the value of Allcock's Porous Plasters comes in the following letter from Charles Yeager, of Company A, 11th U, S. infantry, stationed at Fort Sully, Dakota:

I have been using Allcock's Porous Plasters for the last ten years, and feel quite lost if I have not half a dozen in my possession. In this section of the country we have at times very severe cold. When the thermometor is below zero, I find that an Allcock's Porous Plaster on the pit of the stomach is invaluable. They appear not only to warm the body, but to invigorate the digestion. At times I have been greatly troubled with a lame back. Two Allcock's Porous Plasters placed upon the spine invariably cure me in two or three days. Sometimes I have had a severe cough Sometimes I have had a severe cough and very bad cold. An ALLCOCK's Porous Plaster placed around the throat and on the chest, and one between the shoulder blades, have invariably afforded me immediate relief and a quick cure.
