METROPOLITAN CABLE A SURE THING

No Push-ee! No Pull-ee! Go Like Lightning All-e-Same-e.

The Franchise Granted Almost Unanimously. And Material is now being purchased in New York. They mean Business, and will build a mile a month. If nothing happens, the Metropolitan will, after all the cable talk in Omaha, be the first company to operate a cable in the city.

WORK HAS ALREADY COMMENCED.

Omaha, Nebraska, June 16, 1887.

Omaha has had a great deal of talk about cable lines and cable companies until the people are tired, and it is a standing joke that every man that owns a lot between Vinson street and Ames Avenue, thinks the cable will pass his lot, and now it is as hard to get people to believe a new cable will be built as for them to believe that coal has been found under Omaha...

NOW JUST COMPARE

A cable line with a horse line and consider that you can go to Carthage on a cable line in just one fourth the time that it takes to go to Hanscom Park on a horse line. Then think that \$750 will buy one of these lots. Not in a hole or on a hill, but a nice smooth lot, that is sure—yes, doubly sure—to bring \$2,000 in a year.

W. L. SELBY,

Successor to Rush & Selby, 1521 Farnam Street.

The Skeptic will wait until the road is built and pay \$2,000 for a lot. The wise man will buy now at \$750. Patrick Land.
