# INDIFFERENT BANKERS. Washington Financiers Not Worry

# ing Over the Situation.

WASHINGTON, Sept. 22.-|Special Telegram to the BEE].-There is so little busi-ness done in the banks in Washington, aside from the ordinary banking affairs of a noncommercial city, that the bankers have no views of value to express upon the financial situation and the means which the acting secretary of the treasury has adopted to relieve the stringency of the money market. The city is practically deserted and consequently there are none here who have given the financial problem sufficient study to warrant them in expressing an opinion on the subject. The preterring to let events take their course. The action of the secretary in issuing the call is criticized in some circles, as might have been expected, but the general senti-ment seems to be that the action was timely, and that the result will be beneficial to the was purchased to day nearly three-xuarters of a million 4s and 45/s. It is thought that a great many more will be received and pur-chased to-morrow, as there has been scarcely time to hear from New York and other cen-ters where the stringency is supposed to exist to such an extent as to warrant holders in accepting the offer of the department. problem sufficient study to warrant them in

Dangerous Imitation Ourrency.

WASHINGTON, Sept. 22.-[Special Tele-gram to the BEE.]-Since Chief Brooks, of the secret service, ordered the destruction of a great quantity of "business college cur-rency" some weeks ago there have been many complaints of the hardships which that alleged arbitrary action has caused. Brooks to-day pointed out another forcible illustration of the necessity of compelling business tion of the necessity of compelling business colleges to refrain from too close an imita-tion of the United States currency in their moot banks. A western banker a few days since tendered what purported to be a por-tion of a five-dollar bill for redemption at the treasury department. The bill, when ex-amined, was found to be a frazment of the currency used by Eastman Bros', business college at Poughkeepsie, N. Y. When banks are misled it would certainly indicate a very close initation or a very cardless banker. se imitation or a very careless banker.

Yesterday's Bond Purchase.

WASHINGTON, Sept. 22 .- The total of today's purchase of bonds by the treasury was \$3,494,000, including \$694,700 434 and \$2,800,-000 4 per cents. Taking into consideration the fact that the circular was issued to-day only, the financial officers of the treasury are pleased with the results. It was deemed best not to make public to-day the names of the persons and firms who sold the fonds, and it is probable that this information will not be furnished hereafter.

## What Jordan Thinks.

NEW YORK, Sept. 22.- [Special Telegram to the BRE.]-Ex-Treasurer Jordan says the sotion of the government will afford relief. The issue of the circular means the floating of \$30,000.000 in currency. Most of the bonds taken in will be 4 per cents at 135. The price offered is fair. President Olcott. of the Cen-tral Truet, and prominent bankers think the rovernment's action will have the desired effect.

### A Bank President's Opinion.

NEW YORK, Sept. 22 .- A bank president who has control of millions of money said yesterday that he had just been renewing time loans at 5 and 6 per cent for four and six months and a year. He averred that the scare which has had such grip on the financial and commercial community, is largely the result of manipulation by the biggest money holders, either ranged as speculators on the bear side, or anxious to see such strin-gency produced as will put up the rate for money higher than otherwise they could hone.

A Specimen of British Greed. WASHINGTON, Sept. 23.-[Special Tele-grain to the BEE.]-The Venezuelan dispute with England is before the public again and Venezuela wants the United States to help her. Advices have been received to the effect that the authorities of British Guiana were actively engaged in colonizing the eastern portions of Venezuela. In 1830 the British claimed a portion of the soil on which they are now intruding, and the claim was vigor-

ously disputed by Venezuela. Sir Robert

Porter was sent to look into the matter, and

breast and fired, killing him instantly. One of them is connected with the Mexican customs house, and another is a gendarme for the feast. Young Elias' people are very wealthy, one of his uncles, Juan Elias, own-ing more than half a million acres of land in Sonora.

UNDER ARREST.

### Sensational Failure of a Heavy Iron Merchant in Connecticut. NEW HAVEN, Conn., Sept. 22.-E. Wheeler, the iron merchant who recently

falled, was arrested this noon. The arrest was caused by the Phoenix bank of Hartford, which discounted a note for Wheeler two days before his failure. The matter at what cost. To prevent this twenty prisoner was taken to Hartford where he policemen were stationed on the ground all night and this morning five more were added. Chief of Police Broder gave instructions not was arraigned and the case continued, Wheeler being held in \$5,000 bonds, which were furnished. The failure, which was at the first announced as a temporary suspension, has

turnished. The failure, which was at the first announced as a temporary suspension, has proven to be one of the worst that has happened in this section for years and the impression is spreading that creditors will release but little on their paper. All sorts of ugly stories are afloat concerning Wheeler's manner of raising funds and much wonder is expressed as to where the money has gone. One of the most peculiar features has been the extraordinary secrecy maintained both by Wheeler and the local banks which are such heavy losers. The rumors flying around are to the effect that Wheeler's alleged branch stores were merely figure-heads through which to raise money. Local banks had \$500,000 worth of Wheeler's paper, and it is thought to be merely a local loss. General Merwin, a trustee of the Wheeler company, has been is vestigating affairs in the west, and, is reported, to have written home that the lillnois Barbed Wire fence company, is supposed to have exchanged large blocks of paper with Wheeler. Wheeler's social standing was very high as he was a prominent in church and Sunday school circles. A number of additional warrants it is expected will be issued against him at once.

A French Enthusiast's Scheme to Unite the Angla-Saxon Races.

NEW YORK, Sept. 22.-[Special Telegram to the BEE.]-The arbitration memorial to be presented to the president before many weeks by an English delegation from Westminster is hailed by French enthusiasts as a triumph for civilization. Emile De Lavelleye contends in the Pail Mall Gazette that the creation of a court to which all disputes beween Great Britain and the United States could be referred would avert all danger of war between English speaking nations. He easily proves how important for England It is by a brotherly reunion with America to do

away with any danger threatening her from the west. He reminds Englishmen that in years the United States will a few years the United States will have 100,000,000 inhabitants and be irresist-ible either for attack or for defense, and that their country, if compelled while carrying all the burdens of the empire to fight a western giant, may be reduced to a condition of secondary power, as was the fate of the Netherlands in the eighteenth century. He considers that there are strong hopes of uniting in a vast confederation all the branches of the Anglo-Saxon race, the United Kingdom, Canada, Australia, and New Zealand, and declares that the union would only be complete if the United States were induced to join it, a contingency which he fears cannot be thought of if even possible. He assumes that the United States will never be drawn into a defensive lengue a few

AFTER A SHARPER.

A Wahoo Farmer's Search For a Bad Circus Man.

Fred Andrews, a farmer near Wahoo in company with the sheriff from that city, was in Omaha last evening looking for a sharper supposed to be traveling with Doris & Colvin's show, who had gotten \$56 out of the farmer by a shrewd little game. The show was in Wahoo day before yesterday, and the farmer, in buying tickets for his family, showed a large amount of gold in his purse. The sharper, who was near by looking for just such a sucker, proposed to the just such a sucker, proposed to the granger to exchange greenbacks for the hard money, suggesting that paper was more easily carried than gold. The farmer assented and counted out \$70 in eagles and double eagles. He received in return a roll of bills, which he counted and found to be the proper amount. He was on the point of putting them in his purse when the sharper asked him if he could not take them again and count them to be sure of no mistake. The unsuspected Andrews handed over the roll, and the stranger, after pretending to count them, handed back instead another roll of bills,

informed the police of the affair, but no

trace of the culprit could be found in in Wahoo. The case was intrusted to the officers here last night, but they were unsuccessful in finding their man.

Are You Going East?

The Limited Express of the Michigan Central, "The Niagara Falls Route," which leaves Chicago at 3:10 p. m. every day, is in many respects the favorite train East, on account of its splendid equipment, admirable service and fast time, for which no extra charge is made. It carries superb Wagner Palace Sleep ing Cars, running through without change to Toronto via the Canadian Pacific, to New York via the New York Central & Hudson River, and to Boston via the Boston & Albany railroads. Niagara Falls is passed early in the morning and the train halts several minutes at Falls View, where the scene is unrivalled.

dry, cours in the intervals, bucking in charac-ter, and is usually most troublesome in the morning on rising, or going to bed at night and it may be in the first evidence of the disease ex-tending into the lungs. Sometimes there are fits of coughing induced by the tough mucus so violent as to cause vom-ling. Later on the mucus that is raised, is found to contain small particles of yellow mat-ter, which indicates that the small tubes in the lungs are now affected. With this there are often streaks of blood mixed with the mucus. In some cases the patient becomes very pale, has fever, and expectorates before any cough appears.

In some cases smal imasses of cheesy sub-stance are spit up, which, when pressed be-tween the fingers, emit a bad odor. In other cases, particles of a hard, chalky nature are spit up. The raising of cheesy or chalky lumps indicate serious mishief at work in the lungs.
