writes a very touching letter in regard to his situation:

To My Council Bluffs Friends (that is, if I have any): I happened to come across a paper by which I learn that Dr. Cross is moving to get the state of Iowa to give him damages on account of his having been imprisoned and sentenced to be hung, and afterwards declared not guilty. I am glad to learn that there is fair prospect of his being given his claim. He ought to get at least \$500,000. I wouldn't want to go through such an experience as that for haif that amount, and the doctor is twice as good a man as I am. He suffered more than I did. He was tried twice, if I remember right, and one time was found guilty and came very near having to stretch, but he got a new trial and was acquitted. While I would not have one cent cut off his allowance, yet I feel that my allowance should be as much as his, for while he suffered more, yet he did not suffer as unjustly as I did. I was locked up in the county jail for a long time, was tried as a murderer, but without even going on the stand myself. I was acquitted. No jury has ever said I was guilty. Dr. Cross admitted that he killed Dr. McKune, but proved that he did it in self-defense. I never admitted that I killed Hughes, The elegant furniture for the Business Men's club was furnished by C. The club has been organized by the business men of this city, and besides being on a good financial basis it is composed of the very best business material in the

amount of his fine he expressed a desire to have Jefferies arrested on the same

ness of his legs and the pain in his head, but admitted that he had been in a

saloon for an hour just previous to his ar-rest. His honor said he had no wish to

The real effect of the resolution is to compel railroad companies to fill in their yards and tracks ond raise them to grade. The Major Wants a Pension.

The statement has been going the rounds of the Iowa press that Dr. Cross

him in part, at least, for the damages he

had sustained by being arrested and tried

POLICE STILL FIND SINNERS.

There were many who said I shot Hughes down in cold blood, and some believe it now, but they did not swear to it positively enough to convict me, and I never admitted that I killed him at all. I have always held myself to be innocent, and no judicial has said I was guilty.

The county has had to spend about \$10,000 in trying Dr. Cross, but one trial was all I had, and that a cheap sort of affair, so far as the county was concerned. Under all these circumstances I think I am justly entitled to as much damages as the doctor.

Further than this I really need the money more than the doctor. He has a better profession than I. The confidence business is rather unprofitable now. It has had too much free advertisment. I think that the state of Iowa would give me half of what I think the doctor expects \$500,000 I would be satisfied. I could then start a savings bank, and after a while could gather up a stake in the usual method. If you could see me in my present deplorable condition, and realize the scarcity of suckers, I am sure you would take pity on me, and urge the grand state of Iowa to pension me liberally. Please get up a petition to the governor, and help me get this through.

Chautauqua Assembly.

Notwithstanding the outward weather of last evening Masonic temple was fairly filled with those who are laboring for the establishment of a Chautauqua assembly here. President L. W. Tulleys presided and stirring addresses were delivered by Rev. D. H. Cooley, Rev. Dr. Phelps, Rev. T. J. Mackay, Mr. L. W. Ross and others. The advantages to be secured were ably and fully presented. Letters were read showing the success that has already attended similar institutions elsewhere. Questions were freely asked and an-swerd enlightening those who were not by personal experience familiar with Chautaugua work. Altogether the meet-ing was rather informal than otherwise, but great impetus was given the work on hand, and its details, leading to a final consummation of this earnestly wished for result, will be the more ardently prosecuted. Music was interpersed by a quartette constituted of Miss Fanny Wes-cott, Messrs. Paul Tulleys and Frank and Power Radollet. Perry Badollet.

He Preferred Walking.

The patrol wagon yesterday answered the call from box No. 46. Jake Shoup caused it. He had got drunk again. But when he saw the patrol wagon he sobered up and informed the police that he would walk to jail. "I won't ride in that wagon," he said. The Government of Cities. Scribner for October: If popular government and universal suffrage are to have any real meaning, the people must be placed in a position to know what is going on; whereas all our present are negents whether by the secret of rangements, whether by the secrecy of rangements, whether by the secrecy of committee rooms, or by that of executive officials, who never appear before the public at all, are such that the people never know anything of that with respect to which they are yet expected to judge and to decide. In the New England town meeting, the selectmen appear once or twice a year before the whole assembly of the inhabitants, and are cross-examined by individuals. The test is see by individuals. The test is so severe, and the judgment follows so swiftly at the elections, that corruption and even political intrigue are almost unknown. When a town becomes too large for such a meeting, the change is made to a city government the change is made to a city government with one or two representative councils. In theory these councils should do the work of the town meeting—that is, watch the course of administration, enforce responsibility, and keep the people informed. In practice they get possession of a large part of the administration, break up and destroy responsibility, and effectually conceal both their own doings and those of the executive. The offset and safeguard in entrusting extensize and safeguard in entrusting extensize powers to a mayor is in providing a tribunal before which he and his agents may promptly, easily and continuously be held to public account. If a body of one or two hundred men from all parts of New York were to assemble, say once a month, being debarred by law from any interference with administration, having no power to dictate any action or to vote any appropriation except upon proposal of the executive, but with full power of suggestion, of criticism, and of veto; if the mayor and his chief officials were to appear publicly before this body at each session to submit their plans, answer questions, and ask for votes of money, the people would be perfectly able to judge of the character and actions of their servants, and to express their opinions at the polls. Then, and

not till then, can we hold universal suf-frage responsible for failure of govern-ment.

One of the young ladies happened to address Mr. Hanger as "Uncle Charlie" while Mr. Thackara was present. The fact of them bearing the same Christian name was commented upon as a rather singular coincidence, particularly as they had been born on the same day.

"Are you a married man?" inquired Mr. Thackara of his new-found friend.

"I am," was the reply. I was married on the 27th day of May, 1872."
"That's singular. That's the day on which I was married. My wife's name is Ida."

"So is mine," almost shouted the westerner. "Have you any children?"

GALVESTON, Tex., Sept. 22.—A young Englishman arrived in the city to-night and registered at a hotel as Carter G. Gordon, from Savannah, Ga. Shortly after he created quite a sensation by walking up and down the principal streets clad in knee breeches, a peaked straw hat, and a huge cape overcoat although the weather was sultry. His eccentric conduct soon attracted attention, particularly as he was lavish with money, slapping down \$100 bills for trifmoney, slapping down \$100 bills for trif-ling articles and declining to accept any change. It appears that he arrived from England a few months ago, burdened with more money than he knew what to do with, and to gratify a singular freak made a bee-line for Texas. Hearing that the town of Ballinger was a good place at which to invest capital in lands he onickly went there and caused, considerquickly went there and caused considerable astonishment by not only buying lands, but by buying almost every-thing in the city. He purchased a train of wagons, purchased all the guns and rifles and pistols in the town, hired a number of men to serve him, and then organizee a force to hunt Indians and buf flalo.

Such is a history of his earliest exploits. The Indian hunting scheme fell through, however, and the eccentric young Englishman took a trip to San Francisco and soon left that city for Georgia. He was evercome with a desire to see Texas again, however, and he explained his action tonight by saying that he was particularly impressed with Galveston, and thought he'd buy out several wealthy syndicates. Whatever truth there may be in his story, he certainly seems to be overstocked with money. Occasionally he would be surrounded by curious groups on the street corners, and before leaving them he would present two or three in the crowd with a roll of bills. He said to the Globe-Democrat corres-pondent that his next objective point was St. Louis, where he intended to be during the Grand Army encampment, and where he intended spending bushels o fmoney.

At the entrance of the joss house were two giant figures made of paper, repre-senting great potentates of a former period. Promptly at 13 o'clock midnight, a procession formed in front or the joss louse, headed by several pagans bearing burning wood on a wire screen, with which they lit the prepared parcels composed of punks and greasy paper, which were placed in front of each door on the line of march. After this came the lantern-carriers, followed by the prominent members of the society, who were dressed in long gowns and a peculiar shaped turban hats on their heids. About a dozen Chinese children were in the wake of the procession, also in holiday attire. The latter are known as the Ghee Koung Fung Cheng Tsing or the societies' altar boys. After marching around Dupont, Washington and Clay streets, and the alleys abounding in that neighborhood, they re-entered the loss house and the

feasting began.

The festival lasts four days, and each day from two to three hundred China-men are fed gratis. The festival is an ancient one, and is held at every city where Chinamen who belong to the society abound.

The Ghee Koung Tung festival is a feast in honor of the great dead. The burning of the papers, candles and punks is, it is said, to keep the evil spirit away from the living as well as the dead. This religious society is the richest as well as the most powerful amongst the Chinese. From \$5,000 to \$10,000 are spent every year in this city in the idolatrous festivity. This fund consists of contributious from members of the society.
