THE SUNDAY BEE SUNDAY, NOVEMBER 20, 1887 .- TWELVE PAGES.

COUNCIL BLUFFS. OFFICE NO. 12, PEARL STREET

Delivered by carrier in any part of the city at twenty cents per week. H. W THITON, Manager. TELEPHONES: BUSINESS OFFICE, NO. 43. NIGHT EDITOR NO. 23.

MINOR MENTION.

N. Y. Plumbing Co. Reiter, tailor, Fall goods cheap. . Dalby's band will give a grand ballat the Masonic temple Tuesday evening,

November 29. A marriage license was yesterday ismed to Charles Coakes and Nellcenia Pigg, both of this county.

The devotional meeting of the W. C. A. will be held at the "Cottage Home hospital," to-morrow afternoon at 3 o'clock.

John Hamilton, one of the present in-mates of the county jail, has been in-dicted by the grand jury for larceny from a building at Walnut.

Edward Ryan, living on the county line north of Boomer township, died at his home Friday morning. The funeral will take place at 12 o'clock to-day.

A suit has been instituted against the city by Marshal Guanella to recover fees the amount of over \$600. His claims date from 1885 up to the present time.

The Fifth regiment, I. N. G., to which the Dodge Light Guards belong, will hold an election on the 26th of this hold an election on the 26th of this month for the purpose of choosing a major. He was walking in the di-

Mr. and Mrs. F. H. Hill are in posession of a remarkably lifelike picture of their son Freddie, whose death they were recently called upon to mourn. The work was executed by Mrs. Prof. McNaughton, and speaks volumes for her artistic skill.

her artistic skill. Invitations have been sent out for the wedding of James R. Barrét and Miss Nellie Abbott, at the home of the bride's parents, on the evening of No-bride's parents, on the groom-to-Unit So'clock. The groom-to-L. Morphy, engineer, and Charles vember 30, at 8 o'clock. The groom-to-be is a popular northwestern clerk, and the prospective bride is the daughter of Colonel E. J. Abbott.

Dr. Ellis is considerably elated over the discovery of a layer of fine limestone on Third street, near the school house. The stone lies twenty feet from the surface and is all that can be desired for building. The thickness of the layer is not known, although it has been drilled into to a depth of five feet. Two drunken vags were candidates

for berths in the county jail, yesterday. Judge Aylesworth told Frank Cooper that he might go down for thirty days, but turned F. Whipple out in the cold. Cooper says that Council Bluffs and Omaha have got to support him this winter.

This year the November blizzard struck Council Bluffs three days later than last year. Few will forget how they had to buy snow shovels to dig themselves out of the snow banks, last year-fourteen inches on the level and fourteen feet in the drifts piled up everywhere. Yesterday morning a few flakes fell but they felt lonesome and passed on.

The jury in the case of Blair vs. Witt et al brought in a verdict at 7:30 o'clock yesterday morning, awarding the plain-tiff \$20. He sued for \$10,000, and will move for a new trial. The case of Motherell vs. Cullerson occupied the attention of the court all day yesterday. It will probably require another day to finish it. The criminal cases will not probably be reached for some time.

Fritz Fritzmeyer, restaurant, 108 Main st. Meals at all hours.

THE SUNDAY BEE. DEATH UNDER THE WHEELS. William McLaughlin Killed in the Union Pacific Yards. RELIGIOUS SERVICES TO-DAY. Indicting the Gamblers-Touched By

the Fire-Blown Over-Freaks of Boreas-Minor Mention and Personal.

Another Unfortunate. Yesterday morning about 8 o'clock

William McLaughlin, a section man in the employ of the Union Pacific railroad company was struck and killed by a switch train in the yards west of the transfer. Switch engine No. 1159 was backing up about a dozen freight cars, and the man was walking toward the train with his face to the ground when he was struck. The morning was very cold, and the deceased had his ears cov-ered, which undenluedly prevented his hearing the approach of the train. The testimony of W. T. Butcher at the in-quest gave the only account of how the unfortunate man met his death. It was as follows: "I was the first man that saw

him. I was running along on the ground on the south side of the track and had hold of the last car. When I first saw the man he was not over half a car rection of the train, moving very slowly. I signaled the engineer to stop, which he did as soon as he could. The car struck the man his head and was thrown . He fell and was dragged. o<u>n</u> ... back. It was the second car that ran over

and dirt. J. Murphy, engineer, and Charles Highsmith, fireman, of switch engine No. 1159, testified that they did not see the man, but stopped in from five to eight seconds from the time the signal Chapman's. was given, running about a car length before stopping. They said the train

was not moving over two miles an hour. The coroner's jury, composed of R. B. Westcott, J. E. Thompson, and George Dixon, rendered a verdict "that the leceased came to his death by being knocked over by a train being pushed by Union Pacific engine No. 1159, and

according to the testimony no blame can be attached to the company." The deceased had been a resident of Council Bluffs for some thne, having Broadway. been employed by the Union Pacific company for two years. He leaves a wife, six children and an aged mother, whose sole support he has been. The remains were taken to the undertaking establishment of Morgan, Keller & Co. numbers. Two children of the deceased had heard that the victim of the accident was their father, and were waiting at the under-takers to see if the report was true. When the stretcher was taken in and uncovered, the grief of the little fellows

was truly pitiable, and many of the bystanders who were accustomed to see sad sights, were unable to entirely control their feelings.

teen hydrants, and one of them is to be placed near Mr. Hammer's residence, but it came near being a case of locking the door after the steed was stolen. The damage done to the alarm wires by the wind the preceeding night had not been fully repaired and there was considerable uncertainty among those who heard the bell as to the location of the fire. Both circuits were broken for a short time, but prompt work by the superintendent soon put everything in good running order. Mr. Brugger, of E. B. Preston & Co., of Chicago, was not far out of the way when he said that

Council Bluffs has the best fire departof any city of her size in the country. Insure with Wadsworth, Etnyre & Co.

Blow Gentle Breezes.

About 11 o'clock Friday night "Old Boreas" started out on a rampage, and for a period of twenty-four hours indulged in a most terrific "tear." Signs were blown down, outbuildings overturned, trees uprooted and havoe raised generally. In the country, haystacks were blown away and wagons taken visiting to neighboring farms.

During the gale a large tree near the No. 1 hose house was blown down, and in its fall struck a telephone pole, breaking it off about five feet from the ground. Everyone of the thirty-five or forty wires connected with the pole was broken, and for a time telephonic connection with the southern part of the city was completely shut off. By noon the linemen had the wires all working, but the greater part of the day was con-sumed before they were all back in their places. A perch forty feet from terra firma on a telephone pole was anything but a pleasant position yesterday, but it was where many of the boys had to be the greater pert of the day. Wires were broken in several parts of the city, but with the exception of two or three hours' inconvenience in the morning there was scarcely any trouble, and many genuine blessings were in voked for the company whose wires saved subscribers a trip in the wind

SUBSTANTIAL GROWTH. The Council Bluffs Boom-The Lake

Manawa Resort Next Season. COUNCIL BLUFFS, In., Nov. 9 -- | Correspondence of the Minnenpole Tribune, [-A] few statistics regarding Council Bluffs may be of interest. The population, 35,000 at the last census, has been increased until at present conservative estimates place it at 38,000. Last year the jobbing trade amounted to

\$23,580,000 and the value of manufactured articles was \$3,514,000. The value of improvements of a public nature alone was \$4,000,000 last year. These few figures will serve to show that a general advance has been made both in population and solid, substantial growth.

One of the great drawbacks to the beauty of this town and also of Omaha has been the

absence of a breathing spot like your own attractive Lake Minnetonka or Lake Calhoun. This want, however, will be of very short duration for before the advent of the suitry days of next August, Lake Manawa will be a veritable gem in the way of a resort where the tired business man or weary, toil racked laborer can breathe the pure air of the country, feast his eyes on the beauty of

the country, feast his eves on the beauty of the placid waters or listen to the singing of the feathered birds of the forest. Lake Manawa is a beautiful body of water cover-ing 1,500 acres, of sufficient depth to admit of steam and sail-boat navigation. The beach is most excellent for bathing purposes. During the past summer there were eight boats on the lake. A fine and substantial hotel was built last summer, with propagets of two built last summer, with prospects of two others next season. This will be the only pleasure resort within a radius of 100 miles of either Council Blunks or Omaha so that it can easily be seen that a bright future awaits the projectors of the enterprise. Many things are in favor of the success of the undertaking. The projectors are men of means, and, by the way, I am glad to notice that two and, by the way, I am glad to notice that two of the largest proprietors are residents of your city. There is a lack of effusive enthu-siasm but no lack of quiet, energetic work. The location of the lake is a point in favor of the undertaking, situated only three-fourths of a mile south of the city limits and on a line with the extension of Main street. The past summer a motor line has been built from a convenient point in the city to a point at the a convenient point in the city to a point at the lower part of the lake. All purchasers of lots are given a guarantee that the fare shall never exceed five cents. The surrounding country is high, dry and gives a magnificent view of both cities and of the valley through

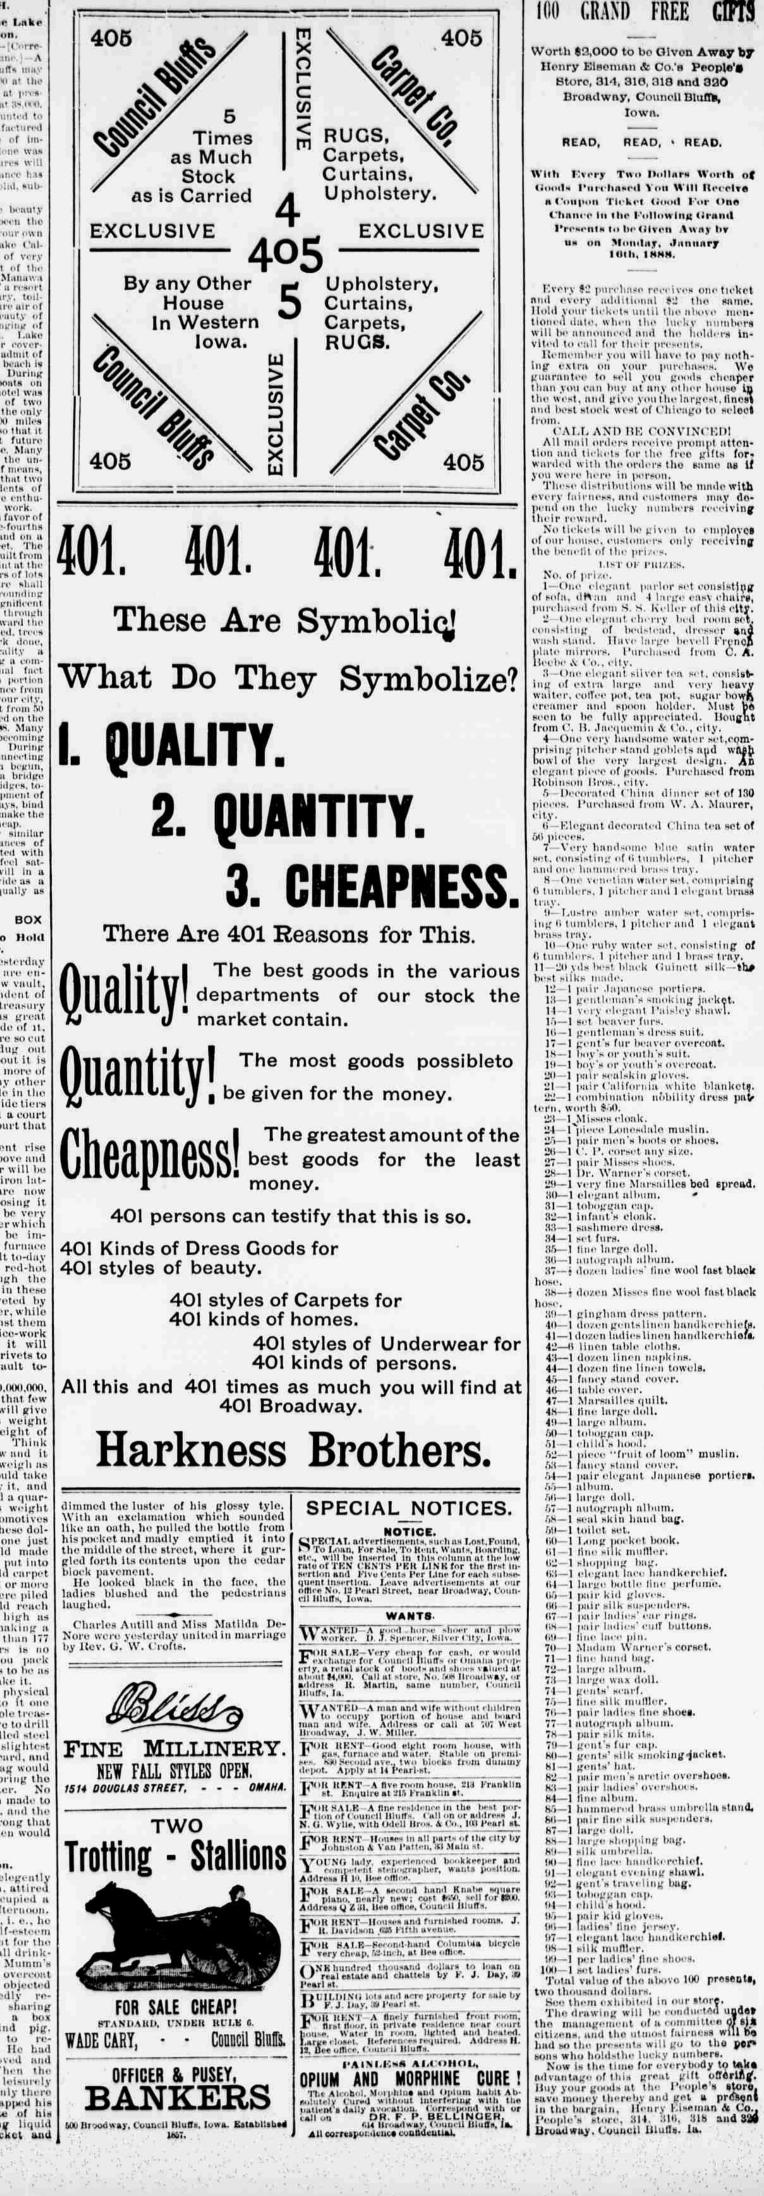

which the Missouri wends its way toward the gulf. This fall streets will be graded, trees set out and other becautifying work done, all tending to make the locality a superb place of residence. Taking a com-parative distance it is an actual fact that the distance from the business portion of the city is the same as the distance from Washington ave, via the motor in your city, to Lake street. Already I learn that from 50 to 75 fine residences will be erected on the shores of the Lake before June 1, 1885. Many of the best citizens of Omaha are becoming interested and have purchased lots. During the past summer a wagon bridge connecting the cities to cost \$1,000,000 has been begun, and the Union Pacific has also built a bridge costing over \$1,000.000. These bridges, to-gether with the building and equipment of ten miles of additional street railways, bind the two cities closer together and make the means of communication easy and cheap. In conclusion I know of no other similar undertaking which has as many chances of success. Being intimately acquainted with the projectors and present owners I feel sat-isfied in saying that Lake Manawa will in a

few short years be known far and wide as a resort for pleasure and residence equally as well as Minnetonka. UNCLE SAM'S STRONG BOX

The New Vault Which is to Hold \$100,000,000 in Silver.

I dropped into the treasury yesterday and looked at the workmen who are engaged in constructing the new vault, writes a Washington correspondent of the Savannah News. The treasury itself looks like a tomb. It has great sombre columns down each side of it. and the doors of its basements are so cut that they look as if they were dug out of a solid rock. Everything about it is massive, and it makes me think more of

Did You Buy? 1 Did. "Did you close the deal?" "Yes, me Lord, and I would not take

200 per cent for my investment either." "Well, I believe that's the way everyone talks who buys real estate of that fellow.

The above conversation was heard on the street yesterday between a couple of gentlemen who had just emerged from the office of J. G. Tipton, real estate broker.

Change of Date.

"The Musketeers" comic opera will be given Tuesday and Wednesday, Nov. 22d and 23d, and Saturday matinee on the 26th at 2 o'clock p. m., instead of the 23d and 24th as formerly announced.

Going For the Gamblers.

The grand jury has not completed its labors as yet, though some good work has been done. The BEE has already made public a large part of the proceedings that belong to the public. Among other things that have been carefully considering is that of gambling in violation of the law. Indictments have been found against half a dozen or more, and what is rather unusual, they are against the leading gamblers of the city and not against the small fry. The papers have not been served yet, and there seems to be quite a feeling that the officers are rather dilatory in serving them. A remark of that kind having been made to Colonel Dailey, district attorney, he replied that, be that as it may, when the cases came into court the people would be satisfied that at least one officer was honestly endeavoring to have the law executed, and did not stand in awe of a gambler even if he was wealthy and possessed of political influence.

San Francisco. On either side as one walks through he sees enormous casks At about 10 o'clock yesterday mornng an alarm of fire was turned in from each containing from 1,000 to 1,500 gallons of wine. The oak heads are pol-ished until they give back the reflecbox 12 at the upper end of Broadway. The department responded with their tion of the candle light, and each bears usual promptness, but found that the in chalk the name of the wine and the year of vintage. Zinfandel, Malvoisie, fire, Lewis Hammer's residence near the eastern city limits, was too far from Pinot, Burgundy, Sutedel, Burgerthese are the names that most frethe nearest hydrant to be reached by quently meet the eye. The wine stored their hose. As the flames had obtained in these cellars is equivalent to a forbut slight headway the boys were able tune. Most of it is two or three years old and altogether there are 300,000 gallons. In this even temperature to conquer them with a few pails of water, and the use of picks and axes. A which stands at about 58 degrees winter pan of hot ashes had been set outside and summer the wine grows mellow. If all Napa wine-makers had the cellar the door and the strong wind had blown some sparks against or under the siding, capacity and the means to keep their and the fire had worked under the lower floor for some distance before discovwines for three or four years there would be less complaint of the quality of California wines, and there would be ered. It is a wonder that the house was not consumed, as the wind was blowing a gale at the time. At a recent recorded fewer cases of failure on the meeting the city council relocated six- | part of wine-growers.

of granite walls running around a court in the centre. It is in this court that the new vault is being built.

Thick walls of brick and cement rise within and the vault will be above and not below ground. Its interior will be cut up into cells walled with iron lattice-work, and the workmen are now riveting the iron bars composing it together. These bars must be very strong, as the weight of the silver which is to be put in the vault will

mense. There was a portable furnace blazing away within the vault to-day and four men were carrying red-hot rivets and sticking them through the

holes which had been drilled in these iron bars. They were then riveted by the pounding of a heavy hammer, while a man held an iron mallet against them at the back. Each of these lattice-work walls require 2,500 rivets, and it will

take more than 100,000 of these rivets to fasten the iron-work of the vault together.

The vault is to contain \$100,000,000, which is such an immense sum that few people can comprehend it. It will give

some idea of it to know that its weight will be 3,580 tons, or the weight of 85,800 men of 900 pounds each. Think of the heaviest man you know and it would take 35,000 such men to weigh as much as does this silver. It would take seventeen freight cars to carry it, and it would take a train a mile and a quarter long to transport it. Its weight would be so much that six locomotives could hardly haul it, and if these dol-lars were laid out so that one just touched the other they would made 2,305 miles long. If they were put into a floor, edge to edge, they would carpet ten times the area of the capitol or more than thirty acres, and if they were piled one upon another they would reach much more than 1,500 times as high as the Washington monument, making a solid column of silver more than 177 miles high. A million dollars is no small quantity, and when you pack \$100,000,000 into a vault it has to be as strong as stone and iron can make it. To rob this vault will be a physical impossibility. To tunnel into it one would have to go under the whole treasury building, and he would have to drill through a floor cement and chilled steel before he got to the coin. The slightest noise would be sure to be heard, and the movement of a single bag would cause such a racket as to bring the guards down upon him instanter. No attempt has, I think, ever been made to

box at a theater yesterday afternoon. The gentleman was a swell, i. e., he was all swelled up, both by self-esteem and frequent libations. He sent for the water boy and borrowing a small drinking glass, produced a bottle of Mumm's extra from the recesses of his overcoat pocket. The ladies, however, objected to the publicity, and pointedly re-marked that they declined sharing in any scheme to convert a box at a theater into a blind pig. The swell was obliged to re-turn his bottle to his pocket. He had previously had the wires removed and a rubber cork inserted. When the play was over the trio walked leisurely down Nicollet avenue. Suddenly there was an explosion; the swell clapped his hand to his pocket, but in spite of his struggles a stream of sparkling liquid escaped from his overcoat pocket and
