Democratic Cauchses.

Numerous times of railroads lead in every direction, and fruit landed there is quickly dispatched to the various thriving eithes and towns of the northwest, where there is the best possible market for our fruits. The section of country north of Chicago produces practically no fruit except apples and berries, and our peaches, pears, apricots and oherries find a ready sale there at good prices. Mr. Butts came to the coast about two months ago, and h as visited all of the fruit-producing sections and made himself there oughly familiar with the crop prospects. He says that is spite of all reports to the con-trary, there will be a large crop of fruit for shipment this season and that the prospects are that it will be of an excellent quality. "There has been a vast improvement dur-ing the past two years," said Mr. Butts, "in the manner of shipping fruit from the Pacific coast. The producers have learned to handle their fruit with care, to pick it at the right time, and to pack it in heat and altractive packages.
