The Remonstrance of the Parliamentary Members.

DEFIED WITH DOUBLE LEADS.

Even English Catholics and Press Divided-Vatican and Anti-Vatican Parties on the Question of Papal Interference.

The Chasm Widening Daily.

[Copyright 1888 by James Gordon Bennett.]
DUBLIN, May 19.—[New York Herald Cable—Special to THE BEE.]—The chasm between the vatican and nationalist catholics begins to widen. A great public meeting is to be held to-morrow in Phoenix Park, "In support of the resolutions adopted by the Irish Catholic members with regard to the political aspect of the recent circular from Rome." It is announced simultaneously with a special meeting of the corporation on Thursday next for a similar purpose. The demonstration in the park will be presided over by Lord Mayor Sexton and be addressed by John Dillon, William O'Brien, E. D. Sullivan, T. Harrington, John Redmond, Dr. Kenney and others.

The Freeman's Journal to-day strongly backs up these demonstrations, observing, "We would respectfully urge on those responsible for the declaration of the Irish Catholic representatives and the resolutions of the meeting translated into French and Italian and brought directly under the notice of continental people and persons. We have reason to believe that the steps already taken meet with the warmest approval on the other side of the Atlantic, as well among native Americans as among our own kith and kin in the states. The Irish bishops have done their part; it is now the duty of the laity to do theirs. We feel sure their pronouncement will be independent, bold, outspoken and unmistakable. Irish opinion and judgment must be supreme in matters of politics."

The Freeman's Journal also printed a Roman dispatch, heading it, "British Intrigue at Work," in which it is asserted the pope received more than a year ago an indirect invitation from the British government to employ his religious authority in pacifying the Irish. The British government gave no engagement in exchange, but held out hopes of a future arrangement. Monsignor Persico collected many documents upon this question, and after an important conference with the English and Irish bishops present in Rome on the occasion of the jubilee, convinced the pope his intervention might be useful to the interests of the Catholic church and her relations with England. The pope entrusted the congregation with the study of all the documents collected and it came to the unanimous decision that the condition of the Irish tenants did not justify them in making illegal and violent opposition. This point having been settled it went on to discuss the question of condemning the plan of campaign from a religious point of view. The congregation feared such an act might be considered an inopportune interposition of the vatican in the political and internal affairs of a foreign state. Several cardinals insisted upon the necessity of clearly expressing in the decree the absolute noninterference of the Holy See in political matters. The majority, however, decided in favor of the decree as it was published, considering that far from prejudicing the national question, it would raise the religious prestige of the vatican. The pope still hopes for the re-establishing of diplomatic relations with England and in the meantime trusts to obtain considerable advantage from reform laws relating to public instruction, and "all circles and sects here express intense interest to know what the outcome will be and if the attention will bring a species of disruption."

Another Break.

ST. LOUIS, May 19.—Late advices from upriver points say the flood is increasing at various places and there is much suffering among the people. At Louisiana, Mo., the river is rising and the water is so high that nothing is being distributed. Investigations made to-day show that previous reports of want and destitution have not been exaggerated. Hundreds of families require immediate assistance. The people of Quincy responded nobly to the call for aid, several thousand dollars having been subscribed and the work of relief has been only fairly commenced. Governor Alger of Michigan telegraphed \$500 to the relief committee.

TREASURE SEEKERS.

An Extensive Scheme to Reopen Minnesota's Aztec Silver Mines.

DULUTH, Minn., May 19.—[Special Telegram to THE BEE.]—An expedition headed by H. F. Eberts started from here to-day on the steamer Ossifrage for the ancient Toltec silver mines, thirty miles inland from Grand Marais, in Lake county. A large amount of pumps, steam drills and mining machinery accompanied them, and another lot of engines and tools is being sent by the next boat. The projectors have possession of 1,500 acres of land in that section and already have uncovered a twelve-foot vein of the richest silver ore known in these mines. They were working over the mine for some time, and the discovery of the Toltec mine is a great event in the mining history of the state. The projectors are backed by men of capital and no stock is for sale. The excitement is growing and the cry is "The ancient diggings."

Army Orders.

WASHINGTON, May 19.—[Special Telegram to THE BEE.]—On the mutual application of the officers concerned, the following transfers in the Ninth cavalry are made: Second Lieutenant Eugene F. Ladd from troop E to troop B; Second Lieutenant Harry G. Grout from troop B to troop E.

First Lieutenant Francis Woodbridge, Seventh infantry, having been found incapacitated for active service by an army retreating board, is granted leave of absence until further orders on account of disability.

Captain James M. J. Sano, Seventh infantry, will repair to Washington barracks, District of Columbia, for the purpose of appearing as a witness before the general court martial at that post, and on the completion of this duty will return to his proper station. For further orders necessary for the public service.

The following named enlisted men of the Third infantry, having performed the duties assigned them, have been discharged: Charles L. Baner, Hemingford; Pharis L. J. Acker, Ainsworth. Re-issue and increase—John H. Butler, Omaha. Original widows, etc.—Loretta, widow of William G. Lee, Lamar.

Pensions for Invalids: Original invalid—George W. Yume (deceased), Fairview; P. H. Brubaker, Brainerd; Increase—Charles L. Marquis, Vinton; Henry B. Miller, Osceola; Increase—Joseph Motley, Osceola; John P. Mulliken, Fairview; William P. Fowler, Fairview; Charles L. Marquis, Vinton; Original widows, etc.—Mary, mother of Charles J. Allen, Osage.

Steamship Arrivals.

NEW YORK, May 18.—[Special Telegram to THE BEE.]—Arrived—The La Bretagne from Havre; the Umbria and the City of Chicago from Liverpool; the Persian, Monarch and Umbria from London.

MONARCH FROM NEW YORK.

QUEENSTOWN, May 19.—Arrived—The Ettrah from New York.

FOUR MORTALS SMOTHERED.

CLEVELAND, O., May 19.—Mrs. Elizabeth Lewis and her three grand children were smothered to death to-night in a fire at the house of her son-in-law.

OUT FOR AN AIRING.

The Emperor's Face Bears an Expression of Cheerfulness.

RESISTS DISEASE SPLENDIDLY.

Mackenzie Insists That Recovery Is Possible.

BERLIN A NEW JERSEY SWAMP.

American Mosquitoes Take Possession of the Capital.

COMING RULER OF THE REALM.

A Change in His Demeanor Noticed—Less Impetuous and His Conversation More Subdued—Personal.

Condition of the Emperor.

[Copyright 1888 by James Gordon Bennett.]
BERLIN, May 19.—[New York Herald Cable—Special to THE BEE.]—I was fortunate enough to-day to catch a glimpse of the emperor as he was taking an airing in his pony perambulator in Charlottenburg park enclosure. He looked very white and very fatigued, but his expression was most cheerful, his face now and then brightening into a smile. His beard has been partly cut. He wore a Panama hat and a thin gray cloak coat of duster. The perambulator was stuffed with green cushions. The pony is a little red one, not much bigger than a St. Bernard dog. Two lackeys in black livery and silver argillites walk beside, fanning away the swarms of mosquitoes. I afterwards saw Mackenzie, who, together with Virchow, still firmly persists nothing yet absolutely demonstrates the disease to be cancer, although with a strong probability it is exactly a case of "Scotch verdict not proven."

Mackenzie says it is unfortunate there is no spring weather this year, but the sudden heat and mosquito plague have not had any perceptible effect on the emperor, who will go in a little steam launch, about the 28th of May, to Potsdam, and after about a fortnight's rest there go to Hamburg. There is no reason why the patient should not live a month or three months or more, but if the corrosive sore should eat inward, of course it would be fatal, but it is not doing so now. The emperor's constitution and the absence of nervousness are not favorable for recovery but splendid resistance against disease. I asked Mackenzie if recovery was possible. He replied, "Most certainly. I still maintain recovery within limits is a possibility."

It is 92° Fahrenheit in the shade to-day, not a breath of wind and the atmosphere thick with millions and millions of mosquitoes, everybody agrees that Berlin never before was so suddenly transformed, and as if by magic we made a plunge from midwinter into midsummer. The day before yesterday overcoats and even furs were a necessity; to-day a tropical sun seems to have melted them away, and straw hats and white duck trousers everywhere dominate. Swarms of American mosquitoes not only suddenly appeared in the city but in the zoological gardens, where the elephants, tigers and lions are to-day for the first time out in the open air.

The Kaiser's continued improvement has become almost a cause for national congratulation, but even the most optimistic do not dare, under Sir Morrell's cautious saying, to pronounce it convalescence. Politically and financially the logical conclusions of cancerous development have been discounted in every capital in Europe. All eyes are riveted on the crown prince, who is still regarded as an unknown quality, but those nearest him feel convinced that he has intellectual force and energy greater than that possessed by any Hohenzollern prince since Frederick the Great, but the same friends admit that this admiration for Bismarck is so great that even when the crown prince becomes emperor he will allow Bismarck to rule as firmly and as despotically as Richelieu did in France under Louis Treize. It is now an open secret that acting upon Bismarck's advice the crown prince, when he ascends the throne, will not only be crowned king of Prussia at Königsberg where the Prussian kings are always crowned, but will have a magnificent imperial coronation at Frankfurt or at Aachen, where Charles V was crowned in 1550, and which by a golden bull granted by Charles IV in 1356 was made the coronation place for German emperors. It is believed that this step will not only be a popular recalling of the imperial grandeur of Charles V, but flatter the present sentiment of the renaissance and devotion to everything that is all deutsche, but at the same time strengthen outside of Prussia, the personal prestige of the emperor.

The crown prince firmly believes that the whole tendency of future events is to limit the action of individual governments and to place greater power in the emperor's hands. Bismarck has spoken of the crown prince as a man after his own heart, and this plan of an imperial coronation, reviving the days of the old German empire, is an eventful one for Germans everywhere and sets them all thinking.

The street windows of Berlin are filled with photographs and plaster busts of the crown prince. He is cheered heartily whenever he appears in public. I saw him this morning as he entered the Brandenburg gate returning from the Temple Hof maneuvers at the head of the Garden fusilier regiment. He looks paler, much more careworn, and above all much more matured than when I saw him at San Remo in February. His whole demeanor has changed. He is less impetuous; his conversation and his conversation have become more subdued, like that of a man who has suffered or who has passed through a crisis. He seems ten years older since February. Perhaps after all he may not prove to be the hot-spur that he is generally believed to be.

The Anglo-American Students' club celebrated a double event next Saturday, namely, the American decoration day with an address by Rev. Dr. Stuckenborg, and the queen's birthday with a speech from Mr. Bashford.

Dr. Bigelow, of Washington, has left Berlin for Carlsbad and will spend the summer in Hungary.

Frederic Crosby, second secretary of the American legation, has left Berlin on a vacation.

L. A. Macarthur, of Troy, and Archibald Taylor, of Baltimore, have arrived here.

Miss Moreland, of Pittsburgh, who has been studying in Berlin for two years, leaves for home on Tuesday.

Mrs. Helen Newberry and family, of Michigan, have arrived here.

Dr. George Perry, of Salem, Mass., is also here to complete a course of special medical study.

Rev. Dr. Stuckenborg has left Berlin for a three weeks' stay in Switzerland. Dr. Scott fills the pulpit in his absence.

Colonel Siebert, formerly of New York, is also away on a visit to Darmstadt.

Will Rebuild.

PEORIA, Ill., May 19.—The American Glass company will rebuild their works here at a cost of \$500,000. They will have a capacity of 6,000 bushels per day.

RIGHT IN THE SWIM.

Paris Boulevards Thronged With Pleasure Seekers.

AMERICANS KEEP POURING IN.

Doings in Paris.

[Copyright 1888 by James Gordon Bennett.]
PARIS, May 19.—[New York Herald Cable—Special to THE BEE.]—From spring, with its caprices and chills, we have plunged into midsummer. Mantles and overcoats have been laid aside for the season, and after dusk the Champs Elysees is once more thronged with pleasure seekers. The Al Fresco and Cafe Chantant have trimmed up their lamps. The echoes of the Ambassadeurs are answered by other echoes from the Alcazar and the Pavillon del Horloge. The strains of the Boulangist songs of Bourgs are broken by the increasing rattle of crockery from those pretty little restaurants, which most strangers find so ruinous. Through the broad avenue leading to the triumphal arch and night an endless stream of carriages roll. The four-in-hands have been brought out again and the cafes are filled with the clatter of many tongues. The noble faubourg is giving its last grand reception—in a word, Paris has reached the height of its annual season.

Americans are still pouring into Paris. Among others I have met on the boulevards this week Lieutenant H. R. Sullivan, Mrs. Louise Bowler, Mrs. Wayne Noff of Cincinnati, Miss Louise Ingalls, Mr. and Mrs. C. F. Feltows, Mr. Charles W. Parker, Miss Parker of Boston and Mrs. Edward Scoville. Mrs. Scoville is a native of New York.

Colonel Jerome Bonaparte, Mr. and Mrs. Sorcher and M. A. Padelford sailed on the Champagne to-day.

The marriage of Count Derohan Chabot and Mrs. Albert Gallatin takes place at the chapel nunciature, Paris, June 7.

Since his return from the North Boulanger has been very busy. He has taken a new house in the Rue Urmond at Neuville, near Fracador, which he will inhabit alone this summer. M. Boulanger's health not being equal to the strain of living in Paris with a man so overwhelmed by politics as he is, he has decided to spend the summer at Neuville.

Blaine Insists That He Went.

NEW YORK, May 19.—The World has interviewed Mr. Blaine at Paris as to whether he would accept if nominated. In answer Mr. Blaine said that he had declined to accept. His declarations, however, correctly represent his present state of mind. "Blaine will leave for England shortly, and during the convention will be approaching the extreme north of Scotland, out of range of ordinary telegraphic communication."

Federal Jurisdiction Enlarged.

WASHINGTON, May 19.—Mr. Adams, from the judiciary committee to-day reported favorably the bill extending the criminal jurisdiction of the circuit and district courts of the United States to the great lakes and their connecting waters with the provision that the bill shall not apply to the rivers connected with such lakes when wholly within the United States.

A Sunday School Convention.

ST. LOUIS, May 19.—The largest gathering of Sunday school children ever held in America took place to-day in the fair grounds. The occasion was the union Sunday school festival and over 20,000 were present. The day was spent in singing, parades, fireworks and games. A chorus of 5,000 children's voices was a feature.

Talked But Didn't Act.

WASHINGTON, May 19.—A conference of republicans to-day was held here to-night. The subject of discussion was Mills' proposition to vote directly on the tariff bill or on a substitute to be offered by the republicans. There was much talk, but no action.

Commissioner Atkins Resigns.

WASHINGTON, May 19.—Commissioner of Indian Affairs Atkins has tendered his resignation to Secretary Vilas, but at the latter's urgent request will continue in office until June.

Waterworks at Once.

SURENOM, Neb., May 19.—[Special Telegram to THE BEE.]—The latest gathering of Sunday school children ever held in America took place to-day in the fair grounds. The occasion was the union Sunday school festival and over 20,000 were present. The day was spent in singing, parades, fireworks and games. A chorus of 5,000 children's voices was a feature.

Weather Indications.

For Nebraska: Cooler, local storms, followed by fair weather, winds becoming fresh from the west.

For Iowa: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Missouri: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Arkansas: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Louisiana: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Texas: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Oklahoma: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Kansas: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Colorado: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Wyoming: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Montana: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Idaho: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Utah: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Arizona: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For New Mexico: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Nevada: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For California: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Oregon: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Washington: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Alaska: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For Hawaii: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For the Philippines: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For the Hawaiian Islands: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For the Line Islands: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.

For the Pacific Islands: Warmer, followed by cooler, fair weather, followed by severe local storms, fresh from the south.
