CHICAGO PRODUCE MARKET.

CRICAGO, August 27.- |Special Telegram to THE BEE. |-The wheat opened Me off this morning on easier English and indifferent continental cables. Hutchinson's brokers were in the pit selling December, which started raggedly with sales ranging from 90c to 90%c. He had another set buying September which advanced from 88%(et 89c at the opening to 89% c and a little while afterwards to 90%c. December ranged at 9014 @90% c and then to 9114 @9114c. Wheat worked back about 14c, September touching 89% cand December 90% c. The difference between the two months, it will be observed, narrowed to 1c, and at times it was 1sc less than that even. The trade was active around the opening, but quieted down later, and for an hour previous to the announcement of the visible supply statement business dragged somewhat. Simultaneously with the receipt of news that the increase was 907,000 bushels it was given out that the international grain congress at Vienna had published its estimates to the effect that the world's crop of wheat would fall 200,000 bushels below last year and 150,000,000 bushels below the average of the last five years. This important piece of news was not supposed to be authentic until the statement received positive verification during the afternoon. The international congress met to-day and skeptics pointed to the fact that it would not be likely to more than complete its organization the first day, leaving for later sessions the work of receiving and digesting crop reports from the several producing countries. Nevertheless the price of wheat was marked up %c on the statement that the market has good support. However, local sentiment was also unanimously bearish "for a reaction" carly in the day, but it changed later on more bullish advices from the continent. Reports from the winter wheat sections indicate that the crop is turning out rather better than was expected, advices from the northwest are unfavorable advices from the northwest are unfavorable, with now and then an exception. An exami-nation of nearly one hundred samples re-ceived at Fargo, Dak, convinced an expert that the crop of that section would be 40 per cent below an average, and the prediction was again freely made by the grain men of that locality that not 10 per cent of the wheat raised north of the Northern Pacific would areade No. 1 bard The visi. would grade No. 1 hard. The visi-ble supply statement occasioned neither surprise nor excitement. The increase was about what had been expected. The pit was quict the last hour and values vere steadily held around 90c for September without important variation. The undertone was one of firmness and a good many oper-ators, disappointed in the non-fulfillment of their hopes of a big reaction, bought back property they had previously released. The closings did not show important changes from Saturday and what change there is is in the nature of an improvement. The corn market was quiet, lower and weak, closing with Septomber about %c lower than it closed Saturday, seller October about %c lower and seller May about %c lower. A weaker feeling in wheat, fine and favorable weather, and above all continued heavy seconds were the chief elements of favorable weather, and above all continued heavy receipts were the chief elements of weakness. The longs were free sell-ers and there were few buyers to take offerings. The situation encouraged the shorts in selling, and under liberal offer-ings, the price of September gradually fell from 44¼c to 44c, improved a triffe and closed at about 44½c. October was about ke under September. One or two large 14c under September. One or two large operators sold pretty freely throughout the session. Long futures were less active. The

NEW YORK, August 27.-[Special Telegram to THE BEE.]-STOCKS-The stock market did not show any new features this morning at the opening, which was generally frac-tionally higher than Saturday's close. There was a moderate amount of trading at the start, though the animation was confined to less than a dozen of the leading stocks, among which Lackawanna, St. Paul, Reading, Western Union, Oregon Transcontinental and Union Pacific were the most conspicuous for strength, through sympathy with a good London market, though from that place orders were scarce, and buying by leading commission houses were the strengthening factors. There was a good strong

shipping demand for cash corn was moderate. Onto a structed only moderate attention on the part of traders, and while there were no wide ranges prices generally tended down-ward, ruling ¼@%c lower. The weakness was most noticable in near futures and was due largely to liberal receipts, and expected arrivals of fully 400 cars for to-morrow. The cash market was overloaded and there appeared to be a general desire to sell August sold down to 24% c with the next month declining to 24% c. Cash lots were freely offered, and sold at 24% c for No. 2 in store,

or 4c decline. In provisions a strong feeling held control. Disappointment over the receipts of hogs, coupled with free buying of pork by Hutchinson and of short ribs by a Boston house, created unusual uncasiness among the shorts, and under an urgent demand to cover short contracts a sharp advance was wit-nessed. In trading lard received less attention than the other articles, yet the entire market was bullish. Higher prices prevailed all around, and, as compared with Satur-day's closings, pork at the adjournment showed an appreciation of 30@3234c, short ribs of 734c and lard of 5c. Both short ribs and pork sold at the lowest prices quoted early and at the highest either at or just be fore the close. In lard the day's fluctuations were limited to 2½c, while in short ribs they covered a range of 1234c, and in pork of 8354

CHICAGO LIVE STOCK.

CHICAGO, August 27.-[Special Telegram to The BER.]-CATTLE-There was not a single load of prime cattle on the market and only a few loads of "goodish" or fair sorts of natives. The demand was fair and prices steady as compared with the close of Saturday. The run of range cattle was liberal, there being double the number of northern rangers that there were of Texans, the latter numbering less than 100 cars. Both Texans and rangers sold a shade stronger than at the close on Friday. Taken altogether the general market ruled perceptibly stronger than at the celose last week. The receipts included 4,500 Texas and western cattle. Choice to extra beeves, nominal at \$0.0006.50; medium to good steers, 1850 to 1500 lbs, \$5.5006.00; 1200 to 1850 lbs, \$4.5005.40; 950 to 1200 lbs, \$3.60(@4.50; stockers and feeders, \$4.10(@3.50; cows, bulls and mixed, \$1.50(@3.00; bulk, \$2.15 (22.00. In very fine weather our small crafts often go out from four to six miles off Aran Heads. Next day they all come back laden, and after such a take all the other boats in the neighborhood will go out. It may be that a breeze springs up and the sea rises in the middle of a good catch, then all have to run for home or shelter. Large, well-fitted fishing smacks could stay out there for days, and make plenty of money, too; but facilities for the transit and sale of

Do Figures Lie?

Do figures lie? Let us see. Two women had thirty chickens each which they took to market. They agreed to divide equally the proceeds of their sale. One sold her chickens two for \$1, get-

ting for her thirty chinkens \$15. The other sold hers three for \$1, get-

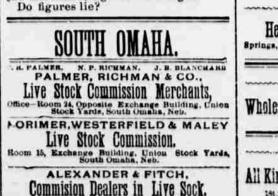

ting for her chickens \$10. This made \$25 realized on the sixty

chickens. The merchant called to divide the

money said:

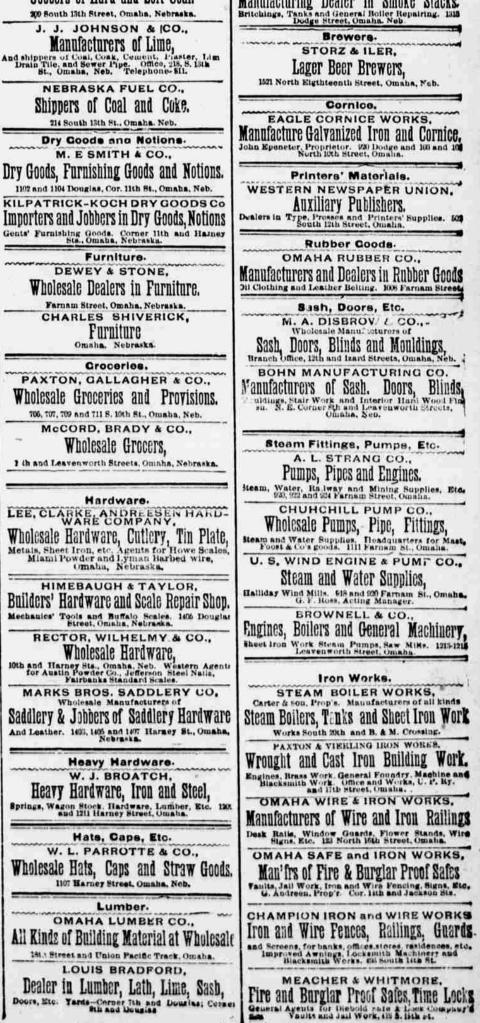

"You sold your thirty chickens two for \$1, and you sold your thirty chickens three for \$1. That makes sixty chickens at the rate of five for \$2. Well, five into sixty goes twelve times-twice twelve is twenty-four. That makes \$24 your chick-ens brought."

But as shown above the women actally had \$25 in their pockets. And yet the merchant's figures were right.
