Harry Birkinbine, the popular manager of
the waterworks company, passed a mile-
stone on life's journey Wednesday, and the
entire community rejoiced over the fact
by presenting him with a very hand-
some and costly game set, as a token of ap-
preciation and regard. He stood the ordeal
bravely.

Yesterday morning while the family of
Dr. Green were away from home, the
house entered through a rear window by
some burlylous desperadoes, who proceeded to carefully investigate the premises.
A locked vase was torn open and other re-
ceptacles turned upside down, but the fellow
was evidently scared away, as the took noth-
ing with him.

A letter appealed to Chief Lucas yes-
terday for money to take her to Ostell. She
was en route from Nebraska. Her
money and ticket were stolen while on the
train, but the conductor brought her to
Omaha. She had thirty cents in the bottom
of her pocketbook, and the conductor
stopping at the transfer, until her son at
Ostell can send her money to pay her fare.

THE COUNCIL DELIBERATES

In Regard to Using Chemicals for
Extinguishing Fire.

STRANGE HEARTLESS DESERTION.

ceive the Rector—Personal
News—Minor Mentions.

Chemicals vs Reels.

The matter of building a new hose house in
the western part of the city is dragging along,
and beyond the action of the council in granting
the petition of the residents of that locality,
nothing has been done. Even the location
has not been definitely determined, as
the council is waiting for some public spirited
citizen to advance a lot for the purpose. Al-
though no definite action has been taken, it
is tacitly understood by the members of the
council that whatever new apparatus is pur-
chased shall not include a chemical engine.

It is intended to purchase another double
hose reel. It is agreed by them that those
reels are good under all circumstances, but
that a chemical is of no account except in a
hazardous fire. The members of the council
have been in touch with the fire department
and the fire chief, and the latter has advised
them that a chemical engine would not be extinguished easily,
without assistance, when reached by the department.

The city is already well supplied with
reels, much better in fact than it is with
chemical engines. For the reason that
chemical engines are desired by many of the citizens,
who argue that it would be of untold
benefit in case of a fire in those parts of the
city where the water supply is not of the
best. In these cases the reels are entirely
useless, as the water pressure within them has
been demonstrated several times, within
the past year, especially in the vicinity of the
Omni-potent, that the Omni-potent has probably prepared
another home for her.

It is probable that a petition will be ob-
tained in day or two asking the council to
purchase a two-horse chemical engine of the
proposed reel. The council is not exerting
itself to carry the matter through to prompt
completion. It is probably not their intention
to make the changes this season, as it will
require two months to complete a reel,
which will be required for the chemical engine.

It is also probable that the
ordinance will be passed in October.

For the record, the council has received a
letter from Dr. T. J. Mackay, rector of St. Paul's,
inviting him to attend the reception
held in his honor this evening from 6 to 9
o'clock at the residence of Mr. C. D. Bloomer,
123 Fourth street, to welcome him on his return
from his three months' vacation. During
this time he has been spending his weeks in
Touraine, going from there down to St.
Lawrence to Prince Edward's Island. From
Prince Edward's he went to Nova Scotia,
visiting Halifax and other places of interest.
He also spent some time in Boston and New
York, from which places he has been making
a tour of the country westward and vicinity. He
returns to his work feeling refreshed by his
summer's travels and looking very well.

The Woman's Exchange of the Pres-
byterian church will give a social enter-
tainment this evening at the house of
Mrs. Blaine, 716 Willow avenue.

Sad Intelligence.

Yesterday Mrs. P. M. Pryor received a
telegram sent by H. W. Tilson, from Janes-
ville, Wis., conveying to her the sad intelligence
that her daughter, Mrs. L. J. Jones, is
very ill and sinking fast. She left last
evening, hoping to reach there before it was too late.
Mrs. Pryor has been home but two weeks, having found it necessary to spend
the summer with her parents, who were considerably
impaired by age. Her daughter died in
the death of their daughter Miss Emma Jesslyn, in this city last spring. Mrs.
H. W. Tilson, the other daughter, went there
with her husband about ten days ago, intend-
ing to bring back the father and mother to
make their home with their daughters in
this city. No news comes to date, but it is
probable that the Omni-potent has probably prepared
another home for her.
