THE OMAHA DAILY BEE: SUNDAY, SEPTEMBER 30, 1888,-SIXTEEN PAGES.

Have you noticed the improvements going on in the western part of the city? A ride in that direction will prove a great surprise to anyone who has not been through that section for the past month or so. Farnam street is now graded to the city limits and sidewalks laid nearly to the Belt Line railway. Cuming street is being paved to Lowe Avenue, and graded and sidewalked to the city limits. The growth of Omaha is decidedly westward, and new houses are being erected in most every quarter.

Dundee Place lies just outside the city line, and is bounded on the south by Dodge street, extending north beyond Cuming street. The development of this property has attracted buyers and home-seekers from all parts of Omaha, and many from other places, who purpose making their future homes here.

Will be THE place for comfortable and fine homes, no house can be built to cost less than \$2,500 while others will cost many times that amount. There will be no business of any kind in the residence district, and no nuisance will ever be permitted under penalty of a forfeiture of title.

Dundee Place will not only be a most select and desirable place for a home, but will also prove one of the most profitable investments to those who buy the ground now, while the price is low and choice lots can be secured,

Farties who wish to build and desire a loan, can be accomodated with liberal building loans. We are pleased to show this property at any time. Plats can be obtained at our office.

NEW IMPROVEMENT COMPANY.

Visitors at the State Fair Worked By a Couple of Frauds-Supreme Court Notes-Lincoln Notes.

LINCOLN BUREAU OF THE OMARA BEE, 1029 P. STREET, LINCOLN, Sept. 29.

Mr. B. H. Goulding, of Kearney, filed articles incorporating the George W. Frank Improvement company with the secretary of state yesterday afternoon. The articles show this to be a corporation of great importance to the citizens of that place and surrounding country. It is the immediate outgrowth of the water power created there about a year ago, and the company comprises some of the best known men of that city, and an eastern syndicate of great wealth.

This corporation began its existence on the 18th day of September, and will continue until the 30th day of June, 1987.

The scope of the business of the company is best stated in the language of the articles, as follows:

"Buying, selling, renting and dealing in real estate and lands; city, village and town sites; town, village, city and other lots; lay Ing out, platting, improving and developing town, city and village sites and lots. "Buying, selling and dealing in, improving

and developing farms, mill sites, water privi loges and water powers. "Building, operating and running mills of

all kinds, particularly flour and grist milts flax mills, oil mills, sorghum mills, saw mills, planing mills, woolen mills, plaster mills, paper mills and woolen manufactories, and boying, selling and dealing in the pro ducts of all such business or any of them.

"Buying, selling and dealing in grains and all kinds of nericultural, horticultural and farm productions. "Buying, selling and dealing in horses

mules, cattle, hogs, sheep and other live stock. "Manufacturing, buying, selling and deal-

ing in bricks, lime, agricultural machines, tools, implements and utensils. "Building, leasing or renting abbative and packing houses for beef, pork or any kinds of

LOOK OUT FOR THEM. During the state fair an old couple hailing from St. Joe, Mo., did the city and fair from St. Joe, Mo., and the city and fair visitors promiscously, attended by a little girl, who held the cup for the charites of the public that chanced to pity the aged and blind. It is not drawing it too strong to say that no greater frauds ever visited the city. The authorities of St. Joe say that while the couple in guestion are old and blind they couple in question are old and blind, they possess a fortune of not less than \$30,000 and do not need aid from any one. And, moreover, do not need aid from any one. And, moreover, they resort to ways that are dark to gather in the nickels and dimes. While here the little girl who was with them was kidnapped, stolen from her home and forced to hold the "charity cup" while the old man played the vichin and the old woman did the song act. The parents getting wind of the whereabouts of their little daughter wired the police to send her home, but the old frauds had left the city. However, a day or two ago, they put in their appearance here again, and are

now begging from corner to corner and street to street. The public will do well to The company expects to put a traveling man on the road with a full line of samples at that give them a wide berth. They do not need aid. They are better able to care for the poor than to be cared for. They are big and time. A great deal is expected of the plant by the citizens and business men of the city. The Hand hardware company received their first invoice of goods this morning. This company promises to be one of the most extensive wholesale hardware dealers in the fat, from fifty to sixty years of age and their identity need never become a matter of ques-tion. R. F. Lytle of Lincoln is at the Murray. The relator further states that an application for removal must be to a state court, and that said court must have something to say before it can be robbed of its jurisdiction. D. S. Elliott of Sioux City is a Murray guest. J. P. Smith of Scribner, and H. P. Foster of Lincoln, are at the Millard. If this position is incorrect it is argued that the present law is a violent departure from all the other re-moval laws, especially where the ground for such removal is local prejudice. From the point of view alike of the scholar, the student and patriot, a work which judiciously presents the representative thought in American literature from the first colonial days to the present time, a period of two and threequarter centuries, is a contribution to CITY NEWS AND NOTES. made its literature. The greater part of all that has been hitherto done to supply this knowledge has not been theroughly and capably done. It is not wanting in the evidences of research and industry, but in most other condi tions it is defective and unsatisfactory. What was required was a work that should place before the reader select and character-

istic examples of the literature of the country, presented in chronological arrangement, and chosen for the genuine interest of their style or subject matter. Such a work we now have in "A Li

brary of American Literature.' com piled and edited by Edmund Clarence Stedman and Ellen Mackay Hutchison and published by Charles L. Webster & Co., of New York. This work will be in ten volumes and the labor of its preparation has already consumed five

years. We have the authority of so competent and independent a critic as Mr. W. D. Howells that the labor has been most judiciously performed, and no one will hesi-tate to cocepi this verdict who has any knowledge of the high literary qualifi cations of Mr. Stedman and his peculiar fitness for a task of this kind, while the accomplished lady who has been his colaborer occupies a place in the front rank of literary students and critics. Their work is a monument to their ability, industry and discrimination which will stand, for generations and has deservedly received the unqualified commendation of the most capable judges of its merit. We cannot present such a review of this most valuable work as its worth would justify. He will also be enabled to discover in the process of literary evolution in this country, which has really been very rapid, the growth of social and political changes, as well as trace the advance morals and religion away from the hard and severe conditions of the early colonists. It is replete with instruction that cannot fai to deeply interest every intelli-gent American, and which must must be considered essential to a finished edu cation in this country. The work is finely printed and bound, and is illustrated by 150 portraits of authority twenty of which are steel. It should public have a place in every private, public and school library, and indeed, no library will hereafter be complete without it.

The republicans of the Ninth ward had pole raising last night on Farnam street, near Thirtleth. They were assisted by the Lancers and the Seventh ward clubs, who Lancers and the Ecventh ward clubs, who turned out with uniforms and torches. Speeches were made by Messrs. M. S. Lindsay, John Wharton, W. J. Connell, J. P. Green and J. W. Eiber, and were received with enthusiasm.

The Young Men's Republican club will meet Monday evening at the Millard hotel. Every member is expected to do his duty by being there.

About Bilious People.

London Telegraph: Some people are born bilious, and others have biliousness thrust upon them through the enormous amount of indigestible food-stuffs they consume and the little exercise they take to counteract the effects. Kemble as we learn from Archbishop Trench. used to protest against the consumption of tea and coffee, declaring that they had done more harm to mankind "even than the doctrines of Helvetius." Richardson would, no doubt, not agree with the celebrated actor's advice to 10 substitute Johannisberg and beer for the eastern leaf and berry; yet temperance advocates should not be too sure that their own favorite beverages do not work injury to the constitution in some way they know very little about. There is less drunkenness nowadays than formerly, when beer and spirits were consumed more largely, but there is more heart disease. The sale of temperance drinks has greatly increased. but so has all the tribe of nervous ail-ments. We find the learned lecturer at the Royal Institution bearing his testimony to the ill results which follow on any stimulation of the action of the heart: "In proportion to the unnatural tax inflicted was the reduction of the storage of life, and every luxurious and fast mode of living was a shortener of the natural term of existence." Tes and coffee, therefore, stand at once condemned; so does tobacco; so was a school teacher and had worked at

stand second to "Uncle Tom's Cabin." Then he rumaged around on a dusty shelf, and took down a thick volume, whose colors had faded from original

black to a light drab color, and blowing the dust from the leaves, said that he presumed that book had, next to "Uncle Tom's Cabin," the largest sale of any work of fiction by an American author. Making out the faded letters of the title, it was the "Lamplighter." The book is now almost unknown to the younger generation of renders, but thirty years ago it caused countless tears to flow. It would give Mr. Howells the horrors to read it, and yet more copies of it, three or four times over have been sold than all of Howells books put together. Over two hundred editions of a thousand copies each were sold, and there is even now more demand for it, mainly from persons who read it years ago, and, remembering it with delight, sought it again. "The Lamplighter" was written by a Boston woman, and is a Boston tale. But, though its success was so phenomenal. the author was for many years unknown, and even now her name would be unhabits if it were mentioned.

When Offers Are Scarce.

Chicago Tribune: "If this is you final answer, Miss Jrobinson," the round he picked up his hat and turned to 'I can do nothing but submit. has it ever occurred to you that when a lady passes the age of thirty-seven is not likely to find herself as much sought after by desirable young men to she once was?"

"It occurred to me with sudden and painful distinctness when you offered yourself just now," she replied. "Gees night, Mr. Peduncle."

A Head For Business.

"No," replied the pros-perous young merchant in a business ike tone, "never for more than thirt days." And the old man re quietly to bed and dreamed of his pro pective son-in-law and boodle.
