

THE SOCIAL CLUBS OF OMAHA

A Resume of the Leading Society Sets.

PRELUDE TO THE NEW SEASON.

The Leading Events in Upper Circles During the Past Week—Weddings, Parties and Personal Mentions.

Omaha's Social Clubs.

There is promise of a lively season in social circles this year, and already society people are beginning to bestir themselves and plan dances, parties and other gatherings, while the various social clubs are commencing to awaken to life again after their lethargic condition during the heated term.

Two of the old clubs—the Capitol Hill and the Hyperion—will probably sleep the sleep of the past. The Capitol Hill like its predecessor, the Sans Ceremonie, is growing too large to hold its social sessions at private residences and must either adjourn to the more commodious dance halls or disband. The Hyperion may give a party about mid-winter in memory of the old times, but this will probably be their last gathering. The members of this organization, however, stand high socially and will be gladly welcomed into the various other clubs.

The assembly, of the "Society One Hundred," at present is very quiet, but promise to show signs of activity about Christmas, the time of their usual first party. Last season the club last year was composed of ninety-eight members. It was organized by Luthy Drake, Joseph Garban, and a number of other congenial social gentlemen who conceived the idea of having a social club numbering about a hundred members. The friends of these ladies, however, are not many of the leading society people of the city were invited to join. It was not supposed to include all the best society people in the city, and the idea of making a distinction of the alleged "400 best" in New York city never entered the minds of the originators of the club. Unfortunately some excellent social people, who had been invited to join it got this idea into their head and the organization was stigmatized as the "Society One Hundred." It is better known than its legitimate one. The parties are held at the Millard.

The Omaha Guards promise to play a prominent part in social circles this season. Their bazaar during the latter part of November will bring the society together considerably, and throughout the season a number of grand balls are to be given.

The City club which has been running so successfully for a number of years will give full quota of parties this season at Masonic hall.

The Home Circle, the oldest social organization in the city, is now entering upon its eighth season under most favorable auspices. A short time since it elected the following officers for the ensuing year: President Charles M. Chalmers, secretary James W. Cannon, treasurer F. F. Redman, treasurer W. H. Latley. Executive committee—F. W. Pickens, H. A. Copely and G. W. Bailey.

The club will give a ball with a dance in about three weeks.

The Happy Hours will also give their first dance some time next month at Masonic hall. An even more important event in the past year is predicted for the club. Mr. Scanlan holds the position of president of the organization. George J. Paul is secretary and treasurer.

The Imperial club has already opened the season with a dance at Old Fellows hall on Saunders street. The organization is composed almost exclusively of North Omaha people and owes much of its prestige to its president, Mr. Louis L. Larson, who has played a prominent part in its formation and maintenance.

The members of the Esmeralda club pride themselves on social circles this season. Their career last season was a brilliant one, and they intend to maintain the high standard they have set.

Among the new clubs organized is the W. Olivette, which made its debut a short time since with a ball at Crap Bros' hall. The Crescent, another new club, will be composed of young people just commencing social life, who held at the same place a short time before.

In addition to the clubs named there are a number of others devoted to the art of Terpsichorean, and the various secret organizations, fraternal unions, etc., which are ever active in the pursuit of enjoyment as usual for lovers of the dance.

Flowers for the Tea Table. The extravagant and luxurious use of flowers is one of the features of fashionable life this season, so may be abundantly indulged in for tea table decoration. It is necessary that they be of the most expensive variety. Every bud and blossom is used, from the homely golden rod and clover blossoms to the Esmeralda and iris, which so closely resemble a flock of white doves. A bunch or sack of flowers tied with ribbons is placed at the plate of each guest, or a pretty idea is to suspend over the table a colored umbrella, and to open the end of each rib at the banquet, a guest worked with her name. The cards are often tied to the backs of the chairs instead of being placed on the table. They may contain one of the most interesting and pretentious of the chair, or they may be painted and bear an appropriate quotation. These are read aloud as an introductory subject of conversation, the subject of the quotation is used upon all the cards, the object being to name the author, and the successful guesser is awarded a prize in the form of a bouquet.

Little sachet bags or bonbon boxes often accompany the cards in place of the flowers, and in other cases the cards are in the form of books with painted covers, and the inside bearing the quotation, the date and the owner's name.

Omaha Guards' Bazaar. The Omaha Guards have before them an arduous task, but people who have watched their progress and seen the interest they take in their drill and work do not doubt for a moment that they will succeed. They are "on to Washington." They have reckoned on the support of the ladies, and have not been disappointed. During the week members of the general committee have waited upon the society ladies of the city, and the very generous responses bespeak the pride which Omaha has already begun to take in the coming season of the guards before them. The following ladies have kindly volunteered to act as patronesses of the bazaar: Mrs. Frank Colver, Mrs. J. T. Phillips, Mrs. T. D. Kinney, Barker, Mrs. Fred Nye, Mrs. H. H. Sherwood, Mrs. Metcalf, Mrs. G. Hitchcock, Mrs. Charles Saunders, Mrs. Henry Sternberg and Mrs. Dean Gardner. Other names will be announced later.

It is the grandest dance ever given here. Such was the universal comment on the grand ball given by the Brotherhood of Locomotive Firemen at Exposition hall on last Friday evening. The decorations were elaborate but tasty, and the old hall had a very exciting appearance. In different parts of the house were displayed the mottoes of the brotherhood, "Protection, Charity, Sobriety, Industry." The most handsome and striking device was the fall, which occupied one side of the west end of the hall. It was made up mainly of actual parts of an engine and with its red and white headlight looked real and convincing about to blow its way through the dances. The decoration committee who put up this handsome and ingenious affair consisted of the following: T. D. Kinney, William Miller, William Anderson, Thomas McCann, J. D. Behrens and J. Carmody.

The spacious hall was thronged with guests and the scene was brilliant and inspiring. The dancing programmes were in keeping with everything and will be treated as beautiful souvenirs of a joyous event. It was nearly 3 a. m. before the hall was deserted.

George Roberts' Birthday Party. Mr. and Mrs. G. W. Roberts gave an elegant dinner party at their home in Benson Place, on Monday evening, in honor of their son George, who reaches his majority on that day. The dinner was an elaborate one, and

KELLEY, STIGER & CO., Corner 15th and Dodge Sts.

Black and Colored Silks.

FAILLE FRANCAISE, PEAU DE SOIE, SATIN RHADAMES. All of our \$1.35 Black and Colored Faille Francaise Silks at \$1.00 per yard on Monday.

At \$1.15 Per Pair EVERY PAIR FITTED.

Take the Dodge street cable car line from the Union Pacific depot to our store. KELLEY STIGER & CO., COR. DODGE AND FIFTEENTH STREETS.

WEDDINGS

Mr. Charles Gordon, of Fort Laramie, Wyo., and Miss Margaret W. McGinty, of Pittsburgh, Pa., were united in marriage at St. Philomena's church, this city, by Rev. Father McCarthy on Monday, October 8.

The happy couple occurred at Mrs. McClinty's house on Forest street, Thursday afternoon at 8 o'clock, and was witnessed only by the immediate family. The bride was a young lady of unusual beauty. The ceremony was quite irresistible. Rev. F. J. McLaughlin performed the ceremony. Miss Lizzie Virtue was the maid of honor. The bride and groom departed for Omaha, where they will live.

At Long Pine on Tuesday evening last occurred the nuptials of Miss Ada Winter and Bernard E. O'Neil. The ceremony took place in the Congregational church in that place, which was crowded with invited guests, and the event proved the grandest one of the season.

Miss Carrie M. Atkins, daughter of Mr. Charles Atkins, was married to Mr. W. E. Phillips, of Galesburg, Ill., on last Wednesday at 2 p. m. The wedding occurred at the home of the bride's parents, 159 North Eighteenth street. The bride wore a white silk entree with diamonds. Mr. and Mrs. Phillips will make their home at Galesburg, Ill.

General Gossip. J. J. Johnson is in Chicago. D. Soper left for Chicago Monday. J. W. Tillson returned from the east Monday.

A Careful Politician. Chicago News: "My dear sir, said the footpad to the citizen, 'as you are perhaps aware, it would not be lawful for me to discharge this revolver at you and then to search your remains for valuables. However, if you choose to make a voluntary contribution to the funds of the Sandbaggers' Campaign club I will accept it with pleasure.'

A Suggestive Canon's Suggestion. A Montreal Gazette: Some New England papers complain that, while the law provides a maximum penalty of fourteen years for his offense, Pitcher, of Providence, was only given seven. If Canadian sentences do not suit our shores, let these contemporaries they should keep their remarks at home and sentence them themselves.

The Colors Not Complimentary. Texas Siftings: "How are you and your wife coming on?" asked an Austin gentleman of a colored man. "She has run me off, boss." "What's the matter?" "I is to blame, boss. I gave her a splendid white silk dress, and den she got so proud she had no use for me. She said I was too dark to match the dress."

FURS! FURS! FURS!

Largest Stock in the City, Comprising Fur Trimmings, Muffs, Fur Sets, Capes, Etc.

In almost every desirable and fashionable kind in the market, including ALASKA SEAL, BEAVER, BLACK MARTEN, BLACK LYNX, BLACK BEAR, SKUNK, BROWN BEAR, MONKEY, & C., & C.

ECHOES FROM THE ANTE-ROOM

Knights of Pythias Close Their Doors to Saloon Keepers. PROCEEDINGS OF GRAND LODGE.

Reunion of Ancient Order of Workmen—New Lodges and Social Sessions—Property of the Uniform Rank.

K. of P. Grand Lodge. The session of the grand lodge closed in Fremont last week was in many respects the most important and fruitful of good results in any yet held in the state. There were nearly a hundred members in attendance and determined upon, but no date was set. It is not likely that the engagement will be held before next spring.

The committee on revision of constitution, consisting of Bros. J. S. Shropshire, E. E. French and J. J. Meneilly presented their report which was accepted with one exception, which exception consisted of a clause providing for the restricting of the state which would reduce the grand lodge to about half its present size.

The per capita tax was reduced from 50 to 30 cents semi-annually. There was a very spirited discussion of the old question of the admission of saloon keepers, which ended in a victory for the committee, and the adoption of a clause reading as follows:

"Every applicant for membership by initiation must be a white male, over 21 and under 60 years of age, of good moral character, sound in health, free from mental or physical infirmities, a believer in a supreme being and not engaged in saloon-keeping or the sale of intoxicating liquors or other similar business, and be able to earn the means necessary for the support of himself and family."

Another important change which was hotly debated on both sides and finally passed, was revision of the clause making it lawful for the grand lodge to say that subordinate lodges may make the fee for the three degrees any sum not less than \$10, so as to read "not less than \$20."

The new grand lodge seal designed by J. E. French was adopted on motion of J. J. Meneilly. A resolution was introduced by J. J. Meneilly passed, appropriating \$50 for the purchase of a past grand chancellor's jewelry, to be presented to Richard O'Neil, the retiring officer.

The report of the grand keeper of records and seals was very interesting and encouraging. In the past two years the increase in the number of lodges and members has been greater than in any state in the union. Following is the gist of his report:

Total number of active lodges, 109. Total membership July 1, 1888, 4,747. Total membership July 1, 1887, 3,380. Net increase during year, 1,367. Total number of new lodges instituted during the year, 16. The lodges showing largest net increase during the year are as follows:

Table listing lodge names and net increase during the year. Includes Forest, No. 24, Omaha; Star, No. 2, Ashland; Capital City, No. 68, Lincoln; Oriole, No. 70, Omaha; Enterprise, No. 79, South Omaha; Marathon, No. 82, Omaha; St. Charles, No. 84, Omaha; Danamoor, No. 83, Chadron; Antlers, No. 72, Elkhorn.

The lodge showing the greatest decrease in membership is Tecumseh, No. 17. Loss, 17 members. The total receipts of the grand lodge for the past year were \$3,322.45; the balance in the treasury is \$3,407.65.

The following lodges were elected for the ensuing year: W. H. Love of Lincoln, grand chancellor; W. S. Hart of Omaha, grand vice-chancellor; Byron W. Woyliver of Pierce, grand prelate; Charles G. Alton of Ainsworth, grand master of exchequer; E. E. French of Omaha, grand keeper of records and seals; Omer L. Green of Kearney, grand master at arms; G. H. Green of Genoa, grand inside guard; E. W. Hoyt of Long Pine, grand outside guard.

Omaha was selected for the place of holding the next annual meeting. Pythian Brigade Entertainment. W. L. Dayton, brigadier general of the uniform of the Knights of Pythias in this city, was in town Wednesday night and conferred with local members of the order with respect to the holding of a brigade encampment. The project was warmly supported and determined upon, but no date was set. It is not likely that the encampment will be held before next spring.

Sergeant Meredith of Ashland, First regiment, Mayor J. A. Sawyer, Jr., second regiment; Captain E. M. Thatcher, Third regiment; Mayor Dale, Fourth regiment and Major Spencer of the brigadier general's staff were appointed a committee to perfect arrangements.

The Saloon Keeper Question. A prominent Pythian official says: "The status of the grand lodge has gone forth. Saloon keepers cannot enter the ranks of the Knights of Pythias. The exact text of the article in the constitution as adopted at the session of the grand lodge at Fremont appears in the report of the proceedings above. It is clear, explicit and unequivocal, all reports to the contrary notwithstanding. No present member of the order in Nebraska may become a saloon keeper or bartender without incurring the penalty of expulsion from its ranks. The considerations which actuated those of us who favored the amendment were sufficient for the grand lodge and need no repetition. It must not be supposed, however, that this is to be in any sense retroactive. Those now in the order will remain unaffected in any particular and no fault is found with their 'moral character' so far as saloon-keeping is concerned."

The Encampment also passed some very stringent rules on this saloon question which cannot enter the ranks of the Knights of Pythias. For instance, to enter the doors of any saloon, gambling house or other place where intoxicating liquors are dispensed is to be in any sense retroactive. This is a necessity just now—it is merely precautionary.

"That article in the Herald, by the way, was all wrong and you cannot make your contradiction too strong."

L. O. O. F. The order in Savannah, Ga., owns a temple worth \$75,000. The brethren of Macon and Griffin, in the same state, also owns their hall. The increase of lodge members in 1887 was 25,556; of encampment members, 4,044. The value of the military outfit of the Patrons of the Union is \$69,824.12.

At sessions of grand bodies a ribbon may be worn of the highest color to which the wearer is entitled, and attached thereto a jewel or jewels. This will be recognized as "regalia" in lieu of that heretofore required. All laws requiring officers in subordinate lodges to be in possession of the degree of Rebekah have been repealed, and hereafter said degree can only be conferred in Rebekah lodges. Next Wednesday the Grand Lodge of Nebraska convenes in this city. The programme as announced last week will be carried out with additional features. Great interest is being manifested by local Odd Fellows, and nothing will be left undone to provide for the suitable entertainment of the guests.

The Uniform Rank. Spur: The Uniform Rank is not only keeping pace with the subordinate lodges, but lunging ahead of them in its remarkable progress. No less than seven or eight divisions

are in course of organization in the state, some of which are nearly ready to be regularly instituted. Notably among these about to be instituted, is a division out of the enthusiastic new lodge at Staton, the uniforms for which the uniforms has already been ordered. Officers are chosen, the lodge is organized at Staton, Broken Bow, Wynonia, Shelton, Madison, Springfield, Nonporel, etc. Recently new divisions have been instituted at Chadron, Broken Bow, and other points. By the large increase of divisions the Nebraska brigade will be enlarged by the addition of two new battalions which are soon expected to develop into full ten company regiments. Although as yet we have had no report of the organization of these battalions, still their organization is so rapid that time allows pushed according to the official orders received for the same.

A. O. U. W. Reunion. The cold raw wind which blew all day was a serious drawback to the enjoyableness of the United Workmen's reunion, and made necessary the abandonment of the picnic project. A bounteous lunch, instead, was spread in the hall of the order, in the Barker block, and the workmen, in attendance with their lady friends, were not slow to show their ability to make the best of circumstances.

At 4 o'clock in the afternoon the procession formed at Fifteenth and Farum streets. Past Grand Master Workman S. R. Patton, of Omaha, acted as grand marshal, with the following as grand marshals: George Webber, S. Larson, G. M. McBride.

The following was the order of the procession: Grand Marshal and Staff. Ancient Order of United Workmen Band of Lincoln.

Lincoln Lodge, No. 15 of Lincoln. Upchurch No. 15 of Lincoln. Lodge No. 26 of Plattsmouth. Lodge No. 20 of Schuyler. Excelsior Lodge, No. 14 of Lincoln. Same No. 10 of Crete. Union Pacific No. 17 of Omaha. Herman No. 36 of Omaha. Capital City, No. 19 of Omaha. Omaha No. 18 of Omaha. Concordia No. 15 of Lincoln.

Great City Lodge, No. 24 of Omaha. The line of march was through the principal streets. The column then moved to Goodrich hall, on Saunders street, where it disbanded.

CHANGES AT NIAGARA. Retrosession of the Falls in the Past Forty-six Years. Dr. Pohlman, in an address before the Society of Natural Sciences of Buffalo on "Recent Changes in the Falls of Niagara," said, as reported in the Courier:

"The first scientific survey of the falls was made in 1842 by Prof. James Hall, the state geologist of New York, and all our exact knowledge dates from his maps. Prof. Hall gives the height of the American falls at 167 feet, and of the Horseshoe fall at 158 feet, counting the elevations from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the American falls differ 40 feet more or less from the Horseshoe fall, and the latter from the water's edge on October 4, 1842, and he admits that this starting point can vary from 4 to 20 feet with the rise and fall of the water in the river below the falls, and that the
