

AN OFFSET FOR SACKVILLE.

Is Cleveland Preparing Another Anti-Canadian Bombshell?

TO CAPTURE THE IRISH VOTE?

According to an Omaha Man He Needs Something Very Badly to Save His Failing Cause—Washington Gossip.

Growing Desperate.

WASHINGTON HERALD THE OMAHA EER, 513 FOURTEENTH STREET.

WASHINGTON, D. C., Oct. 28.

Evidence multiply that the administration is very much worried over the Sackville letter and that strenuous efforts are to be made to prevent the further stampede of voters from the democratic ticket on account of that unfortunate occurrence by the kindly intentioned British minister.

In the first place every effort of the administration and its friends is being used to show that Mr. Otis was the instigator of the original Murchison letter and that it was a put up job from the start to entrap the British minister.

This, of course, would have no weight even if it were true but Otis himself says it is not true and that Murchison was a bona fide British minister.

It is also being made known to the anxious for information from the representative of his former home government. Otis is very well known here. He was at one time foreman in the government printing office and he is so thoroughly good in every respect that there are men here who are willing to stake their lives on his word.

With regard to the receipt of this now celebrated letter is absolutely true in all details. The administration can scarcely expect to undo the damage by simply requesting the recall of the British minister. If Cleveland and Bayard were much shocked and outraged over the exposure of the plot by that official as they make it appear, why did they not Sackville's passports would have been sent to him without delay. The truth is that it was only after they were cognizant of the damage that had been done that they thought it necessary to disregard the word "private," and call the attention of the British home secretary, thereupon, Minister Phelps, to the minister's act. It is said here that a coup is to be sprung this week as a direct outcome of this letter incident. A very high official of the government said to-night: "Prepare for a surprise. I am informed on most reliable authority that Cleveland is preparing a proclamation in regard to the Sackville letter which will astonish those politicians who have claimed that he has no desire to retaliate upon Canada." If President Cleveland is guilty of such a thing at this time he will be open to the charge of the most flagrant demagogism and his proclamation, coming as it does, later, will certainly do him much more damage than it can possibly do good.

Mr. A. P. Cunningham, of Omaha, at present an officer of the United States senate, has just returned from an extended trip through New York and Indiana. Mr. Cunningham is an Irishman by birth, and is one of the many forcible speakers among the natives of the Emerald Isle who are so prominent in the observer and his examination of the situation leads him to predict the election of the republican ticket next year beyond peradventure.

To your correspondent Mr. Cunningham says that the republicans will poll 110,000 votes in the city of New York, and Harrison and Morton will have at least 100,000 votes in Indiana. Mr. Cunningham says that he has seen Erhardt's chances for election to the mayoralty of New York are excellent and unless there is trading in the office he will be elected governor of that state.

He will not poll as many votes in the State as large as Harrison for the reason that Hill has no liquor men with him and they do not all support Cleveland.

"What do you base your estimate upon?"

"The sentiment among the Irish-American voters. There are thousands of them all over the country who voted the democratic ticket in 1884 and in all previous elections, who are to-day with Harrison and Morton."

"What do you gather of the situation in Indiana?"

"Hovey will be governor by a majority of 8,000 or 10,000. Nothing can beat him. Harrison's majority will be about a thousand less."

"Did you find that the Sackville letter has had any effect among the Irish-American voters?"

"It certainly has had a decided effect in convincing them that the British government is anxious to see Mr. Cleveland re-elected, but the Irish voters had largely made up their minds long ago to support a ticket before that letter made its appearance, so that its effect had been discounted."

The M. LAURENCE MILK CASE.

It is expected that the United States supreme court will to-morrow rule upon the motion of the state of Minnesota to dismiss the cases appealed to this court by the Chicago, Milwaukee & St. Paul railroad company, known as the Laucke and Laucke cases. The cases arose out of the action of the Minnesota railroad commissioners in fixing the rate of tariff on milk carried by the road named into the states of Wisconsin and Minnesota. The company held that the commissioners had no right to arbitrarily fix the rates and the application to the state courts for relief. The cases were defeated and the action of the commissioners was sustained in each of the courts to which the cases were carried in appeal. The cases were appealed to the United States supreme court. Two weeks ago the attorney general of the state submitted a writ of habeas corpus and appeal to the supreme court on the ground that the supreme court had no jurisdiction, as the rates in dispute apply solely to traffic within the state of Minnesota. The decision will settle the question as to whether or not the United States courts can pass on the legality of an act of the state railroad commissioners when their acts have no bearing upon interstate rates.

A BOOBY INDIAN CLAIM.

One of the gentlemen holding office under the present administration is D. R. Risley, who is United States marshal for southern California, with headquarters at Los Angeles. Some one interested in the record of the demagogical officials has dug out an old report relative to the claim of Frank D. Yates and others against the government to pay them \$14,675.85. This money was earned by them in removing the Indian property and supplies from the Whistons agency.

Yates and the men who actually did the work of moving the agency acted in good faith, so far as I was able to learn from my

THE MANITOBA TROUBLE.

A Crisis With the Government Seems Imminent.

WINNIPEG, Oct. 28.—[Special Telegram to THE EER.]—A great sensation was caused here last night by the publication of the following: "It has been learned from undoubted authority that Lieutenant Governor Schultz, although visited a week ago to call the legislature for the dispatch of business next Monday, has so far declined to accept the advice of his constitutional advisers, thereby forcing a crisis on the government, as it is understood that members of the cabinet contemplate immediate resignation. The government, it is learned, were anxious to have the house in session to assist them in securing the necessary legislation to back up their position on the railway question, should the injunction be dissolved. His Honor was advised some time ago to summon the house, but so far the session has not been followed and the proclamation is still unissued. If the government resigns, as seems to be the present intention, the province will be in a very bad box, as a dissolution of the legislature would likely follow and Manitoba could not count on having railway competition blocked for a year or two."

The argument on the railroad injunction case was heard in yesterday's session. It will give his decision Monday. It is said the Canadian Pacific solicitors have grounds for application for another injunction should the one before the courts be dissolved. It is quiet at the Pembina branch crossing, but all preparations are complete for active resistance any hour should the injunction be dissolved. During yesterday afternoon about thirty men, under the direction of General Superintendent Whyte and Assistant Superintendent Murray, went to the work on the dead engine on the side of the track, across the proposed intersection of the Morris-Brandon branch, and the engine in charge but the engine is sunk up to the axles and is immovably fixed.

THE CLEARANCE RECORD.

The Financial Transactions of the Past Week.

BOSTON, Mass., Oct. 28.—[Special Telegram to THE EER.]—The following table compiled from dispatches to the Post from the managers of the leading clearing-houses of the United States, shows the gross exchanges for the week ended October 27, 1888, with the rate per cent of increase or decrease as compared with the amounts for the corresponding week last year:

Table with columns: CITIES, CLEARINGS, and Increase/Decrease. Includes cities like New York, Boston, Philadelphia, etc.

NEW YORK, Oct. 28.—[Special Telegram to THE EER.]—The police commissioners are in a serious dilemma owing to the heavily increased registration of voters in the city.

How to hold the entire city within the legally prescribed hours is a puzzle. They added forty-four election districts this year, making 586, against 512 in 1887. But the addition of voters has been so excessive as to prevent a poll of the vote on election day.

In the Seventeenth election district of the Twenty-third assembly district, James was enrolled during the first three days of registration, and in the thirty-second district of the Twenty-second assembly district 73 voters were registered with strong probability that the grand total will reach 900. This excess is said to be due to the aggregate of the newly built sections of the city. The law prescribes that 500 poll shall be kept on record as well as the aggregate of the different districts. During that time, if the voting is carried on without delay, one man can cast his ballot each minute, so that 600 voters could be registered in an hour.

During that time, if the voting is carried on without delay, one man can cast his ballot each minute, so that 600 voters could be registered in an hour.

SACKVILLE WEST MUST GO.

A Democratic Conference Seals the Minister's Fate.

CLEVELAND ASSERTS HIMSELF.

And Will Insist Upon His Recall or a Discontinuance of Diplomatic Relations With the British Legation.

West's Recall Demanded.

NEW YORK, Oct. 28.—[Special Telegram to THE EER.]—The Herald says: "Lord Sackville will be recalled within three days or the diplomatic relations between the head of the British legation and state department will be broken off. This statement was made in a despatch from London after a protracted conference between President Cleveland, General Patrick A. Collins, of Boston, and John Doyle O'Reilly, of the Boston Pilot, yesterday. Several other men, high in the confidence of the president, also attended the conference, which was held in Secretary William C. Whitney's home, No. 2 West Fifty-seventh street, before Mr. Cleveland went to view the parade. General Collins and Editor O'Reilly came from Boston expressly to see the president touching the Sackville letter, and to discuss with him the provisions of the republican senate extradition treaty, which makes it possible to extradite the objects of her sentence. It is a long and interesting, and both Boston men left satisfied that Cleveland would have no further relations with Lord Sackville. This is what a man who saw Mr. Cleveland and talked with him said: "The president, while he will act conservatively and will not break off relations with Great Britain, will have no further intercourse, nor will the state department, with Lord Sackville. The British minister committed an unpardonable error when he wrote that letter. He had not the smallest right to do so, and it is a thing Mr. Cleveland finds, and so does every member of his cabinet, that Lord Sackville has practically characterized the president as a liar. The minister's letter admits that he had stolen from the aggregate of \$80,000. The woman was 63 years old, and has three children, to whom her property will revert."

Did the Bluff Do It?

A New Theory Regarding the Wedding Feast Poisoning Case.

MINNEAPOLIS, Minn., Oct. 28.—An impenetrable mystery still hangs over the strange case of poisoning on the Bohemian flats. All the theories that have been advanced have failed adequately to explain the circumstances that surround the strange affair. Every circumstance is now being scrutinized, and every circumstance seems to throw a new light on the real motives for the terrible crime. It is now suggested that Mrs. Martin, the three days' bride, was jealous of her sister and cousin, and attempted to dispose of her rivals in this terrible fashion. Then, in a fit of remorse, she attempted to poison herself. This theory is supported by the finding of the "Rough on Rats," which was found in the kitchen, and the fact that Mrs. Martin is known to have purchased the box of poison at a drug store. The poison which the bride took yesterday, if she did take any, was so slight in quantity that it only served to make her sick, and by evening she was well as ever. The different members of the family are all silent and uncommunicative.

PLACED THE BONDS.

The Omaha Southern Road to Be Completed Within a Year.

TOPEKA, Kan., Oct. 28.—[Special Telegram to THE EER.]—Messrs. Hoover and Galloway of Dodge City, who have been in New York City for the purpose of negotiating the bonds of the Omaha, Dodge City & Southern railroad, have returned and were in the city today. They state that they succeeded in placing the bonds, and that the road will certainly be built. The route contemplated is from Omaha direct to Dodge City and south to connect with another road, probably the Denver & Pacific, which will afford a great north and south line. Such a line would prove a strong rival of the Santa Fe and also of the Rock Island, which are the two main lines of the country. The projectors of the scheme say that the material has been purchased and the work is now being pushed forward. They expect to see the road completed before the end of next year.

The Car's Narrow Escape.

ST. PETERSBURG, Oct. 28.—The minister of the interior today received a telegram from the minister of the imperial court stating that five minutes before the czar's train arrived at Kutais, en route from Tiflis to the Black sea, a Kouban cosack, disguised as a peasant, was arrested at the station for having on his person several hand explosives and some poison in glistening capsules. When arrested he was found to be a member of the South Russian Revolutionary society. Other members of the society have been arrested at Simferopol.

The Yellow Fever.

DECATUR, Ala., Oct. 28.—The mayor has issued the following to the people of the country: "We are sorry to hear that some people and 1,000 colored men are now out of supplies. We appeal to the charitable people of the whole country for assistance for the next three days."

Discovered a New Lake.

ZANESVILLE, Ohio, Oct. 28.—Count Teleki has discovered a lake, which he named Basso-narok, due north of Lake Beringo, extending from latitude 2:10, north, to 5, north, lying to the westward of Jken Sambara and Basso-narok. Two large rivers flow from the north and west enter the northern part of the lake.

Clifton & Co.'s Liabilities.

CHICAGO, Oct. 28.—It has been ascertained that Clifton & Co., whose failure was the heaviest resulting from the Hutchinson wheat corner, have liabilities of \$230,000, with assets of only \$50,000. The deficit is much larger than was expected.

WORKING FOR CLEVELAND.

Phil Kearny's Son Sends Strange Circulars to Old Soldiers.

NEWARK, N. J., Oct. 28.—John Watts Kearny, of this city, the son of General Phil Kearny, was today circulating a circular valiant service for his country in the rebellion. John Watts is called "general," although he never took part in an engagement. The only title he is legally entitled to is that of colonel, because he is on the staff of the democratic governor, Green. John Watts is a member of a fine rank and file. He has just sent a circular addressed to the surviving members of his father's brigade, and to veterans in general, that for consent and presumption surpasses anything yet attempted in this campaign. The circular incloses a speech defending the president's pension votes, and asks old soldiers to support General Kearny, and because Phil Kearny would, if living, favor Cleveland. These circulars are being extensively distributed, and have made scores of veterans indignant. They will act as a boomerang on John Watts and the democracy.

Shot by a Discarded Suiter.

LIVERMORE, Mass., Oct. 28.—Bill Short, a miner, and fatally wounded Mrs. Alma Barnes, a widow, last night. The shooting occurred at a dance, and was caused by a refusal of the woman to allow Short to escort her home.

Foolhardy Women.

CLEVELAND, Oct. 28.—Mrs. Jackson and Miss Nellie Norris poured gasoline on the kitchen floor to-day to kill roaches. It ignited, and it was some time before the fire was extinguished. Both women were fatally burned.

An Archbishop Resigns.

LONDON, Oct. 28.—The archbishop of Carlisle, who approved the Milan-Atlanta divorce, has suddenly resigned on the plea of ill health.

A Big Fire in Pittsburg.

PITTSBURG, Oct. 28.—Ackerman's axle factory and the Farady Carbon works burned to-day. Loss, \$60,000; fully insured.

A WEALTHY VIXEN.

Mary Ann Irvine Died in Squalor Although Worth \$35,000.

STOUT FALLS, Dak., Oct. 28.—Mary Ann Irvine, one of the most noted characters of this section, died last night of heart trouble. During her residence of thirteen years in this vicinity she had proved herself a most generous Amazon, and lived and died in the utmost filth and squalor, leaving thousands of dollars of accumulated wealth. No woman in Dakota, nor probably man was more dreaded by all who came in contact with her than Mrs. Irvine. Vicious, revengeful and mean, she would hesitate to do nothing against the person or property of one who had incurred her hatred.

For years she figured prominently at nearly every term of court as defendant in various charges, such as applying the torch to the property of neighbors who had aroused her passions, threatening their lives, etc. A loaded revolver was her constant companion, and many a man has been made its target.

It has always been believed that Mrs. Irvine had more to do with the murder of Mrs. Eggar than with that of Mrs. Eggar's husband for the crime. She and her husband were intimate, and many circumstances implicated her in the crime. She had started to testify against her, and Eggar himself refused to "swear."
