Charrancoga, Thin, June 27, 1888—Swift's Specific Co., Atlanta, da.—Gentlemen: In the early part of the present year, a had case of blood pidson appeared upon me. I began taking S. S. S. under advice of another, and today I feel greatly improved. I am atilitating the medicine and shall continue to do ountil I am perfectly well. I believel it will effect a perfect cure. Yours truly.

111 West Mixth St.

Columna, B. C. July 7, 1858—The Swift Specific Co., Atlanta, Ga.—Genilemen: I was a great sufferer from mascular rheumatism for two years. I could get no permanent relief from any medicine prescribed by my physician. I took over a dozen bottles of your 8 B. S., and now I am as well as I ever was in my life. I am sure your medicine cured me, and I would recommend it to any one suffering from any blood disease. Yours truly,

Conductor C. & G. R. R.

Conductor C, & G, It. R.
Waco, Taxas, May 9, 1888—Gentlemen: The
wife of one of my customers was terribly
afficted with a leathsome skin disease, that
covered her whole body. She was confined
to her bed for several years by this affletion,
and could not help heavelf at all. She could
not sleep from a violent itching and stinging
of the skin. The disease baffled the skill of
the physicians who treated it. Her husband
segan finally giving his wife Swift's Specific,
and she commenced to improve almost immediately, and in a few weeks she was apparently well. She is now a hearty imsoking lady with no trace of the affletion
eff. Yours very truly, J. F. Skais,
Wholesale Druggist, Austin Avenua

TAMMANY IS TRIUMPHANT.

The Labor Element Voted For Grant and Ignored Coogan.

SUCIALISTS SIT UPON SHEPARD.

A. T. Stewart's Millions Have Melted Away, But Judge Hilton Secured Some of Them-He Beggared . Stewart's Illegitimate Son.

The Cause of Coogan's Defeat. NEW YORK, Nov. 7 .- [Corrospondence of THE BEE. |-The labor party had a chance to obtain the mayoralty, but the miserable showing made by Coogan is sufficient evidence to me that there never can be a real party based upon labor. I believed until Monday last that he would poll 100,000 votes, and he did not poll 10,000 votes, yet he represented labor in his own heart much more truly than Henry George. The truth is, however, that the way parties were divided in New York made it bad policy for the labor men to vote their own ticket since it would simply have given the mayoralty to Hewitt. He, though a good man, is such a crank, and has said so many foolish things about foreigners that it seemed to every foreign born citizen a paramount duty to smash him. The New York World, which is recognized by labor men as keenly sympathizing with them, pointed out the danger of voting for Coogan very strenuously a few days before the election, and then I began to realize that labor would not be victorious on Tuesday. It is not certain either that it was good policy to name a labor candidate for such a position as the mayoralty, which demands something more than good intentions. New York's mayor must be a man who knows everything about municipal finance, and who can smell out suspicious contracts and protect the interests of the taxpayer. Now, honestly, it must be owned that Coogan had served no apprenticeship to that trade, whereas Hughie Grant is a master workman at it. GENERAL NEWTON TRAPPED. General Newton has but one course to

pursue. He must resign. After having written that Grant was not a gen-tleman, or words to that effect, it is impossible that he should remain in office under him. The consequence, there-fore, of his peevish burst of irritation is that the whole control of everything in Manhattan Island has fallen once more into the hands of the Tammany organization. There can be no doubt that the personal campaign waged against Hewitt and Newton with regard to the contract system was got up for that express purpose. Newton occupied an ex-ceptional position, and had he held him-self aloof from the political battle, Tammany, though eager for his scalp, would hardly have dared to take it. Tammany must try to be popular, because there is a past that must be re-deemed. People have not forgotten the days of Bill Tweed, when the public works department was a milch-cow for the Tammanyites. Not a few citizens will feel rather nervous over a return in the direction of such possibilities, and had Newton been capable of self-re-straint there would have been a marked expression of dissent if his removal had been mooted. But Sheriff Grant has been personally insulted by both Hewitt and Newton. Hewitt told the reporters and Newton. Hewitt told the reporters adviser. The statements of an account-that Grant was an ignorant man who ant named Mercer who has examined could not speil, and Newton in an elo-quent periphrasis said that he was not a gentleman. The consequence is that stewart died Hilton resolved to obtain he must go. Personally, I am glad of it, the greater part of the property. There believing him to be immensely over-rated. When he was Major Newton he absorbed nearly twenty-five millions scoffed at Eads' jetty system at the mouth of the Mississippi, and testified before a congressional committee that it was impossible. And on that occasion he took the liberty of insinuating that civil engineers were not

as gentlemanly as army engineers. COLONEL SHEPARD'S CROWNING FOLLY. The editor and proprietor of the Mule in Distress, Colonel Elliott F. Shepard is running Abraham Hewitt very hard for the position of boss crank of New York City. He has an ambition to be a public man, to let the light shine before the world, to mould public opinion, and to make money out of it all. Perhaps he will, perhaps he wont, or as the Irish say in their delightful Gaelic lan-guage, "nabocklish," which is a word not to be translated, but which can best be expressed by winking the left eye violently, sticking the tongue in the left cheek, and pointing gracefully with the thumb of the right hand over the left shoulder. He took it in his head to convert the socialists of New York by an address in the Labor Lyceum, modelled upon his eloquent outpourings to his Sunday school class. He went there and was sat upon vehe-mently by strange men "bearded like the pard," who tore his meek little speech into a thousand shreds, and then enlightened his mind by a few pithy home truths, which this son-in-law of William H. Vanderbilt had never heard before. He had spoken three-quarters of an hour, and seven socialists divided the same time between them, and each one wiped the floor with him. It was not a difficult task for he announced rimself as a socialist of the order of the Carpenter of Gallilee, and the monstrous humbug of such a declaration from a millionaire inspired the bearded men who are prone to consider the Saviour as a good Sansculotte. They taunted him with his fine house and his fast trotters, and asked him if it was not written, "The foxes have holes and the birds of the air have nests, but the Son of Man hath not where to lay his head." The next thing Colonel Shepard did after this humiliating failare was to apply to the Down Town club for membership, and he was promptly blackballed, although it is composed of business men, all of whom have the greatest respect for money in the abstract. But money in the concrete of Colonel Shepard is something ridicu-

ous, for it is a power paralyzed by folly. NO MORE CAR STOVES. Chauncey M. Depew, who has his merits as a railroad man, has a very bright secretary named Duvall, from whom I get occasional points. I asked him whether the New York Central would abolish stove-heating in the cars. instead of answering me he dived down his head and began looking for some-thing in a drawer of his desk. I thought I was to be shot for springing a chestnut upon him, but he reappeared with a card in his hand. "There," he said, there's the whole business." The card

read as follows: "The stove as a means of heating cars the New York Central & Hudson River railroad will soon be entirely abolished. During the past year the officials of the New York Central in charge of the passenger equipment have been actively employed in testing various devices for heating cars by means of steam obtained direct from the loco-motive, and have decided on a system combining simplicity of construction and management with the most satisfactory result. A two-inch iron pipe runs under each of the cars, the connec-

pipes inside each car running length-wise, with branches under each seat. At the center of each of the interior pipes is a key by which the steam from the main pipes can be cut off, thus reducing the temperature of a single car without interfering with others. Since the advent of cold weather all the cars composing the trains known as the New York, Chicago & St. Louis vestibule limited, and the New York, Chicago, Cincinnati and St. Louis fast express trains have been successfully heated by this means. THE GREAT HORSE SHOW. The annual horse show began on

Monday, and is of course a pronounced success. People are there throughout the day, and crowds come in the evening when the jumping takes place. Among the uninitiated the chief interest is felt in the Norman percherons and Norman coaching stallions, though one particular firm, I. K. Dahlmann, does manage year after year to take the chief prizes. We miss this year a famous Percheron that used to get the first prize entirely on account of a very beautiful white mane. But last year the judges rose in their might and declared that a Percheron was for pulling purposes, and that no horse could pull with his mane, so the prize taker did not even get honorable mention. The judicial idea of a Percheron has been confided to me. The horse should be as square as possible and as broad as possible and should not show any fineness at the lions. Next to the grey Percherons with their white manes come the Shetland ponies, and these are nearly all pets of children, and are visited, one may say, hourly, by their young owners. Poules are in many subdivisions, for the class includes animals from the size of a mastiff to horses fourteen hands high, and in the evening leaping, there are ponies classified second time as qualified hunters that make a splendid showing, jumping like cats. In the morning the judges see carriage horses for the most part, and here is where the tug of war comes. What constitutes good trotting action? Is it the artificial climbing action of the high-stepping Cleveland bays from England, or the natural graceful, pow-erful action of the American trotter? There is a tendency to be more and more English every year, and this creates considerable feeling. Colonel Rocka-feller, of the Standard Oil company is the great champion of the American carriage horse, but all the dudes, in-clading little Jack Cheever, the son of the rubber man, are against him. Freddy Gebhard's hunter Leo takes the prize every year for high jumping and ne deserves it. Three years ago I saw him jump six feet and two inches, and after that he jumped over the wooden barrier against which the crowd was pressing, and cleared it, alighting on the other side without doing any damage to any one. He was excited by the music and the shouting and took the barrier for a fence beyond any doubt. Since that time he has been the idol of the public. Fready does not ride him on these occasions, but Freddy's English headgroom does, and he grins with open-faced delight after each jump. Some gentlemen jump their own horses Mr. Zborowski does, and so does Mr. La

Montagne. A. T. STEWART'S MILLIONS. The most extraordinary law suit is being carried on in the Surrogate court about the property of A. T. Stewart. Mrs. Rosalie Butler, a niece of Stewart's widow is endeavoring to set aside her aunt's will upon the ground that she had been deceived and robbed sys tematically by Judge Hilton, her legal the books, are simply terrific and seem to show that from the moment A. T. absorbed nearly twenty-five millions by the most extraordinary measures it is clear that he willingly yielded to every whim of Mrs. Stewart who had mania for making magnificent presents and so involved her in a net that she had continually to borrow money from him for which she paid usurious interest. When she died she was possessed of very little property, and was in Hilton's debt to the amount of a million and a quarter. Hilton owns the Stewart building at Tenth street where business is carried on under the name of Denning, Hilton & Co. Hilton also owns the down town property on Chambers street, opposite the court house, which was the wholesale house in the old man's time, but is now converted into offices. Hilton owns the Grand Union hotel at Saratoga, and the Metropolitan hotel and Nibio's theater. which are together, and the hotel at Thirty-second street and Fourth avenue, which the old man built for a model Woman's lodging house. the old man's wish that Henry Leclair his illegitimate son, should have the hotels, but Hilton contrived to get him in the same net as the widow, and got rid of him. Where he now is, no one knows. During the old man's life time he managed the hotel property admira-bly, but Hilton ruined him, and beggared his family, and they have disap-peared from public knowledge. Hilton grabbed also the old man's property on North Broadway in Saratoga, and has

created an English park there, and has built cottages for himself and his family whilst the rightful heirs cannot get a red cent. It is to be hoped that something will be done, and that this frightful villainy will be thwarted. It was a thing known to all men, but no one could interfere with another man's business, and then besides the newspapers were silent for Denning & Co. were among their heaviest advertisers. An Absolute Cure. The ORIGINAL ABIETINE OINTMENT

is only put up in large two ounce tin boxes, and is an absolute cure for old sores, burns, wounds, chapped hands, and all skin eruptions. Will positively care all kinds of piles. Ask for the ORIGINAL ABIETINE OINT-MENT. Sold by Goodman Drug Co., at 25 cents per box—by mail 30 cents.

Oil Used as Fuel. An editorial in a recent issue of a recent issue of a Cincinnati paper urges the manufacturers of Cincinnati to consider the question of using crude petroleum as fuel. Investigation shows that Cincinnati is behind many other cities in the use of the liquid fuel, which is

found in such abundance in Ohio and within such easy access of that city. Cleveland manufacturers, says the St Louis Globe-Democrat, and uses the Lima oil extensively for fuel, and are even experimenting with good results in the direction of converting it into gas for fuel purposes. Chicago is using 10.030 barreis a day of the new fuel. Even the town of Hamilton, O., has made more progress in this direction than Cincinnati. A gentieman just returned from Hamilton says the number of oil cars he saw on the sidings led him to make some investigations. He found a large flour mill, which is running three 100-horse power boilers with Lima oil as fuel. These boilers required nine tons of coal for a twenty-four hours' run, at \$2 a ton, making \$18 a

The same boilers are run with twenty-eight barrels of oil, costing 50 cents a barrel at Hamilton, a total of \$14.

tion between the cars being made with a metallic joint and a sleeve. This day for labor. The same in shovels, main pipe connects with a system of wheelbarrows, grate bars, etc., for this establishment is estimated by the pro-prietors at \$2 a day, making the total daily expense of oil \$14 against \$23 for coal. The oil is said to furnish one-third more power than the coal, with less wear and tear on the boilers. other factories in Hamilton, boilers are

un with oil made from Lima oil. Nearly every town of any consequence in Ohio uses more or less Lima oil as fuel. In Harrisburg, Pa., a firm that has a contract with the government for furnishing steel for steel-clad ships uses gas from Limit oil for melting steel billets. This firm states that they are able to melt a ton of steel billets from gas made from three gallons of oil and regard it as one of the most im-portant discoveries of the age for the manufacture of steel. There are fifty of these gas plants now in operation, and one is being erected at Johnstown. Pa. Business men who are watching the progress of liquid fuel, believe that within a year 150,000 barrels a day will be used for this purpose.

The Lima Oil company is composed of Ohio oil producers, and is entirely outside of the Standard Oil company, has 200 cars of its own, and every one of the number is kept busy day and night. This company has made contracts to furnish oil in Hamilton, O., for two years at fifty cents a barrel. The amount of this oil that is being produced in Ohio is much larger than the

public generally supposes.

The total output of the wells is not under 1,000,000 barrels a month. When the actual gauges show a less production it is when the large wells are shut in and not allowed to yield up their full capacity. This is the case at this time, owing to the inability of the pipe lines to handle all the oil that could be produced. The Standard Oil company pays the producers 15 cents a barrel for oil at the wells, and the fact that they have now 9,000,000 barrels in tanks in the region is evidence that they believe in its future. The tanks in which the oil is stored are taken down and re-moved from the Pennsylvania fields where so much tankage is no longer needed. The oil is now being used for fuel purposes in twelve states and territories and it is not unlikely to ultimately take the place of coal for manufacturing purposes, except in the vicinity of coal mines.

"The best on earth" can truly be said of Griggs' Glycerine Salve—a speedy cure for cuts, bruises, scalds, burns, sores, piles, tetter and skin eruptions. Try this wonder healer. 25 cents. Guar-

Knew Blaine Was Not English. Philadelphia Record: A Philadelohin business man, recently returned from Europe, relates an incident of Mr. Blaine's visit to London. Blaine happened into the establishment of King & Archer, the well known naval and military bootmakers. No. 21 Piccadilly, W., and asked to see some shoes. Having selected a pair to his liking, Mr. Blaine inquired the cost, at the same time casually remarking that he had been referred to the house by a friend in Lancashire, from which district he had himself just run up to London for a short stay.
"But you are not an Englishman, sir," said the attendant who was wait-

ing upon him.
"And why not?" asked Mr. Blaine. 'Do I not look like an Englishman's And did I not say that I hailed from Lancashire?"

"You may have just come from Lancashire and I do not say that your looks are not English," answered the salesman; "but an Englishman would not have asked the 'cost' of these shoes, sir—he would have asked the

And Mr. Blaine was forced, by the quick discrimination of the London tradesman, to acknowledge his foreign nativity.
