

EVERY REPUBLICAN PRESENT

Arrival of the Tardy Members of the Legislature.

THE SPEAKERSHIP CONTEST

Absorbs Every Other Interest—The Douglas County Contest—New Notaries Public—City News and Notes.

LINCOLN BUREAU OF THE OMAHA BEE

The family members of the legislature are in the afternoon train, and at this writing it is believed that every republican member is on the ground.

The various candidates for speaker are in the lobby, and are putting in a word for themselves at every opportunity.

General Leese, how is it about Agor's including himself on the board of secretaries of the state board of transportation?

"Well, I can see one that he will never get there by my vote. And, further, I can say that another member of the incoming board feels about the matter as I do.

"How about Waring? Will he be continued as clerk?"

"He is a capable man, but so negligent and shiftless that I shall oppose retaining him."

"I have no personal objection. But I shall favor a good Omaha man, if one can be found here who will accept the position."

"I shall go before the legislature and do my level best to have the state board of transportation abolished."

"The following Nebraska men were appointed notaries public this morning by the governor: Charles A. Blyden, Boone county; James A. Grimson, Schuyler, Colfax county; James D. Gaze, Franklin, Franklin county; James P. Hebard, Lincoln, Lancaster county; Albert Thompson, Fullerton, Nance county; Isaac J. Howe, Elletts, Perkins county."

It is said that Governor Thayer may not be able to deliver his inaugural address. In the event that he cannot, the governor-elect, Mr. Webster, is expected to deliver it.

James Fowler, of Alliance, formerly sheriff of Nemaha county, is in Lincoln. He is here to attend the commencement racket at law making.

Hon. Paul Schmitke, of Nebraska City, from whom the train to Chicago is expected to leave, is in the city.

The Direct Route to Washington. The Baltimore & Ohio R. R. is the shortest and most direct route from Chicago and all points in the west to the national capital.

General Brislin in Trees and Tree-Planting. Probably the oldest timber in the world, which has been subjected to the use of man, is that found in the ancient temple of Egypt in connection with stone-work, which is known to be at least four thousand years old.

Children Cry for Pitcher's Castoria. When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

IN THE HEART OF THE DESERT

A Pen Picture of the Beauties and Grandeur of the Shoshones.

RIVERS OF WATER AND FIRE.

The Bridal Veil—Thunders of the War of the Waters—The Eagles Eyrie—Glory and Terror; of the Falls.

A Graphic Description.

Judge Goodwin, editor of the Salt Lake Tribune, has just returned from a visit to the great Shoshone falls, and gives his description thereof below:

The lava beds of Idaho are a marked feature of that territory. Starting near the eastern boundary they extend southwesterly for a long distance and are from 300 feet to 900 feet in depth.

As one watches it is not difficult to fancy that away back in the immemorial and unrecorded past, the angel of love bearded the fact that mortals were to be given existence in a spot so forbidding and wild.

As the red man through the centuries watched the spectacle, comprehending nothing except that an infant voice was snail his ears, and insufferable glories were flashing before his eyes.

But while this river of fire was in flow, a river of water was fighting its way through the lava.

And right between its crumbling and reeling walls transfiguration appears. And such a picture! A river as lordly as the Hudson or the Ohio, springing from the distant snow-capped Tetons, with waters transparent as glass.

Suddenly, in different places in the river-bed, jagged rocks are upheaved, dividing the current into four rivers, and these, in a mighty plunge of eighty feet downward, dash on their way.

Of course the waters are churned into foam and spray, and the white as the garments of the morning when no cloud obscures the sun.

Eighty feet down, the water is divided into four rivers, and these, in a mighty plunge of eighty feet downward, dash on their way.

Over a sheer precipice, two hundred and ten feet to the lava below. On the brink there is a rolling crash of water, dotted here and there, in sharp contrast, with shining eddies of green, as might a necklace of emerald shimmer on a throat of snow, and then the leap and fall.

Here more than foam is made. Here the waters are shivered into fleecy spray, whiter and finer than any miracle that ever fell from an India loom.

But to feel all the awe and to mark all the splendor and power that comes to the mighty falls, one must climb down the deep descent to the river's brink below, and pressing up as nearly as possible to the falls, contemplate the tremendous picture.

The Londoners are said to be in a mild state of wonderment that we make so little of what is really a remarkable invention. Perhaps the fact that England is not plastered over with trusts has something to do with its more rapid introduction than that country.

Gen's Spinal Appliance.

No. 4 Gent's Belt.

No. 4 Ladies' Belt.

Improvement ever made in applying Electricity to the Body for the cure of disease or as a remedial agent.

Man and Machine Sound Recording.

Isaac Pitman, of Bath, England, is seventy-six years old. He invented a shorthand writing by phonography.

From about this time forward "phonography" will mean the use of the phonograph; "photographic," pertaining to the photograph; "photograms," letters written by the phonograph.

Edison is the gold mine for New York reporters. Whenever a New York man wants to make up a special article and has no subject he runs over to Edison's place and the old man fills him up with all sorts of startling news.

Made a Cheap Coffin for His Daughter. A Wilkesbarre (Pa.) dispatch of December 29 to the Pittsburgh Dispatch says: "A goodly number of Hanover township, this county, are greatly excited over a matter which occurred in their midst yesterday."

A well-known lawyer of San Diego, Cal., while in a barber's chair, turned suddenly to speak to a friend and a piece of his nose was sliced off.

It has been found in Norway that banks of snow will stop cannon balls, which penetrate only a little way when the snow is properly prepared.
