After Nine Years.

A joyful reunion of a brother and sis-ter after a separation of nine years occurred at the residence of Mr. James H. Smith. clerk of the probate court, at at 2421 Woodland avenue Thursday, says the Kansas City Times: Nine years ago Samuel W. Harris, a brother of Mrs Smith, then a boy twenty years old, left his home here and went west to seek his fortune. He has been a cowboy in colorado and Texas, a gold dig-ger in Idaho and Montana, and has wandered from Manitoba to Mexico in search of wealth. Having acquired in his long search a handsome competence he returned to the home of his youth. and hunting up his only sister made himself known to her. hold of. We were largely outnumbered, and our crew were falling on every side. Three of us jumped over-board, and not being far out at sea, we swam ashore, and as far as I could ever learn the rest of our crew of seventeen were killed or taken prisoners. As it happened the three of us who jumped overboard were the custodians of a large part of the money, and this we divided. I took my share of the confederate money and went to Canada to sell it, the Canadians at that time believing it was pretty near as good as their own money. I sold it at Montreal, Toronto and Kingston, realizing 33 cents on the dollar.

This Gravity,' a story so closely resembling Praed's article that I am really in doubt which to call it, a coincidence or a plagiarism. Both made their heroes retired scientists who by much study and labor succeeded in constructing t

machine to extract all gravity from their bodies. This was at once the beginning of their trouble and of the points of similarity in the stories.

"Both heroes were accused of insanity, and both were enabled to perform wonderful feats as athletes because of their lightness. Both jumped high in the air and were unable to get down without assistance, and both finally became disgusted with their daugerous invention and decided not to give the public the rather doubtful benefit of it. This is probably the only reason that that the problem of flying has never been more successfully solved than by Darius Green." Stockton's story can be found in a book entitled "Encyclo-

SCROFULA

is that impurity of the blood which produces unsightly lumps or swellings in the neck; which causes running sores on the arms, legs, or feet; which develops nicers in the eyes, cars, or nose, often causing blindness or deafness; which is the origin of pomples, cancerous growths, or "humors," which, fastening upon the lungs, causes consumption and death. It is the most ancient of all diseases, and very few persons are entirely free from it.
