

THE DAILY BEE, PUBLISHED EVERY MORNING.

TERMS OF SUBSCRIPTION: Daily Morning Edition... For Six Months... For Three Months... For One Month...

THE DAILY BEE, Sworn Statement of Circulation.

Table with columns for Date, Circulation, and Total. Rows include dates from Feb 1 to Feb 16, 1890.

WHY SO PERSISTENT?

Senator Manderson is said to have repudiated all the trouble about Fort Omaha to the capacity of land owners...

RAILROAD MANTRAS.

An important opinion has just been handed down in the supreme court of Nebraska touching upon the liability of railroads for injury to persons going upon the tracks at public crossings.

THE BILL SIGNED.

President Cleveland performed a patriotic duty yesterday in signing the bill that will before the close of the present year add four states to the union...

OTHER LANDS THAN OURS.

The British parliament reassembled Thursday. The speech of the queen was more than usually brief, but presented a few features of interest.

Where Cleveland Made His Mistake.

It is safe to say that if Cleveland had from the start correctly measured himself as a political candidate, and taken counsel generally with the legitimate leaders of his party, he would have been elected.

Overhauled the Four Hundred.

Thirteen hundred dogs of the bluest blood and most unimpeachable pedigree are on exhibition in New York, and in the overshadowing grandeur of their presence the New Yorkers have lost sight temporarily of Ward McAllister's comparatively famous 400.

Preached From the Shoulder.

A Mississippi preacher was eloquent enough to save a man's neck from the fry of a mob of janitors after the pope was around his neck and he was about to freeze. There were probably no kindly Andover theologians present at that sermon.

What Will Wainwright Wear?

No announcement has yet been made concerning Wainwright's attire, and the elite in Washington are troubled lest he appear at the inauguration in a suit of his own "hand-me-downs," thereby neatly combining a business advertisement with a first appearance in statesmanship.

Thanks, We Don't Dance.

Reports from Indianapolis fail to show that General Harrison is practicing for the inauguration. The first step of the new administration, therefore, will not be taken at that ball. The new administration, in fact, does not know how to dance and has no desire to learn.

We Can Stand This Kind.

Harrison's administration has not promoted trusts. Oh, no. The people of Washington have organized a window glass trust, and it will cost from \$20 to \$150 to occupy a window to see the inaugural parade.

Edgerton Dismissed.

Mr. Edgerton indignantly declares that president Cleveland has failed to put out of office many incompetent government employees. Mr. Edgerton's discharge, however, is strong evidence in the president's favor.

LITTLE JOKES.

St. Louis Clerk: What you really need in St. Louis is Jack the Fool-Killer. Philadelphia Belle: "One of Ward McAllister's 400" Well, who is Ward McAllister?

Denial of Denial.

Philadelphia Ledger: Mr. Ruskin no longer burns the midnight oil. He uses candles exclusively. St. Louis Post-Dispatch: It is a mighty poor editor who can not name every member of Harrison's cabinet.

New York Herald.

General Harrison seems to think that the one way to defeat Olliverson is to Windom. Philadelphia Record: New York Belle: "Don't you know Switzer's case?" He is one of Ward McAllister's 400.

The Boston Herald.

The Boston Herald so far forgets its dignity as to remark: "The Russian count who has just committed suicide in Orleans, N. Y., was Orlor."

Kansas City Star.

Kansas City Star: Lawrence has six brass bands. This would seem to render the prospect for any other town in the state of securing the new insane asylum exceedingly gloomy.

Puck.

Puck: If your best girl thinks that somebody else has sent the valentine which pur-

chase has bankrupted you, do not deceive her. It is bad enough to be a fool, but much worse to let her know it.

Chicago Times: It is said that Norman J. Colman, who has just been promoted to the portfolio of Early, Vinton, and Hubbard squabs, signs himself Colman, Sec. Adopting the style of old Tom, Sec.

Boston Courier: "Medical science has made such progress," said the doctor when speaking of his profession, "that it is almost impossible for anybody to be buried alive now." Then he wondered why everybody laughed.

Kingston Freeman: At a bustling bee for the benefit of the church along the upper Hudson, last evening, a man, whose name is withheld, hugged his wife for several minutes without knowing who he was hugging. When he did find out he wanted his 15 cents back.

STATE AND TERRITORY.

Nebraska Jottings. Contracts for new residences are being let every day at Minden. The Columbus street cars are now making regular trips and are being well patronized.

Twenty different insurance companies were caught on the Withers & Koll's fire at Grand Island, in amounts ranging from \$500 to \$1,700.

Hon. Charles Rief, the Grand Island poet, has rented his office to the Wells-Fargo Express company, and is now recuperating his health at the Hotel Sprague, Ark.

Alvin Hill, a prosperous farmer of Howard county, is just finishing digging two acres of potatoes, which yielded over three hundred bushels, and not one was frozen when taken from the ground.

W. C. Henry, of Fairmont, the Grand Army of the Republic department commander, has been elected to the office of county and district reorganizer during the year, inspected 68 posts, written 1,824 letters, mustered 27 posts, made 200 speeches, and traveled 5,000 miles in the discharge of his duties.

Iowa.

Davenport has 175 saloons that pay a city license. Six fatal mine accidents have occurred in the state this year. The pay roll at the What Cheer mines amount to \$55,000 per month.

A stock company has been formed at Montezuma to erect a flouring mill. The Mt. Pleasant Milling company, with a capital stock of \$50,000, has filed articles of incorporation.

The superior court at Creston collected \$1,715.32 in fines and costs last year on an expense of \$1,250. An American eagle, measuring seven feet four inches across the wings, was caught in the west of Iowa.

A rather novel suit was tried at Sioux City the other day. A butcher named Wales kept hawking his cellar to kill rats and mice. George W. Cooper, an employe, entered the cellar one day last fall, when the owl flew into his face, striking out one of his eyes with its beak.

Beyond the Rockies.

High license has closed all the saloons at Salt Lake City. At Italian point vendor at Fresno received an average of \$24 a day on his sales. Both houses of the Oregon legislature have passed a law fixing liquor licenses at \$400.

They Walked on the Track.

At Alton, Mo., Feb. 22.—Edward Brown and Alfred Hallman, residing at Coplay, were both instantly killed by a passenger train at Delhi yesterday. They were seven to a hotel clerk to be placed in the safe. The man and diamonds disappeared.

Refused to Lower Russia's Flag.

London, Feb. 22.—The report that a French cruiser bombarded Sagalla, where the Cossack expedition under Atchinkoff had setled temporarily, killing or wounding five of the expedition and capturing the remainder, is confirmed. The bombardment is the result of the refusal of Atchinkoff to lower the Russian flag.

Robbed of Her Diamonds.

SAN DIEGO, Cal., Feb. 22.—Mrs. Snider, daughter of Governor Oglesby, of Illinois, who has been spending a few days here, was robbed of \$12,000 worth of diamonds and jewelry at Delhi yesterday. They were given to a hotel clerk to be placed in the safe. The man and diamonds disappeared.

The Electric Light Convention.

CHICAGO, Feb. 22.—The National Electric Light association concluded its work yesterday. Edward R. Weeks, of Kansas City, was elected president for the ensuing year.

millions of dollars. This is almost equal to the value of the precious metals mined in the United States for the year 1886. It is a sum larger than all railroads paid in dividends on stock in that year. It is more than the total net earnings of the national banks of the country for the year. Who can doubt that corn is king?

The Illinois legislature is about to enact a law providing for the supervision of the state over loan and building associations. It is a matter of no little significance that all the well-established building societies in that state favor an inspection of their operations by the auditor of accounts.

HOWEVER sound the reasons President Cleveland had for returning to congress without his approval of the house bill to determine the title of settlers on the Des Moines river lands in Iowa, it can not be denied that thousands of innocent parties have been made to suffer by a strict interpretation of a land grant made to a syndicate many years ago.

THIS time it was Mrs. Garrett, of Tonka, who left her four-year-old child alone in the house to play with matches. The usual result is recorded—a roasted baby and a sorrowing infant to evince themselves is growing. It is criminal carelessness in the most cruel form.

OF the many stories brought by Gredes from the east the latest is one of unusual interest, namely, that Semousi, the most prominent opponent of Khalfia Abdullah, has captured El Obeid. This place, the capital of Kordofan, may perhaps be considered the starting point of the great career of Abdullah's predecessor, the victorious Mahdi.

THE question of taxing railroad property is again before the legislature. At every session this vexatious problem comes up, but is never disposed of in a manner equitable and just to the state. The members of the present legislature have the opportunity to redeem their pledges to their constituents by amending the present unsatisfactory law, which allows railroads a loophole at every turn to escape their just obligations to the state.

THE United States absorb an increasing share of the products of Canada and Mexico, while the exports of the latter to Europe are decreasing. This would indicate growing commercial relations between the three countries on the American continent which will one day lead to mammoth proportions and pave the way to a political union of some sort.

OTHER LANDS THAN OURS.

The British parliament reassembled Thursday. The speech of the queen was more than usually brief, but presented a few features of interest. Chief among these was the statement that increased provisions are necessary for the safety of the shores and commerce of England, and the intimation that the government is not content that the peaceful relations now existing with other countries may suffer a change.

ESTIMATES on a pipe to convey away from the city of Butte the fumes of the smelters are that the cost would be about \$15,000. The health officers of Los Angeles have been notified of \$500 in removing a small-pox patient from her home to the pesthouse against her will.

A rich man in Portland, Ore., got drunk the other day and bought thirty-six coffins for himself, leaving only about ten more in stock in the town. The rich are always taking these advantages.

Preached From the Shoulder.

A Mississippi preacher was eloquent enough to save a man's neck from the fry of a mob of janitors after the pope was around his neck and he was about to freeze. There were probably no kindly Andover theologians present at that sermon.

What Will Wainwright Wear?

No announcement has yet been made concerning Wainwright's attire, and the elite in Washington are troubled lest he appear at the inauguration in a suit of his own "hand-me-downs," thereby neatly combining a business advertisement with a first appearance in statesmanship.

Thanks, We Don't Dance.
