

Immense Cash Bargains BOUGHT IN NEW YORK AUCTION SALES.

To be slaughtered To-morrow regardless of cost or value. Buying all goods for cash and in larger quantities than any other house in our line enables us to offer many cash bargains unapproachable by any other house.

To-morrow we shall place on sale 82 Full Dress Patterns of 8 yards Double Fold Fancy Wool Scotch Cheviots in stripes and new combinations. \$1.75 For Full Dress.

To-morrow we will place on sale 100 Full Dress Patterns of 10 yards Fancy Striped and Check Dress Suits, suitable for spring and summer wear. For Full Dress. \$2.00

FOR TO-MORROW ONLY! FULL DRESS PATTERN of Silk Finished Henrietta, all Wool, in black and all new shades, \$3.97 For Full Dress

\$10.000 Fine Wash Goods. Purchased at the great auction sale of Wm. Topping, Nos. 5 and 7, White Street.

36-inch Wide Fine INDIA LINENS 3 1/2 Cents 1/2 Yard. 500 pieces Extra Fine Quality Plain and Check NAINSOOK, White Goods, 4 1/2 Cents 1/2 Yard. 180 pes Elegant Lace Stripe Goods, 3 1/2 Cents 1/2 Yard.

1800 Yards Very Fine Quality 40-inch INDIA - LINENS, Swiss Lace Check and Stripe, 11 Cents Yard. Worth 25c. FINE FANCY 12 1/2 CENTS YARD. Worth 35c.

1000 Remnants Dress Challies 3 1/2 Cents 1/2 Yard. 2 cases Elegant New Styles SATEENS 3 1/2 Cents 1/2 Yd. 1 case New French SATEENS 12 CENTS YARD.

J. L. BRAINER & SONS.

LADIES' SUMMER Underwear! At 14c Ladies' fine Swiss Ribbed Vests, would be cheap at 25c. To-morrow only 14c.

LATEST STYLES IN MILLINERY. At 16c, 25c, 50c, 75c. Ladies' imported lisle thread Swiss Ribbed Vests, in white, pink, blue, cream, cerise; worth \$1.00.

ALL OUR FINE WOOL SPRING JACKETS, 98c. ALL OF OUR ALL WOOL SPRING JACKETS, \$1.75

ALL OF OUR FINE IMPORTED Broadcloth - Jackets, \$2.50

SHOES. Infants' Kid Shoes 30c. Red Schoolhouse Shoes \$1.00. Red Schoolhouse Shoes \$1.25. Ladies' Kid Toe Slippers 50c. Ladies' Oxford Ties 99c. Ladies' Kid Shoes 99c. Ladies' Imported French Kid Shoes \$1.25. Ladies' Imported Paris Kid Shoes \$1.49. Henderson's regular \$2.50 and \$3.00 Kid Shoes every pair stamped on the sole \$1.75

LADIES' COTTON HOSE At 10c Ladies' spring styles, fancy stripes, drop stitched Hose, 10c; good value for 25c.

At 19c Ladies' full regular made and seamless Imported Hose, in all the fancy colors, worth up to 50c.

ALL OUR SILK AND SATIN PARASOLS, 75c. All Our Fancy Silk and Lace Trimmed PARASOLS, \$1.50

ALL OUR GOLD-HANDLED SILK UMBRELLAS, \$2.50

\$7,000 WORTH EMBROIDERIES AND LACES. Owing to the change of firm of one of the largest New York Importers of Embroideries and Laces, their whole stock was disposed of at auction.

At 5c White Swiss and Cambric Embroideries. At 10c Very Wide Cambric and Swiss Embroidery. At 15c Swiss Embroidered Flouncing.

At 90c 45-inch Swiss SKIRTING. At \$1.25 THE VERY FINEST 45-inch SKIRTING.

502, 504, 506, 508 and 510 South 13th Street.

GEMS OF THE BLACK HILLS.

A Visit to Chadron, Rapid City and Buffalo Gap.

NEW TOWNS WITH A FUTURE.

The Life, Pluck, Energy and Intelligence Which Seem to Characterize the Inhabitants of the Black Hills.

Black Hill Towns.

The recent trip of the board of trade to the Black Hills brought the members into a new section of country and introduced them to a number of wide-awake people, reference to whom and their work will be found in the following chapters:

Chadron.

The cordial greeting extended our party when it arrived in Chadron the first time was most cheerfully duplicated when the second visit was made. The citizens seemed to vie with one another in their eagerness to meet and accommodate their guests, so much so that at the depot, when the board arrived, there were fifty or more carriages that were required to treat it to a drive. The warmth of the friendliness displayed was most gratefully appreciated, and this fact contributed greatly to the thoroughness of the enjoyment of the visit.

Chadron.

I was shown the spot, now in the middle of a street, on which but three years ago the first house of the town was erected. The structure itself has been reduced to kindling wood. Around where it stood, however, is one of the choicest residence districts of the town. In this district the houses in every respect, save age, have all evidences of being thoroughly and consistently happy homes. Said the gentleman who accompanied me on the drive around the city:

"There is the first hotel built in this city, and it stood at it. They say a good table, but they had a—of a crowd of boarders."

The hotel was a log cabin, about eight feet high.

But the Chadron of today troubles itself but slightly over to what have been things of the past. It lives only in the present, and is proud of the future. Her streets are wide, well graded, well guttered, and run at right angles through the city. In the business district they are lined with frame, brick and even stone structures. The stores are well stocked, and seem to enjoy a patronage which is entirely satisfactory. The variety of the stores is such as to satisfy almost every class of people, and the patronage bestowed is fully exemplified in the continued prosperity of their proprietors.

Chadron is not yet a city of statistics. It has been too busy in endeavoring to inaugurate its local government in a general way, to give attention to the features and details of modern municipal and mercantile advancement. As a consequence, the amount of last year's business, as also that of the present, may not now be printed. Despite this fact, a merchant is not to be found who cannot look the inquiry in the eye and tell him that his trade for the last twelve months greatly exceeds that for the same length of time a year ago.

The town is the terminus of three divisions of the Fremont, Elkhorn & Missouri Valley road, one extending from Long Pine to Chadron, the other from Douglas and the other from Whitewood. These divisions require a certain kind of repair shops and round houses, besides a number of homes for the employes of the company. There is here a seven-room stall round house, and this will soon be supplemented with large shops which will give employment to a still larger number of men.

The stores, which are built of brick, are tastefully designed and substantially erected, the brick being of home manufacture,

with intersecting lines of white which give them an unique and pretty effect.

Stone is gradually finding favor for building purposes, several stores with fine fronts having already been erected with it. The rock is brought from the hills near Buffalo Gap. In some instances it is of a fine, and, in fact, may be produced in all colors. One building attracts general attention. Its facade is constructed of stone, through which there are exposed the elements, the harder they become. The stone sells at reasonable rates and may be procured at Buffalo Gap, where it is found with an indefinite variety of colors. Some of the stone was brought to Omaha and is now on exhibition at the board of trade where it will remain for inspection.

The country around Chadron is both diversified and fertile. The hills are sufficiently romantic to attract the attention of the poet and scientist, while the gentle slopes, grassy meadows and rich fields, with their suggestive of fanciful grainings. They make a pretty appearance, and it is said the longer they are looked at, the elements, the harder they become. The stone sells at reasonable rates and may be procured at Buffalo Gap, where it is found with an indefinite variety of colors.

city by a host of enterprising merchants and professional gentlemen. It passed the Rapid City roller mills, and had pointed out to it the waterworks, which cost \$51,000 and belong to the city, only a fair return on the outlay, sufficient to make repairs and provide for further extensions, being required.

The school of the mines which is situated about a mile away. The school is lighted by electric light, twenty lamps being employed, the electricity being derived from water power, which is capable of running a hundred manufacturing establishments. There is here located the Rosecranz brewery, one of the few institutions of the kind in the hills. Surrounding the city is a number of brick-yards which turn out a white and mottled brick, both of which are very pretty and durable. The city has orders to supply pressed brick for Fremont, and when its quarries of limestone and marble are opened, it will be able to satisfy a demand for cheap and excellent building material for which there has long been a demand in this section as well as in other parts of the country.

The population is now estimated at about five thousand, 1041 votes having been polled at the last election. The Bishop Hereford school is now estimated at \$21,000. There are also magnificent schools costing \$25,000, a court house and jail valued at \$40,000 and several blocks of brick structures, the cost of which is estimated at \$100,000. There are twelve saloons, which pay \$1,000 for license, and permanent works with a party desiring to retire from the business at the end of any quarter not being obligated to pay for the remainder of the year.

Rapid City is said to be located in a circle with a diameter of fifty miles, which takes in the Black Hills in a resource which is not only rich in minerals, but also in the people. Speaking with a gentleman who claimed to be acquainted with the subject, I was informed that the mines in question were in operation covering the route at Harney Peak there is a mill with a capacity of 200 tons per day. This will cost \$100,000, and inside of a year is expected to have its capacity increased to 400 tons daily, and in less than two years to 1,000 tons per day. This mill is situated about thirteen miles from Rapid City, and is owned by New York and English capitalists, with a capital of \$15,000,000. Of this amount \$1,000,000 have already been invested. At Lookout there is a gold mill with 100 stamps, which last year ran but 40. The Sullivan consolidated mines, thirty miles away, also other mines on the Black Hills, are in active operation. In about the same distance from the city there are about 100 mines of silver in course of development.

Coal is to be found one and a half miles from the city, and indeed it is claimed to be under the city. It crops out in many places around the town and it is asserted that the veins may be worked to a profit, although Black Hills coal and wood are yet in use. Wood is to be had on all the mountains and valleys and in various parts of the hills, saw mills are in operation covering the route from trees into boards, the lumber costing from \$12 to \$15 per 1,000 feet.

In the surrounding hills there is also a seemingly indefinite supply of copper, zinc and granite, the last mentioned pronounced by many of our party to be much finer than any now in our buildings in this city.

There are two national and two private banks, the capital of of these alone being \$500,000. There is one iron foundry, the one for which is from Wisconsin. There is also a marble works giving employment to a number of men, and being supplied by water power.

The excavation has already been made for the foundation of a very imposing Masonic hall, which is to be erected this year at a cost of \$75,000.

Last year it is estimated \$400,000 were expended in new buildings, and this year it is expected that the amount will be greatly exceeded.

The city is well supplied with churches, all the leading denominations having neat and pretty structures. The residences of the people are located upon the most desirable and sunny country, and in many instances are of the most beautiful and modern designs. The Dakota school of mines is an institution of which Rapid City is proud, and fur-

nishes the subject of another article which appears below.

While Rapid City is rich in minerals, she is not less blessed in her agricultural resources. Milk and meats of unsurpassed quality are produced by thrifty farmers, whose showing of grain and vegetables is one of the principal delights of the citizens. The wheat of Dakota has long been the marvel of the country, but the state in no less degree excels in her articles of food for home consumption. The hills are covered with potatoes weighing four pounds. They were sold and true to the core, a fact emphasized by the halving of a number of them.

Buffalo Gap. This town is one of the most promising in the Black Hills. It is located in Bever creek valley on the line of the Fremont, Elkhorn & Missouri Valley railway. It is situated in Custer county and has a population of 900. It is yet new, though there are many evidences of private and municipal enterprise. A visitor to the Gap will find it provided with a good school—with a fine stone building in prospect for this year; two churches, several saloons and societies, a post office and a number of other public buildings, a telephone exchange with all towns in the Black Hills, one good hotel, one bank, one flouring mill of 200 bushels capacity per day, and an excellent newspaper, the Buffalo Gap News, whose editor is A. J. Clark. The town is incorporated and is one of the most orderly in the territory. It has an assessed valuation, including real and personal property, of \$318,000. Mercantile pursuits are well represented, the business men being energetic and enterprising. The time was when Buffalo Gap had a large population and was teeming with early frontier life and reckless prosperity; but those days are forever past, and the steady, permanent, healthful growth of the frontier element is no more. In its place are better men and a better condition of things generally. The settlement is a slow but steady, permanent, healthful growth. The frontier element is no more. In its place are better men and a better condition of things generally. The settlement is a slow but steady, permanent, healthful growth. The frontier element is no more. In its place are better men and a better condition of things generally.

half to four and one-half miles from the village, and exist in vast fields and inexhaustible quantities. It is a true fine-grained, handsome stone. One company has been quarrying over a year, and its stone may be seen in building at Chadron, Lincoln and at other points. Other companies are also preparing to ship stone, and it will only be a short time before hundreds of men will find employment in this industry alone.

As an indication of the value of this stone for building purposes, and the security offered to investors in quarry stock, it is only necessary to state that the Northwestern Railway company recently purchased a controlling interest in one of the quarries, paying therefor, it is announced, \$11,000. The Elkhorn railway company is now preparing to lay a track to the stone district, and, beyond a doubt, the work will be commencing during the present year. The quarries are easily accessible, the only thing needed being direct transportation facilities, which will soon be provided. These quarries all lie through and beyond the gap. The marble fields are from four to five miles distant, every foot of the way being accessible to a wagon. It is only a matter of time to the utmost point, and no doubt the branch projected by the Elkhorn folks will run there. The marble exists in large quantities, and is exceedingly interesting in formation. The colors are rich and varied, ranging from the most delicate pink and gold to variegated red, white and blue, and green and yellow combinations. Some of it is a beautiful gray, which runs, after exposure, into a lovely rose color, a portion of the gray remaining. Experts have pronounced this marble equal to the choicest of Italian and Tennessee marbles. It is certain that it is susceptible of the highest polish, and that it is firm, and grained and durable.

From the foregoing it will readily be seen that Buffalo Gap has a future upon pretty substantial grounds. More capital is needed, it is true, but where legitimate—where safe and profitable—investments are made, capital is sure to come. Good stock companies are already organized for the development of these quarries, and it is understood that the territory is now on the market. With the working of these quarries will come men and money, and with men and money, rottenness will spring to the front and be a very center of the gray remaining. Experts have pronounced this marble equal to the choicest of Italian and Tennessee marbles. It is certain that it is susceptible of the highest polish, and that it is firm, and grained and durable.

Experts have pronounced this marble equal to the choicest of Italian and Tennessee marbles. It is certain that it is susceptible of the highest polish, and that it is firm, and grained and durable.

From the foregoing it will readily be seen that Buffalo Gap has a future upon pretty substantial grounds. More capital is needed, it is true, but where legitimate—where safe and profitable—investments are made, capital is sure to come. Good stock companies are already organized for the development of these quarries, and it is understood that the territory is now on the market. With the working of these quarries will come men and money, and with men and money, rottenness will spring to the front and be a very center of the gray remaining. Experts have pronounced this marble equal to the choicest of Italian and Tennessee marbles. It is certain that it is susceptible of the highest polish, and that it is firm, and grained and durable.
