THE BEE. |-The wheat market to-day recovered from the loss occasioned by the raid at the close of yesterday's session, and a better feeling prevailed. The market had more tone, though business was dull. The cold wave, whose approach was noted yesterday, has been moving southward and eastward, and according to the latest report of the signal service, the area of dangerously low temperature to-night will include southern Wisconsin and Michigan, and northern Illinois, Indiana and Ohio. Frost visited many points in Michigan and Wisconsin last night, while back of Duluth the cold must have been extreme. There was a disposition on the part of many to make light of the report of frosts and to ridicule the idea of damage resulting to the crops. To hear some of the bears talk, one might be led to think that the only thing needed to insure a magnificent crop of wheat is a succession of hard frosts. The conservative element, while slow to accept as true damage reports of any kind, is quick to admit of the possibility of damage from weather vicissitudes; and, for that reason, merchants are strenously advising against short selling at this juncture. This is having the temporary effect of dulling trade and as a bright operator was moved to re mark: "While the frost might not have hurt wheat it has killed business." His remark was made at a dull moment. Before the close of the session the market got active. The initial trading was on the basis of 76%c for July, and 75%c for December. The market started off quite firmly but July backed to 76%c and December to 75%c before a start up was made; July moved upward rather briskly to 76%c, but hung around 7614@76%c, for a long time. Then it hitched up another peg and % was the favorable fraction. It held around 76% @76% for another hour or more, and just touched 77c for an instant, During the last half hour, operations were on a large scale and the price got to 77½; the close was 77c. During the early part of the session a good lot of June and May was offered for sale with the result that both months broke to about 78%c. At this price the market steadied, closing at 79c, May and June being together exclusively. New crop futures were strong and unusually active. December, which is now 10c lower than it was a year ago, advanced, under rapid, urgent in active. The com 75% to 75% cand clearly in the company of the control of the from 75%c to 76%c, and closed firm at September, too, advanced from 73%c

Corn trading was of a much more active character than has been seen in the corn pit for some time. There has at length been developed a difference of opinion regarding the probable future courses of prices, and the contending parties in the argument backed their respective sides to a large extent by buying or selling, according to their views of the case. As far as to-day was concerned the bulls were winners, prices being 34c to 35c higher at the close-than at the corresponding time yesterday. There were 200 cars less on the inspection sheet than the smallest of yesterday's estimates, and for to-morrow 775 cars were all that were expected. That is a large quantity, but it appeared small to the speculators, who have been looking for ten days at regular receipts of over one thousand cars. The amount on ocean passage, according to Beerboehm, has increased 400,000 bushels since a week The fear of frost spreading the chief reason of to-day's strength. shorts were mildly solicitous concerning the security of their position, yesterday, and much more anxious in that regard to-day. The market was fairly active in the specula-tive branch of business, and there was a good shipping demand at about 3/c improvement in the cash market.

Oats were in good request and averaged stronger to ½c higher. After a steady opening a prominent operator stepped in and bid prices up ½c, and the market was fairly well sustained thereafter, under fair buying or-ders. While the receipts were as large as anticipated, the estimate for to-morrow is anticipated, the estimate for to-morrow is cut down to 220 cars. No change was shown in May, while there was considerable changing of June into July at 3c difference; June selling at 214(6213c, up to 22c, with September at 2214(6223c. A large part of the supply consisted of No. 3 white, and many consisted of No. 3 white, and many consisted of No. 3 white, and many consisted of No. 3 care. cars were sold to go to store. For No. 2 car lots 21% c was paid, or % improvement. Out of 359 cars received, sixty-five passed into contract grade.

In provisions, the trade suffered something of a change. A good run of hogs at Chicago, and other packing points, occasioned a revo-lution in sentiment. The bear element feit encouraged enough to assert its influence, and as it received assistance from a moderate disposition upon the part of certain leaders to sell, the tide was easily turned downward. There was no serious break, but the day's prices were at a lower level than yesterday, and the closings all around, showed a fair reduction. In pork the decline suffered amounted to 15c to 20c; in lard to 5c; and in

short ribs to 5e to 71/6e. CHICAGO LIVE STOCK MARKET.

CHICAGO, May 28 .- [Special Telegram to THE BEE.]-CATTLE. -To-day's supply was made up of about 3,500 Texans and 4,500 natives. Trade in native beef steers ruled slow but steady, the demand being anything but satisfactory to the selling interests. Texans were not so attractive in quality as of rate, and this, together with the pressure of a big supply, weakened values 10c to 15c. In native cows and bulls the offerings proved so limited that but little change in values will be noted in representative sales. Nevertheless trade had a downward tendency, particalarly on "shelly" cows and coarse bulls. In the stocker and feeder branch sellers topped off the fleshy steers to the dressed beef trade for beef cuttle, and when the market closed the owners had most of the balance of the supply on their hands, the demand from farmers and feeders being unusually light for this season of the year. Heavy to extra

Hogs—A larger run than was anticipated to day caused a break in values. Early sales were 10c lower than at yesterday morning's prices, the general market ruling 15c lower than yesterday's bulk of transactions. In other words, it was a \$4.35 market to-day, against a \$4.50 market yesterday. Eastern orders were moderate, of which fact the packers took advantage; and assisted by the decline in pork and liberal supply, they had intile trouble in forcing the concession noted early. A few sales of fancy light were made at \$4.57\sum (4.60, prime heavy up to \$4.45, and choice mixed as high as \$4.35, but later \$4.35 was the market for all good hogs of either butchers' weights, heavy or mixed, while \$4.30 bought good packing grades. Rough packers sold down to \$4.20; York sorts of light sold at \$4.45@4.50.

NEW YORK, May 28. - Special Telegram to THE BEE. | - STOCKS-The stock market opened with considerable activity, but prices were irregular; and, compared with the close last night, the losses were more marked than the gains. An early hesitation in the market was soon followed by a pronounced strength, when a few favorites, such as New England, Missouri Pacific, Louisville & Nashville, St. Paul and Atchison, quickly rose from % to

gained smaller fractions. Chicago Gas was the one marked exception to the rule, and developed extreme weakness for a time, reacting 114 per cent to 57%, a net loss of 1 per cent from last night's figures. Some reaction occurred in the general list, but no weakness was apparent, and in the latter portion of the hour Chicago, and Eastern Illinois preferred, and Cotton Oil each became active and strong, and rose 1 per cent from the opening figures, closely followed by the Lead trusts. After 11 o'clock there was a general reaction; and, while the losses were not great, many of the weaker stocks fell below the opening figures. Reading and Union Pacific were among the weakest on the list. At noon, the list was active and unsettled at about the opening figures. The stock market closed again, to-day, on a bulge for a few stocks, and at last night's prices for others, while a few showed losses. Atchison closed at 47, or 36 per cent lower; Burlington held its own at 1041/4; Chicago Gas, after nearly a 2 per cent range, from 57% to 59%, closed but 14 per cent higher at 59, where it opened; Cotton Oil gained 1% per cent and Lead trusts 1 per cent Louisville, Lake Shore and New England gained % per cent each for the day. Northwestern closed at the top, 113%, or 36 per cent higher than last night. St. Paul was the leader for the day, selling up to 75, the highest point for a year, and closing at 7436. or 114 per cent higher for the day. The

total sales were 371,195 shares. The following were the closing quotations: Money-Easy at 2@21/2 per cent. PRIME MERCANTILE PAPER-354 @554 per

OMARA LIVE STOOK.

Tuesday, May 28. There were most too many cattle here for the trade to be really good, the receipts being the heaviest since last Tuesday. and the advices from other points were not such as to increase confidence. Neither packers nor shippers were active buyers, although a good many cattle changed hands. The feeling was very weak and the buyers succeeded in

getting a reduction of 5c and in some cases perhaps more, but on the other hand they bought some of the most desirable of the beeves at prices that were no lower. A very choice bunch of beeves brought \$4.25, the choice bunch of beeves brought \$4.25, the highest price paid in a long while, but the beef and shipping steers sold largely at \$3.55.@ 3.75. Butchers' stock was not very pleaty and the market on that class of stuff did not present any especially new features, The cows went at \$2.00.@3.15 and the bulls at \$2.00.@2.15. Stockers and feeders were not plenty and the supply was made up mostly of little northern cattle. There were a few natives, but mostly in small bunches as they had been thrown out from among the fat cattle. The buyers are complaining of the scarcity of good stock cattle.

Hogs. To-day's hog market, as a whole, suffered a decline of fully 10c. The trade opened with a few of the best light hogs selling at \$4.15(\pi 4.20, but the demand was limited and was soon filled. As the later trains continued to roll up the receipts, and the reports were received of 17,500 hogs in Kansas City and 25,000 in Chicago, with a decline of 10@15c, the trade here took a tumble. The packers would offer only \$4.05 for the larger part of the offerings, and for a while it looked as if they would buy them there. Salesmen, however, held on and the buyers raised their bic's later and bought a good many of the hogs at \$4.075@4.10 for which they had been offering only \$4.05 all the morning. The market, however, was a drag all the day and at the closing there were five loads unsold, soon filled. As the later trains continued to at the closing there were five loads unsold salesmen refusing to accept the price.
