## Clear the Way

Without loss of time when the intestina canal is blocked up by reason of constipa-tion, chronic or temporary. It should be borne in mind that this ailment is prone to become lasting and obstinate, and breed other worse complaints. Hostetter's Stomach Bitter is the newspace ready to remove the Bitters is the precise remedy to remove the obstruction effectually, but without drench-ing or weakening the blockaded bowels, a consequence always to be apprehended from the use of violent iaxatives, which are among the use of violent insatives, which are among the most pernicious of the cheap nostrums swallowed by the credulous and misin-formed. The fiat of experience, and of the medical fraternity, sanction the claims of this standing aperient. Not only as a source of relief and permanent regularity to the bowels, liver and stomach, but as a means of remedying and preventing kidney and bladder troubles, and fever and ague, it is without a peer. without a peer.

#### Defense of the Bules.

OMANA, Neb., May 30.-To the Master Plumbers-Gentlemen: After keeping pace with you along through this little fight, which you have, I am certain, undertaken in somewhat dreaming condition of mind, please just let me awaken you up before your dream is over, or, perhaps, when you do awake you may find yourselves in quite a different climate, and I think the climate is hot enough where you are without trying to find any hotter. Now, gentlemen, since I may suppose you awakened out of your dream, will you please let me give my opinion upon the resolutions expressed by Mr.

Hussey, your representative, at a meeting held at the Paxton hotel on Tuesday after-First of all 1 notice your business is ham-First of all 1 house your business is ham-pered and interfered with on account of the rules formulated by the plumbers' union. Now I consider these rules the very hand-railing to you which guides you to your several landings. These rules, I presume, are a limitation holding good a standard of supression of 50 cents are hour to avery journey. wages of 50 cents per hour to every journey-man plumber, also regulating the hours of labor, also that none except union men be employed, and also a regulation of appren-tices. Now, I hold that all of these rules are very necessary and are reasonable in their nature. Take the standard of wages, consider it, don't you think that that is a good thing! Supposing you did not know of any stan-dard of wages what would each of you rule by when figuring your work, some men are pleased wi'h a small income, some with a reasonable in-come and some can payer be pleased and

small income, some with a reasonable in-come, and some can nevor be pleased, and the consequence would be to grind down the poor workingman. It is a grand system to have a figure upon which to work; for in-stance, taking a mechanical view of the mat-ter, if one had no center from which to draw a circle, and a straight line from which to find a square, what would be the result, you would have no confidence in your perform-ance, and so it would be with you if you had no standard of wages; you would have no confidence in yourselves. Now, don't you think a limit of working hours is a good thing and advantageous to yourselves. Some amongst, you would rather work men twelve amongst you would rather work men twelve hours a day and pay them for nine before you would want work, and by having no standard of wages and no certain number of hours you are holding in view, how could you accomplish that? Next is that

The great attraction for the past two weeks has been the Cheviot Suits offered by us in eight different patterns, at \$10 per suit. We acknowledge there is not much profit in them, but they are a drawing card and every purchaser of them will remember us the next time he wants to buy. We will continue the sale of these suits one more week and will offer eight styles of Men's pure all-wool Cheviot Sack Suits in all sizes from 34 to 44. Price \$10. A display is made of these goods in our show windows, and samples will be sent to any address. Don't fail to see them.

G.A.R.

We will offer this week 100 Blue Flannel Suits, double-breasted, pure all-wool goods, at \$8.50 per suit, with G. A. R. buttons complete. Guaranteed Genuine Slater Flannel and full Indigo.

## Prince Albert Suits.

Special prices this week in Prince Albert dress suits. We have given special attention to this line of goods and have got a little overstocked. The style of goods cannot be described here, but this is a good time to select a Prince Albert Suit. Nothing but first class goods in this department.

## Boys' and Childrens' Department,

A special line of Boys' Long Pant Suits for boys, ages 10 to 14, in strictly all-wool goods (no cotton or shoddy) but pure wool Cassimeres and Cheviots at \$6 per suit. We have nothing to say about what others charge for such goods but we do know that every suit of lot is away under price, and that the purchaser will be entirely satisfied with the wear of them. Price \$6, ages from 10 to 14.

## Boys' Knee Pant Suits, \$4.50.

The sale of \$4.50 suits for boys, ages 4 to 14, (short pants) will be continued this week. They are good values and would not be recommended to you if we did not know that they were all right. Remember they are Boys' Knee Pant Suits, strictly all-woo Cheviots at \$4.50.

## Boys' Knee Pant Suits, \$2.50.

To meet a demand for a lower price suit we have marked down three styles of medium shade fabrics to sell at \$2.50 per suit. They are not all-wool, but are honest wearing cotton warp goods, one of the best materials that money can buy to make up at this price. There are about 100 suits. We will not promise to duplicate them after this week, ages 4 to 13. The largest Boys' and Children's Department. The largest stock, the lowest prices.

## Furnishing Goods Department. Special Sale of Men's Fancy Percale Shirts, Price 50 Cents.

We have a large quantity of Men's Fancy Percale Shirts, regular \$1 and \$1.25 goods, which we will offer until closed, at 50 cents. The first day they were displayed in our show windows the sale was so large that the chances are that by Saturday night there will be none to sell.

## BOYS' SHIRT WAISTS, 50 CENTS.

No one qustions the price when they exemine the quality, but the question is often asked, "How can you afford to sell them for 50 cents?" Well, we can't, but we have a large quantity of them on hand and we need the room, and use these as a means of advertising our Children's Department.

#### It is a Curious Fact

That the body is now more susceptible to benefit from medicine than at and other season. Hence the importance of taking Hood's Sarsaparilla now, when it will do you the most good. It is really wonderful for purifying and en-riching the blood, creating an appetite, and giving a healthy tone to the whole system. Be sure to get Hood' Sarsaparilla, which is peculiar to itself.

## TRANS-CONTINENTAL MATTERS The New Route Thought to Involve

the Manitoba. Concerning the press dispatches sent out

from Spokane Falls, relative to a deal between the Omaha road and the Oregon Railway & Navigation, thereby opening a new trans-continental route, the officials here state that the report is either unfounded or has been misconstrued. It has long been supposed that the Oregon & Pacific and sev-gral other minor sections of detached road in that vicinity were backed by the Chicago & Northwestern. But between these and the main line or any part of the Northwestern system proper, there is a wide gap, and in view of which the officials here are of the opinion that the Omchais here is not con-nected with the deal. The only way the Omaha road ceuld reach this would be in a deal with the Union Pacific at Sioux City, or by a longer route, at Omaha. Nothing is known at Union Pacific headquarters conknown at Union Pacific headquarters con-cerning any such transactions. It is thought that the St. Paul, Minneapolis & Manitoba is the road that may be leaning in that direction. It connects with the Union Pacific at Helena, and it is thought may have consummated a deal whereby the Union Pacific gives trackage rights to the Manitoba to the coast via Pocatello. This would be a elircuitous route, but as a strong rivalry ex-ists between the Manitoba and the Northern Pacific, it is thought that the former has tied up with the Union Pacific in this way.

#### Building New Road.

The Union Pacific has completed a survey for a road from Tintic, Utah, to Eureka, Ne vada. The engineering department has submitted a profile of the line together with the estimated cost for constructing the same. The aim of the company is to reach the ore mines in Nevada. It is also stated that this will eventually be extended to Los Angeles, and that is the proposed route of the Union Pacific to the coast, thereby tapping the principal shipping port of southern California and cutting into the territory of the Southern Pacific.

#### Mail on No. 5.

Superintendent Thompson, of the B & M. road, has notified the trainmen on No. 5 passenger that, hereafter, mail pouches will be received by them from Deerfield, Chalco, Gretna, Greenwood and Waverly, to be delivered at Ashland for No. 1 east-bound for Omaha.

## Railroad Notes.

T. W. Lee, assistant general passenger agent of the Union Pacific, has gone to St. Paul.

Engine 139 on the Union Pacific, has been converted into a standard road locomotive and placed in the hands of Engineer Parr.

none but union men can be employed is that not as beneficial to you as to the jour-neymen? Why, a non-union man can work for what he has a mind to, and if you were allowed to employ whom you desired there would be no need of a standard of wages nor would be no need of a standard of wages nor a union. Take, as an illustration, the car-penters; they have a standard of wages, but it is buried by the allowance of masters to employ whom they choose. Then comes the limited number of apprentices; I say that is right and just. Why, after a boy is two years at the trade he can do general work as well as any man, so the consequence would be a shop filled with apprentices and very be a shop filled with apprentices and very

Now, gentlemen, in concluding my opinion, I say your suggestions are absurd and ridiculous in the extreme. I think that some among you ought to be very quiet. Why, if any one asked you to execute a piece of plumbing work, it would sound through you like a galvanic battery, as you never learned the trade and one can not misjudge you when he thinks that the leading parties among you are most ignorant after such propositions made by you on Tuesday last. And here I warn the journeymen plumbers to hold fast to what is good, as whenever they give up to these rules suggested to them on Tuesday they place themselves be-fore you a target to be shot at. But I hope that the jour-neymen plumbers will be backed by all
