A. Williams, a negro, and a very suspicious character, was sent up for twenty days by Judge Berka yesterday, and John Arnold, a white man, for twenty days for petit larceny. Arnold had just finished one term in the county jail, but, finding his surroundings so pleasant there, seemed desirous of going back.

Hans Peterson, charged with selling liquor on Sunday, had a jury trial before Judge Berka yesterday and was acquitted. Peterson keeps a saloon at Fourteenth and Webster, and the witnesses swore that his saloon was open last Sunday, but as no one exposed to the fact that liquor was sold there on that day, the jury decided in his favor.

**The Ames Block.**  
 S. P. Morse says that the contract for building his new dry goods store will be let next week. Vandeventer & Howe, architects of the proposed union depot, have drawn the plans and will superintend its construction. They intend to do an excellent piece of work. The building will be six stories high Farman street front and seven on the sixteenth street side. The difference in the grade accounts for this variety. Because of the effect beneath the building and the street rooms, the rear part of the former will join the latter will form a sort of balcony from which one may look into and all over the store. Mr. Morse declares that Charles Francis Adams has expressed a wish that he could own some property in Omaha. "He said to me, 'The people in your town think I have a preference for Kansas City because I happened to deal in and make a fortune out of real estate there, but such is not the case. I think Mr. Adams would invest some of his wealth here if the opportunity was offered, and it would be a good thing for Omaha to hold out inducements that he might accept.'"

DIVISION TERMINALS

Likely to Be Removed From Ogden to Salt Lake.

The members of the grievance committee of the Brotherhood of Locomotive Engineers and Brotherhood of Locomotive Firemen have concluded their labors and may have returned home.

The only matter that remains unsettled is the question of changing the division terminal from Evanston to Green River. The company desired to consolidate the seventy-five-mile division between Evanston and Ogden and the 112-mile division between Evanston and Green River, making one division of 187 miles. The engineers opposed this movement for the reason that the 187-mile run would require engineers on way-fraught to beat their post upwards of twenty hours in making the run. This they maintain is too long for any engineer or fireman to go without rest. They submitted a proposition to the company which would divide the road into two divisions. This was to extend the 70-mile run to Salt Lake City and the 117-mile run to Salt Lake City. The Utah Central being independent of the connecting road from an operative station at Salt Lake being thirty-seven miles. The Utah Central being independent of the connecting road from an operative station at Salt Lake being thirty-seven miles. A good, durable stone walk has already been laid on the west side of Jefferson square, on Sixteenth street, and good stone walks will be laid on all streets

The Discovery of a New Danger Threatening the American People Arouses the Inhabitants of New York.

[New York Correspondence.]

New York City has been more excited during the past month over the revelations which some of the best known scientific men have made, than anything that has occurred before in years. Among the clubs, wherever men and women congregate for social exchange of thoughts have been seen in the most unusual life have been seen leading topics of conversation. One of the most striking of these is a disease known as "Parasitism." A few years ago this disease was regarded as a mere curiosity, but it is now the most dangerous of all diseases. The best doctors in the world are now endeavoring to cure it, but they are generally in vain. It is a disease which is rapidly spreading in all parts of the world, and it is now being introduced into this country by the immigration of the many warships of the approach of this dread disease.

The following resolutions were adopted: Whereas, it has pleased Almighty God in His wisdom to remove to the better world our friend and fellow physician, Emanuel H. Peabody, M. D., of this city, a distinguished and successful practitioner of the medical profession, and a member of the medical faculty of the University of Chicago and Northwestern; and whereas, it is the duty of his fellow physicians to express their regret at his death, and to record his many and prominent virtues and particularly for his high sense of honor both professional and otherwise, and closing with compliments to his great professional abilities.

THEY MUST GO.

In a week or so light weight Suits will be almost unseasonable stock. We have always managed every season to close out our goods and we are determined to do it this time also. We know we have a job on hand. Our stock is considerably larger than it ought to be. We have done a much larger business and the accumulation of odd Suits and broken lots is naturally greater, but our exertions to dispose of them will be greater.

This week we shall have a special clearing sale of Men's and Boy's Suits. We will slaughter values and THE SUITS MUST GO.

First of all we offer at about half price a good dark Cheviot Suit, of which we have a large lot. This is a Suit with which we thought we would make a great hit at \$10.50, but the call this season was for light colored shades, and consequently this Suit did not take so well, though it is very neat. The quality of the goods is excellent. It is lined with good serge, well made and will give a good business suit, and just on account of its being of a dark color, will do well for fall wear. However, we do not want to take any chances of its selling later, besides we will then need room for fall goods, and in order to sell these suits NOW we have reduced them to \$5.90.

Next we call attention to several large piles of light colored Cheviot Suits, broken lots, and leavings of some of our best sellers, handsome patterns, good goods, well made and well fitting. We have reduced them to \$7.50 and \$7.90.

A third lot of suits which must go this week is a fine dark silk mixed Cassimere. This is another suit which has for some reason or other did not take, and we have a big lot of them left. all sizes. The material is a first rate quality. The suit is well gotten up and should sell for \$13.50, as well as any we have in the store at that price. To make them go we have reduced them to \$8.50.

Ask our salesmen to show you these Suits.

Our thin Coats and Vests do not need any more advertising. We have sold thousands of them already, and every customer that bought one advertises them.
