SPECIAL NOTICES.

FIGH SALE—My up-town cigar store, at 312 Broadway, is for sale cheap. Will sell stock and fixtures or fixtures alone. Reasons for selling. Have two stores and can't attend to but one. Splendid business chance for small capital. Inquire of Frank Lovin, 602 Broadway.

WANTED-Good giri for general housework. Mrs. Dr. Hanchett, 129 4th st.

WANTED-To buy a few lots in Mullin's sub-divison. Address, Wm. Larsen & Co., 100 8. Main st., Council Bluffs.

FINE family team for sale, or trade for lot. Inquire 1822 West Broadway.

FOUND-Near reservoir, a pocketbook.

FOR SALE-100 feet of trackage in Bayliss and

Palmers. Must be sold. A sacrifice of \$200 Kerr & Gray.

FOR RENT-Furnished (for two or three months), the house I occupy, No. 124 So. 7th st. H. C. Cheyney.

WANTED-500 pieces og second-hand carpet, also all good second-hand furniture, A. J. Mandel, Nos. 323 and 325 Broadway.

FOR EXCHANGE—Several good farms to ex change for Council Illui's lots. Johnston & Van Patten, Everett block.

FOR RENT-Store room, No. 18 Main St., after July 1. N. C. James, 10 Pearl St.

REAL ESTATE-Bought and sold and ex-

At changed. Special attention given to examination of titles. W. C. James, No. 10 Pearl st., Council Bluffs.

Council Bluds.

FOR RENT-Easy terms two new five-room houses, 15th ave, between High and Third sts. Sell cheap if taken this week. Inquire owner. J. Dickey, 740 B. Way.

telligence of the death of a brother at Daven-port, Ia.

M. I. Sears and A. T. Clatterbuck have formed a partnership, and will devote their time to conducting a real estate and chattel loan and collection business.

There will be no session of the district court to-day, an adjournment having been taken until to-morrow morning, at which time the grand jury will report.

At the next meeting of the school board,

the janitors for the various schools will be elected, and the teachers elected at the last meeting will be assigned positions in the different school buildings in the city. The public library, which was removed to the Merriam block about a week ago, will be opened to the public to-morrow. The public will receive even better attention than ever

in these new and commodious quarters. The firemen's benefit social netted over \$100 for the family of the late I. W. Cooper, and that amount has been turned over to them. The music was furnished by Dal-bey's band, which generously donated its

services. The Omaha brewers are the last ones to receive the attention of the city marshal. The city's revenue is to be increased by a \$25 license, which the marshal has been in-structed to collect from parties who deliver the prohibited article in this city.

The funeral of Mrs. Timothy O'Hearn took place at 6 o'clock yesterday morning from St. Francis Xavier's church, after which the remains were forwarded to Atlantic, where the parents of the deceased reside interment. She was aged twenty-eight Mr. Turner, a millionaire banker of St. Jo

seph, has just invested \$30,000 in 125 lots in Hughes & Doniphan's addition. This shows the substantial manner in which outside capitalists pin their faith to Council Bluffs, and is indisputable evidence as to how her prospects are regarded abroad. Two fires occurred last evening, the first

being the awning at Sam Ford's place of Upper Broadway, and the second at a dwelling on South Main street owned by Mrs. Donahue. Both fires were caused by fire-crackers. Damage slight.

While running to the fire on South Main street the small hook and ladder truck struck a man at the corner of Main and Broadway and knocked him down, breaking his shoulder blade.

As Mrs. Brewer, an elderly colored woman, was about to alight from the motor car at the corner of Eighth and Broadway yesterday afternoon the train started and she was thrown off backward. She was badly bruised about the head and was also injured in-ternally. The physician has not been able to determine the extent of the internal in-

One of the passengers on the out-going Burlington train had a satchel containing \$400 stolen last night. When the train stopped at the crossing a man picked up the satchel, dropped off the train and disappeared. The police are looking for the thief, but as the owner of the satchel can not give much of a description of him the chances of finding him are slight.

Mr. H. H. Inman and Miss Julia C. Newman, both of this city, were united in mar-riage, in Omaha, yesterday afternoon, at the residence of Mr. Carison, on Cuming street. Both parties are well known on this side of the river, where they have resided for several years. Mr. Inman has been a citizen of Council Bluffs for over twenty years, over half of which was spent in the grocery busi-ness. The newly wedded couple left last evening for Lincoln and Denver, on a short wedding trip, after which they will return to and occupy a cozy nome on My ter street.

Have your old furniture upholstered, good as new. R. Morgan, 732 Broadway,

J. Zoller & Co. have moved to 100 Broadway with the largest stock of groceries on Upper Broadway.

One of the finest dry goods stores in Council Bluffs is the new establishment just opened at 406 Broadway.

Rink livery and feed stable. Horses, buggies and carriages. Hacks for call. B. S. Terwilliger, 502, 504 and 506

Ice cream at wholesale. Louie & Metzgar, 525 and 527 Broadway, Council Bluffs.

Personal Paragraphs Miss Mary Adams, of Sioux City, spent the Fourth with her sieter, Mrs. Ballinger, on Washington avenue.

N. P. Dodge, jr., who has been attending school at Williston seminary for the past two years, has returned bome for the summer Mr. George Searle, who has charge of the engineering department of Dunbar & Co., Omaha, is recovering from an attack of vertigo, at his home on Eighth street.

Miss Carrie L. Dodge, a member of the senior class at Smith's college, Northampton, Mass., has arrived home to spend the sum-mer vacation with her parents in this city.

W. H. Dooley, one of the proprietors of the Ogden house, left last evening for his home at Leroy, Ill. He will return in a few weeks to look after his real estate interests in this

Squire N. Schurz, accompanied by his son Herman, leaves this morning for Hot Springs, Ark., where he goes for the beneuit of his health. He will be absent about a month. The Ber will follow him.

W. S. Williams, esq., is home from Mex-leo, and will remain here until his wife recovers from her present illness. Scott tells some wonderful tales of the land of the horned toad, and has a stock of humorous anecdates connected with his southern trip that are of great interest to the boys.

Dr. H. S. West, W. H. Thomas, W. D. Hardin and W. H. Grandy have gone to Colorado for a two weeks' sojourn among the bears and deer. They will stop a few days at Colorado Springs, and then get right down to business. Last year they slaughtered a large amount of game, and hope to break their record this season.

Bodine roofing will last longer and give better satisfaction than any roofing made; will not crack, curl or split, and makes a perfectly solid joint on the en-tire roof. Birkinbine Engineering and Supply company, 115 Pearl street, Council Bluffs, Ia.

The Aldermen Not Inclined to Censure the Water Works Company-The Day at the Lake-Carbee Again in the City.

TESTING THE WATER PRESSURE.

Patriotic Blufftes.

The national holiday passed quietly, but patriotically, in the Bluffs. The small boy and his grown up brother devoted the morn ing hours to industriously establishing effective connections between burning pieces of punk and firecrackers of all sizes and corresponding degrees of noise. A short rest during the middle of the day enabled them to get to work in the evening with greater energy than before, and the result was apparent in the increased racket of the closing hours of the Glorious Fourth.

As far as the Bluffs was concerned the day was a very large one; in fact, one of mammoth proportions, if the expression may be allowed. There were very few disturbances, and these were not of an aggravated nature, and the attention of the police was directed largely to keeping in check the overflowing patriotism that welled from the hearts of the rising generation.

The motor trains and street cars were

unable to meet the demand made upon them and dozons of would-be passengers were left at each trip, unable to secure transportation. During the foreneon nearly all the travel was to the Chautauqua grounds, and train load after train load was whirled out to that load after train load was whirled out to that beautiful spot. The programme there is elsewhere given. In the afternoon every-body wanted to go to the lake, and Colonel Reed was unable to furnish cars fast enough to take them. It seemed as if all of Omaha had come over to this side of the river to spend the day and assist in its proper cele

bration. Those who could not secure passage on the motor took carriages and 'busses and were not long in joining their friends on the lake front. It seemed during the afternoon as if the day was going to be decidedly tame in the central pertion of the city, but the evening more than made amends for oversight of the earlier hours. The display of fireworks was quite extensive, and the cannon cracker fusilade was terrific. The streets were filled with sightseers, and all contributed to the general hilarity of the occasion.

It is pleasing to note, in connection with this, that there were no fatalities or sad casualties to mar the pleasure of the day. Of course, there were the usual number of burned fingers and a few singed mustaches, but there were no distressing accidents to call for public attention.

It was a grand and patriotic display, and

its features were nearly all of a pleasing nature. The observance of the day was creditable to the city, and may be classed among its successful events.

Important to Ladies and Gentlemen I have established an extensive dyeing and cleaning works in this city and desire to call attention of ladies and gentlemen of Omaha and Council Bluffs to the fact that I have furnished my works with the latest improved machinery known to the trade, that I have had over sixteen years' experience, and that I use only the very best dyes and chemicals. I clean and dye everything but fur goods. I call special attention to my new cleaning process by which the garment is not ripped and which restores the original lustre to the goods. Ladies' and gentlemen's summer carments, such as flannels or silk, made o look as good as new. Dresses, clothing silks, shawls, laces and plumes dyed in su perior manner. Motor fare allowed on al goods brought to works, or wagon will call at residence. G. A. Schoedsack, Twin City Dye Works, Twenty-sixth and Broadway Main office 113 South Sixteenth, Omana.

Close of Chantaugus.

Yesterday was the closing and crowning of the Chautauque assembly for the season of 1889. It was a grand, intelligant celebraon of the national natal day. Other cele brations may have had more noise in the air and more red in the lemonade, but none had more to move the emotions or exercise the thought.

There were about six thousand men, women and children who took in more or less of the day's doings at Chautauqua. The foreof the day's doings at Chautauqua. The fore-noon entertainment in the great amphi-theatre was opened with national airs by Rogers' band. This musical organization has made itself very popular with the Chau-tauqua audiences. The excellent rendition of classical pieces is enough to warrant the praise of the critics, but it is not by this that the popularity of the band is caused. More is due to the introduction of musical novel-ties, as is evidenced by the repeated calls for ties, as is evidenced by the repeated calls for the hunting song, in which the crack of whips, firing of guns, baying of the hounds, etc., are heard; the appiause called forth by "The Forge in the Forest," with its gleamings of light, and merry anvit chorus. Yes terday these and other favorites were again rendered.

Another excellent feature of the musical programme of the day was the presence of the Schubert quartette. Like Rogers' band, they render the most difficult selections with wonderful effect, and then they combine wonderful effect, and then they combine with this excellence a successful appeal to the popular ear and emotion by their novelties of "Baa, Baa, Black Sheep," "Peter Piper," etc. The audiences were really wild, and would hardly let them rest their voices. They were very accommodating, and in-dulged the appreciative hearers liberally, singing to the very last minute, and then jumping into the 'bus to catch the train, while nurrahs and the Chautauqua salute of waving handkerchiefs bid them God speed, and expressed the wish for a safe return next

The orator of the day was Hon. R. G. Horr, of Michigan. He spoke for over an hour, and pictured in his own happy, humorhour, and pictured in his own happy, humorous way the greatness of this country and its people. He is an optimist, and his snn-shiny views tinged all the oration, The keen wit caused the laugh to go round and round again, until the many wearied sides were rested by the bits of pathos, introduced as a happy relief. Then there were flashes of cloquence which called forth applicate until the palmage many hands were applause until the palms of many hands were

reddened.
Many of the perplexing questions Mr. Horr sought to solve by having the reform start in the homes of the land. The nation being a banding together of individuals, the bettering of the weifare of the individuals would necessarily lead to a bettering of national life. The home being the greatest influence on the individual life, it was to the homes of the land that all must look as the basis of

national prosperity.

In the afternoon there was a musical treat In the afternoon there was a musical treat—a real concert—in which the band, Schubert quartette and the assembly chorus took part. There was interjected a little prosiac, but necessary information in regard to the financial condition of the great enterprise. Dr. Gillette, who is the superintendent of instruction, gave a summary of the literary and scientific feast which has been in progress for the seventeen days. There had been 241 lectures and public entertainments, classes, etc. Of these 135 had been of the popular order. The season tickets being only \$3, it made each entertainment cost any one less than 3 certs. This was sufficient evidence that the Chautauqua was for the masses. These entertainments were of such high order that one would, during the winter season, have to pay from 25 cents to \$1 to hear any one of them. The 135 popular entertainments would average 50 cents each in any city during the winter season. Yet at Chautauqua the admission to all of them was only \$3.

Dr. Gillette said it was the intention to have as good or better a programme next year.

Dr. Gillette said it was the intention to have as good or better a programme next year. The gate receipts and other revenues were put right back into the enterprise. Hence it depended wholly on the public spirit and generosity of patronage, as to the success and enjoyment of the assembly. The enshusiastic applause throughout his address indicated the willingness of the public to stand by the enterprise.

stand by the enterprise.

Rev. Dr. Phelps paid a belitting tribute to the sacrifices made by the manager, J. E. Harkness. He attributed the starting of this enterprise to his untiring energy and wisdom. There were cries for "Harkness," "Harkness," and amid much applause he made his first appearance on the platform. He spoke but briefly, modestly disclaiming any desire for personal praise or promi-

THE FOURTH IN THE BLUFFS
In the people and for the people. It is success depended upon the people. It is success depended upon the people. It was theirs, and as such they should raily to its support and make it so strong financially as to be beyond all peril.

Rev. Dr. Phelius made a statement of the financial condition, the figures being approach. The programme thus seeson.

financial condition, the figures being approximately correct. The programme this season had cost about \$7,000, including expenses of gate-keepers, etc. The receipts from tickets, tents, etc., had only reached about \$4,000. This left a deficit of \$3,000, and made the total debt about \$20,000. There was about \$5,000 of subscriptions which had not yet been paid. These delinquents should pay at once, and \$30,000 more should be raised to put the enterprise on a solid foundation. The trustees had given their individual notes to borrow \$4,000. They should not be allowed to carry this burden, for it was an enterprise which was for the people at large. Of the \$30,000 additional needed there was about \$6,000 which had been voluntarily pledged by \$6,000 which had been voluntarily pledged by public spirited citizens, some of whom had of their own accord promised to pay \$1,000 cash if the debt was cleared off. All these facts were presented, not for the purpose of rais-ing money at this meeting, but that all might be informed, so that when the committee waited on them they would be prepared to give liberal support to the enterprise.

At 4 o'clock in the afternoon there was a campfire, at which Colonel Champion Chase,

of Omaha, Judge Hubbard and other speak ors made enthusiastic speeches.

In the evening it was expected that Rev.
John De Witt Miller would speak, but a
cablegram was received explaining his inability to reach here.
Fireworks and illuminations closed the

Better Fire Protection Demanded. Work has been commenced on the solution of the water works question, as it pertains to fire pressure. As has been previously stated in these columns, there has been a lamentable lack of pressure at several of the fires that have occurred during the past few weeks, and the matter demanded an investigation. At the last meeting of the city council a committee, consisting of Aldermen Knepher, Lacy and Everett, was appointed to look into the matter and ascertain, if pos-sible, what was needed to remedy the de-

made shortly before midnight Wednesday night. The big ball on the central fire station was cut out from the main tircuit, and a false alarm turned in from box 2, at the upper end of Broadway. Hose 3, from the Broadway fire station, and the chief's

wagon responded. In making the run, the latter vehicle met In making the run, the latter vehicle met with an accident. A buggy had been left standing in the street in front of Norman Green's stable, and the chief's horse dashed into it on a dead run. Assistant Chief Walters, who was driving, was thrown out, and sustained some severe bruises. One hand and arm were badly cut and he also received a deep gash on the left leg below the knee. Chief Walters was thrown out about fifty feet beyond, alighting upon his arm, which was badly strained, upon his arm, which was badly strained, but fortunately no bones were broken. Cor-oner Waterman, who was also in the buggy at the time managed to keep his seat, and stopped the horse after a wild run of about three blocks Had the accident happened on the granite instead of on the block paving, serious if not fatal injuries would have undoubtedly been the result.

Upon reaching the hydrant near the box, two lines of hose were attached. One stream was turned on, and water was thrown about fifty feet. After full pressure was received two streams were thrown, one sixty and the other fifty feet. As the nozzles used were each an inch and a quarter, this result was as good as the contract with the city calls for. good as the contract with the city calls for.

The only trouble was in the time required to get full pressure. As soon as the alarm was sent in the valves at the police station were changed, so as to throw direct pumping pressure on the mains. When the reservoir pressure was shut off the indicator on the pressure gauge ran down to 0, and there remained for nearly ten manufacts when it admained for nearly ten minutes, when it ad vanced to 90 pounds, and in about thirty minutes from the time the alarm was turned in reached 120 pounds, where it remained until the pumping station was notified that the pumps might be stopped.

The question that naturally arose was why it required so much time to get 120 pounds pressure. The firemen asserted that steam must have been allowed to go down, and that this was what had always been the trouble. It was alleged that the water works company attempted to economize by allowing the steam to get down during the night, when the fires were banked, and that pressure could not be secured until the fires were raked down and a good head of steam gotten up. This seemed the only reasonable explanation, and it was generally accepted as the correct one.

Such was the result of the test at the up-town end of the line, and THE BEE visited the water works pumping station yesterday for the purpose of ascertaining how things had worked there, and if there had been any mishap to account for the delay. The engi-neer was seen, and his statement was as fol-

"We do not generally run the pumps dur-ing the night unless for some special reason, as during a fire or something of that kind. as during a free or sometains of that kind.

I live just across the street, and when an alarm is received here the night fireman gives the signal by the whistle. This is done instantly, and it never fails to wake me. I hurry right over here and start the pumps which requires but a very few minutes. We always carry from seventy-five to ninety pounds of steam, and can at any time pump fast enough to throw all the water necessary to maintain a pressure of at least 120 pounds on the mains. Last night I had 120 pounds pressure after the pumps had been working five minutes, and all the while they kept telphoning from the police station that they had eighty or ninety pounds, or none at all. I know that they kept changing the stops, for I could tell by the work of my pressure guage, as well as by the great changes that they kept reporting. My pressure guage was not interfered, and it showed correctly what the pressure was. I know that I had 120 pounds pressure all the time, after the pumps began to work, which was not five minutes after the alarm was received." As the pressure at the hydrant was strong and steady after the remark was strong

and steady after the pumps were started, the statement of the engineer may be regarded as being corrobrated by facts.

It may be said without the fear of successful contradiction that the work at the police station was eminently unsatisfactory and unjust to the motor works company. A party of fully half a dozen men were grouped about the fire pressure machinery, after-nately turning wheels and levers or whatever they could lay their hands on, Their movements were regulated and con-trolled by guess work with an occasional reference to the printed directions. It may safely be said that none of the party could correctly make the change from "reservoir" to "fire," or vice versa, without consulting the directions; yet this they failed to do and the directions; yet this they failed to do and seemed to be simply experimenting instead of properly regulating the apparatus, for the purpose of making a fair and impartial test. It would seem to an outsider that they were trying to see how badly the whole affair could be botched up. Several times the water was entirely shut off from the guage for some minutes. Frequently the drain was closed when it should have been open and the influent was open when it should have been closed. The apparatus was changed at least a dozen times, and all this, too, without any necessity or excuse whatever.

any necessity or excuse whatever.

This being the case, it is not at all surprising that the guages at the police station and the one at the pumping station should vary so materially. The test can not be regarded as a fair one, or even as any test at all. The using of the fire apparatus as a mere play thing when its best services are needed can not result in good an efficient service.

This burlesque of a test adds great strength to the argument made by Alderman Lacy at the last meeting of the council that this apparatus should be removed from the police station to one of the fire houses. Said he: "There are a great many times when the police station is locked up, and no one there to attend to the apparatus in case of an alarm. There are frequently changes in the alarm. There are frequently changes in the jailors on duty, and the new men are not acquainted with the workings of it. If stationed at a fire house, a man could be de-tailed for this especial duty whenever an alarm was received." This is but a straw to show which way the

wind blows, or how this alderman stands upon the subject. It cannot be disputed that Alderman Lacy is one-of-the best qualified Adderman Lacy is one-of-the best qualified men in the city to pass upon the question of fire pressure or fire service of any kind. He was for several years chief of the local department, and has served on both the fire and water committees in the council. In view of all of his experience, his opinion must necessarily be; worth something. At the last meeting of the council he plainly stated that the trouble in the past had not been with the pressure, but with the fire department in attaching too many lines of hose to a small

g too many lines of hose to a small THE BEE has repeatedly called attenmain. The Bee has repeatedly called atten-tion to this very thing since the disastrous packing house fire some time ago. Alderman Lacy particularly called attention to the Strock Bros.' planing mill fire, where there was ample pressure, but too many lines on the main. At the packing house fire, five lines of hose were attached to a four inch main, but the water werks company was cen-sured for neglect to give pressure.

A little investigation has shown the diff-

A little investigation has shown the diffi-culty to lie far from the doors of the water works company, in all of these recent fires. The two above stated are not the only ones that may be explained in a similar manner. At the fire at Snoemaker's house, corner of Seventeenth street and Fourth avenue, the hydrant was but partially opened and the water, held back from its proper outlet, washed out a hole saveral feet in diameter. yet the same howl was raised of a lack of

ressure.
At the Blackman stable fire a few days ago, the alarm failed to come in at the water works pumping station owing to trouble with

the electric apparatus, and pressure was not turned on until ordered by telephone. As soon as ordered the pressure was given. It seems strange that all of this trouble has arisen of late when heretofore almost perfect service has been given, and there are many who coincide with Alderman Lacy that the trouble must be looked for outside of the water works system proper.
Alderman Everett expresses the opinion

that a thorough investigation is called for, to demonstrate who is to blame. He thinks that several tests should be made to see if the water works company is complying with the requirements of the contract, which provides that any hydrant must be able to furnish two fifty-foot streams from an inch nozzle. As the city is not provided with inch nozzles this test is never made, and the alderman from the Fourth ward insists that they must be purchased at once for this

test of Wednesday night was more than equal to this, and other tests in various parts of the city are needed to see whether the same will hold true regarding all of the mains and hydrants. The circumstances, as thus far developed, indicate that Alderman Lacy's theory is good, and that further tests will only tend to corroborate his opinion as dready expressed.

A WEB-SPINNING MONSTER.

Big Spiders Found in the Mountains of Ceylon. Far up in the mountains of Ceylon and India there is a spider that spins a web like bright yellow silk, the central net of which is five feet in diameter, while the supporting guys, as they are called measure sometimes ten or twelve feet long, and riding quickly in the early morning you may dash right into it, the stout threads twining round your face like a lace veil, while as the creature

right in the aose, and, though he dom bites or stings, the contact of his large body is anything but pleasant. If you forget yourself and try to catch him, bite he will, and, though not ve-nomous, his jaws are as powerful as a bird's beak, and you are not likely to

who has woven it takes up his position

in the middle be generally catches you

forget the encounter.
The bodies of these spiders are very handsomely decorated, being bright gold or scarlet underneath, while the upper part is covered with the most delicate slate-colored fur. So strong are the webs that birds the

size of larks are frequently caught therein, and even the small but powerfully scaly lizard falls a victim. Often have I watched the yellow or scarlet monster, measuring, when waiting for his proy, with his legs stretched out, fully six inches, striding across the middle of the net, and noted the rapid manner in which he winds his stout threads around the unfortunate captive, says a writer in Rare Bits. He usually

throws the coil about the head until the

wretched victim is first blinded and then choked. In many unfrequented dark nooks of the dark jungle you come across most perfect skeletons of small birds caught in these terrible snares, the strong folds of which prevent the delicate bones from falling to the ground after the wind and weather have dispersed the flesh and feathers.

You can not accomplish any work or business unless you feel well. If you feel used up—tired out—take Dr. J. H. McLean's Sarsaparilla. It will give you health, strength and vitality.

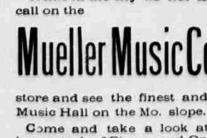

Evergreens for Windbreaks. Farmers who grow evergreens either for utility as a windbreak or for ornament, lose much of their value by neglecting to prune them, says the Iowa Homestead. As a result, many of the varieties grow up scraggy and open. This is especially true of Scotch pine. It makes its entire growth for the season in about six weeks ending early in

July. All that is necessary is to take a pair of seissors and clip off half their new growth. This shortens up the spaces between the branches, and as a result the tree grows compact and dense, a perfect thicket of green leaves which the blizzards cannot penetrate. Now is the time to think of this, and if you are fearful of spoiling the looks of the grove, try it this year on a few trees. Nothing is so easy to control as the shape of the evergreen, and in no department is it easier to improve on nature.

Will you suffer with dyspepsia and liver complaint? Shiloh's Vitalizer is guaranteed to cure you.

Wonders of Science. New York Weekly: Blinks-If you have so much trouble with your teeth. why don't you get artigcial ones? The idea of being bothered that way in this marvelous age of scientific and mechanical progress! I got a full set a few months ago. DJinks—Indeed! Are they a success? Blinks-Success?
