

THE CITY.

No marriage licenses were issued yesterday. Amended articles of incorporation were filed yesterday by the Western Casket company, making the capital \$10,000.

James Hansen, a West Omaha milkman, was arrested, charged with carrying a vicious dog. The case will be heard today.

A. J. Wright and R. T. Stewart, deputy United States marshals, have returned from the interior of the state, where they have been serving processes of the United States court.

Thomas Wyrick, who has been held in the Black Hills, has been released from Des Moines county, Iowa, where he was alleged to be under indictment for embezzlement, was discharged by Judge Becker, the complainants failing to appear.

A warrant has been sworn out for Ernest Meyer, a South Thirtieth street saloon man, at the request of one of his former bar keepers, charging him with maintaining a nuisance by keeping a lot of wild animals at his place of business, which are said to make a great noise and keep up a disturbance, to the disgust of the neighbors.

Justice Wade was engaged yesterday in hearing the case of Callahan vs. Cassidy, to recover money lost on a bet. Callahan deposited \$100 with Cassidy as a stakeholder, the bet being on a horse race. The race came off, but Callahan claims the condition was to agree with the terms of the bet. The stakeholder thought otherwise; hence the suit.

KNOCK OUT CORNWALL.

Mr. Simmons Thinks the Harney Peak Tin Mines Will Do It. Hon. D. J. Simmons, of Rapid City, Dak., was in Omaha Monday purchasing supplies and looking after matters relative to his business in developing our mines and setting up the agricultural valleys. We have developed and are developing tin mines," continued Mr. Simmons. "These I regard the most important mineral discoveries ever made on this continent. In the year 1858, \$30,000,000 worth of tin and tin plate, one-third of the world's product, was imported into the United States. The records in the United States show a constant annual increase in importations owing to the growing demand for tin for packing articles of food, roofing, etc. The tin discovery was made in 1858. No one believed in it even after they saw it. Two years ago a ton of the ore was sent to Omaha by the Rapid City company, an exhibition was held at an exposition, and a gentleman was sent along with it to explain and talk it up. Thousands of people looked at that pile of rocks without even exciting their interest or curiosity. It was too near home, and they did not believe in it. Neither did the people of Chicago or other cities. But now that the Harney Peak company of New York and London capitalists have developed and demonstrated the value of the mines, everybody wants to buy, but there is not going to be enough to go around.

"The Harney Peak company has three millions of dollars in its treasury for opening its mines and constructing machinery, furnaces, etc. It is believed by the English capitalists and has been so stated and printed in this country and in England, that these mines will supply the United States with tin. Beginning about thirty miles from Rapid City and extending fifty miles around Harney Peak the country is cut by a perfect network of tin veins known to miners as 'tin veins' and veins with a varying width of from one to one hundred feet. The greatest depth reached is 3,000 feet. The Harney Peak company has now three hoisting rigs with pumps and power drills capable of going down 3,000 feet, and this company is opening its mines and extracting ore for producing tin for the market. It is also about to construct a concentrating mill of 1,000 tons daily capacity. Furnaces for smelting will also be erected. A number of other companies are engaged in developing their mines and constructing machinery."

Questioned as to the quality of the ore and process of reducing it, Mr. Simmons said it contained a large amount of iron, and is separated through the vein matter of the ores in little black particles from the size of a pin head to the size of a bean; that these particles are such heavy and are encasing rock and were separated by pulverizing the whole mass and passing it through jigs or other concentrating machinery. The tin miners as "oro dressing," or "concentration," being the same process employed in refining the Lake Superior ore and certain silver ores such as galena and pyrites of iron carrying gold in Colorado and elsewhere.

"The tin in our district yields from 1 to 5 per cent metallic tin when it goes to the furnace. "The Cornwall district in Wales, which has been the greatest producing district of the world for centuries, does not compare the area of the tin discoveries of the Black Hills, and they have about reached the point when they can no longer be worked. It is a profit owing to the expense of raising ore and pumping water from such great depths. It is in the tin mines of Cornwall and employed in Cornwall. You can form some idea from this of the magnitude of the industry which will be in the Black Hills. It is a matter of manufacturing, and will employ large numbers of miners and laborers and great quantities of machinery. The tin mines of Cornwall, our tin mines and the manufacturing of our own tin plate in this country is a matter of national importance, and soon to be realized."

Rapid City, predicts Mr. Simmons, destined to become the most important commercial point of the Black Hills. It is a manufacturing center as well as the base of supplies for the entire mining region. The town is well built, and its citizens are full of enterprise. Mr. Simmons returned here last night.

EMANCIPATION DAY.

The Colored People Will Observe It in a Grand Manner. Arrangements are being made for a grand celebration of emancipation day at Weeping Water August 1. An excursion will be run on the Missouri Pacific under the auspices of the African Methodist Episcopal church and Lodge No. 2295 of the Grand United Order of Odd Fellows, of this city. The train will leave the Webster street depot at 8:30 a. m., and will return at 8 p. m. The fare will be \$1 for the round trip. Delegations from the following points will be present: Council Bluffs, Nebraska City, Aurora, Falls City, Hastings, Blair, Lincoln and Hiawatha. The address of welcome will be delivered by the mayor of Weeping Water, and the response by Rev. P. A. Hubbard, of this city. Addresses will also be delivered by Rev. James W. Braxton, of Lincoln, and Rev. John Young, of Nebraska City. A magnificent spread will be served on the picnic grounds, and no means will be spared to make this one of the leading social events of the season in colored circles.

No Thumping This Time. Justice Knoeger heard the case of William Sears against S. and H. Livingstone. The action is to recover \$200 attorney fees which Sears claims for conducting a breach of promise case for the defendant's sister at Muscatine, Ia. When the case was first called on Justice Knoeger's court in May, Sears assaulted S. Livingstone, for which offense a case against him is still pending in the police court. There was no trouble, however, yesterday's hearing Justice Knoeger has taken the case under advisement.

Bemis Park Sewer. The contract for sewerage Bemis park was let to John F. Daley for \$6,000. It calls for the laying of 1,000 feet of 24-inch pipe, 3,000 of 18-inch and 7,000 of still smaller pipe. These are to empty temporarily into the drainage ditch, which runs through the place, with the intention of eventually being connected with a main sewer on Thirtieth and Cumby streets, when the same shall be erected.

Horns of Plenty. Hon. Thomas Majors, of Peru, is in the city and reports great prosperity among the agricultural people of Nemaha county. "The corn, wheat and oats crop," said he, "is simply marvellous. At no time since Nebraska was opened to settlement has there been such a yield of farm products as we will have this year."

Mr. Majors says that the political situation is very quiet. He professed absolute ignorance of anything new, and thinks the people will be undisturbed for a year at least.

Rinse the water pipes twice a week with Platt's Chloride, and so keep them sweet and clean.

BLACKSMITH ASSESSMENT.

The Botched Job Which the Commissioners Have Patched. The board of equalization has completed the work so far as hearing complaints against assessment are concerned. County Clerk Roache will transmit his report to the state auditor this morning. As a result of these complaints, the assessors' work has been changed considerably. A raise of 5 per cent was made on lots in the First ward and on personal property in the Third ward. The assessment in the Second ward has been decreased 5 per cent. Among the waterworks company, Chicago, Waterloo, Elkhorn and Jefferson come in for changes. In the first mentioned, lots are raised 25 and lands 10 per cent; Elkhorn, lots 10, lands 5; Waterloo, lots 20; Elkhorn, lots and lands 10; Jefferson, lots 25 and lands 5; Florence city lots, 10 per cent.

In South Omaha the W. L. Selby addition is raised 10 per cent. Regarding the waterworks company, it was found that on their real estate the assessor made a mistake and assessed the wrong lot. This has been changed by raising block 127 in block 1 from \$300,000 to \$300,000 and lowering lot 7 in block 1 from \$300,000 to \$300,000. The company's new building was exempt because it was not completed. However, an additional assessment has been ordered of certain new machinery that has been put in place.

Commissioner O'Keefe says that the work this year has been more poorly done than ever before. The discovery of many serious errors has been made. In the Third ward a great many business firms have been omitted and the same mistake has been noticed also in other wards. The assessment of our bridges has attracted a great deal of attention. The Union Pacific bridge is valued at between \$500,000 and \$1,000,000, and the west half, which is located in Douglas, is assessed at \$125,000. Nearly all of the Omaha and Council Bluffs bridges in this county, and yet it is assessed at only \$18,000.

Assessors' Pay. The assessors are somewhat interested as regards the settlement of the question of wages. One of them, Henry Ehrenfort, of the First ward, says he worked the 61 days terminating at the statutory limit. He also put in some of his leisure days. His salary, with overtime, worked 55 days, making in all 117 days, which at \$3 per day would be worth \$351. He has been paid for both himself and deputy \$354. This amount paid him for the regular days' work, leaving the extra time yet to be paid.

A Twenty Years' Experience. C. D. Fredricks, the well-known photographer, 770 Broadway, N. Y., says: "I have been using ALLCOCK'S POROUS PLASTER for twenty years, and found them one of the best of family medicines. Briefly summing up my experience, I say that when placed on the small of the back ALLCOCK'S PLASTER fills the body with nervous energy, and thus cures fatigue, brain exhaustion, debility and kidney difficulties. For women and children I have found them invaluable. They never irritate the skin or cause the slightest pain, but cure sore throat, coughs, colds, pains in the back or chest, indigestion and bowel complaints."
