

RESOURCES OF ALASKA.

Captain Ray Describes Them and the Thrifty Indians.

Captain P. Henry Ray, judge advocate of the department of the Platte, has just returned from his trip to Alaska with the senatorial committee on Indian affairs.

The committee consisted of Senators Davis, of Massachusetts; Manderson, of Nebraska; Stockbridge, of Michigan; and Jones, of Arkansas. The party were accompanied by Sergeant-at-Arms Candady of the senate, who acted as major-domo and courier.

"The United States steamer Albatross," said the captain, "was placed at the disposal of the party, and conveyed us to a number of points along the coast, among them being Louisa, Wrangell, New Matia Katia, Sitka, the head of Chilkoot inlet and Chilkoot inlet. On the way back the towns of Juneo and Douglas Island were visited.

"The idea of the committee was to determine what was necessary to give the Indians in that portion of the country title to their lands, and to open up the lands for settlement by the ordinary Indians of this country. They are not nomads, but are what may be termed village Indians. They are a maritime people and are in an advanced state of civilization. Their general condition is good, they are well behaved, and are in a prosperous condition.

"The committee looked more especially into the affairs of the Port Chester, or New Matia Katia Island, branch of the Hydras Indians. A curious state of affairs exists among these people.

"Many years ago William Duncan, a missionary of the Church of England, went among these people and commenced the work of civilizing them. He taught them trades, showed them how to govern themselves legally, and brought them to a comparatively high state of civilization. The particular tribe to which Duncan devoted himself were the British possessions, but about the time he accomplished the great task of civilizing them a bishop of the Church of England appeared on the scene and announced Duncan's religious teachings to 'low church,' and at once began the work of changing their religious worship to suit his ideas. About eight hundred of the Indians, accompanied by Duncan, packed up their effects and crossed the line to New Matia Katia Island, where they at once built them a town of 20 houses, one school house, one church and a co-operative store. They also established a large cannery factory, and a number of other businesses. They are of a high grade of intelligence, which is the result of development mostly.

"This tribe has petitioned the government to give them a title to the land they occupy. The land is all government property and has never been sold. The title is in the hands of a bill will be introduced at the next session of congress, by the committee, to settle the question of Indian citizenship.

"This trip was a revelation to the senators," said Captain Ray. "They were not prepared to see such a magnificent country. The forests of the interior are almost impenetrable. There is a dense undergrowth which is so thick it cannot be penetrated in most places. The forest is so extensive that it is difficult to get together that the supply of timber is practically unlimited.

"The Treadwell mine on Douglas Island is another point of great interest. This mine is like an open quarry, in the side of a hill, with tracks running up to it for ore cars. Blasts are put in which throw out a quantity of nearly pure ore. Twenty-six stamps are required to handle the output of the mine. The average yield is about \$125,000 in gold per month.

"Across the fjord opposite Treadwell is Juneo, where are located several valuable placer mines, where valuable deposits are found. "I have great confidence in the future of Alaska," concluded the captain. "It is a country rich in valuable minerals, and an inexhaustible timber supply and a climate which will be a revelation to the majority of people. It is salubrious and healthful. The temperature seldom goes below zero and the general climatic conditions are almost exactly similar to those of England. The influence of the gulf stream over England, and the valuable ore deposits are of themselves sufficient to draw an immense tide of immigration in that direction."

A VIGILANT FLAGMAN.

James Gardner's Watchfulness Prevents a Terrible Catastrophe. "For God's sake, stop your train."

"Well, that is a new one. I had not heard of such a thing before. I have no objection to the sort, but what the future might develop is hard to tell. The matter has not occurred to me before. I have no objection to the sort, but when it does I shall certainly retire from the road and sever my connection with the railroad entirely before becoming a candidate. I haven't had any such ideas as to my proximate senatorial election; I know of nothing at present to make me consider it. I shall become a candidate for the senate," continued Mr. Thurston, "until I get better fixed financially than an ant at present. I have never made a dollar except from the practice of my profession, have never been in any speculation, and am a comparatively poor man. My family take no interest in my present position, is a pleasant one in every way, and I should never think of giving it up for the uncertain chances of political preferment unless I could first accumulate enough property to make me moderately independent."

THE FORESTERS.

A Very Pleasant Picnic at the Water-Court Magie City Grounds. Court Magie City, Neb., Independent Order of Foresters, of South Omaha, gave an excursion and picnic to Waterloo yesterday. A train of eight coaches and a baggage car left the Omaha depot at 10 a. m., having on board about fifty persons, representatives of the two Omaha courts. At South Omaha the train was fitted to overflowing by the members of Court Magie City, their friends and families. It was purely a pleasure seeking party. Young men and maidens, middle-aged men and sedate matrons, old people and children, all were represented. It was a most orderly crowd. The party were in charge of Mr. J. W. Field, the regular passenger agent of the Union Pacific, who saw to it that everything which could contribute to the pleasure of the day was provided.

Waterloo was reached a little before noon, and there was a scramble for tables and chairs. Large grassy plats, baskets were produced and forced to undergo their contents of delicious edibles. After the very important duty of satisfying the wants of the inner man had been performed, the attention of every one was directed to the dancing platform, where the speech-making propensity of a number of the more prominent members of the order was indulged. Following this there was a general dispersing to all parts of the grounds. These picnic grounds form a natural park fourteen acres in extent. About half of this has been cleared of the dense undergrowth, while the remainder has been allowed to retain its natural state. All sorts of amusements have been provided by the management, including a track for foot racing, a dancing platform, a baseball ground, ball grounds, boats, facilities for fishing, etc.

The Union Stock yard band and a string band accompanied the picnicers and discoursed sweet music at intervals during the day. Several impromptu foot races took place, a game of baseball was arranged between two picked players, a party of sportsmen arranged a pigeon shooting match in an adjoining stubble field. One of the attendants at the grounds pronounced this the most orderly crowd of any which had picnicked there on Sunday since the place was opened. Promptly at 7 o'clock the train pulled up to the grounds and a general scramble ensued for seats. All were tired and willing to go home, and were glad to see the train which was a most enjoyable day had been passed.

C. P. DIFFERENTIALS.

The Road Reluctantly Yields to a Reduction of 30 Per Cent.

J. S. Tobbets, assistant general freight agent of the Union Pacific, returned yesterday morning from Chicago, where he had been in attendance at a meeting of the transcontinental association. Mr. Tobbets states that a settlement has been reached, and that all lines of the association are in harmony with each other. In the settlement the Canadian Pacific submitted to a reduction in its differentials aggregating about 30 per cent on transcontinental business, and the Northern and Southern Pacific, which had each given notice of withdrawal from the association, thereupon canceled their notice. No reduction was made in the differential applying to business to and from St. Paul and Pacific coast points.

The following reduction was made in Canadian Pacific differentials, the same being the grounds of settlement: From Chicago, Milwaukee and common points to the Pacific coast, and vice versa—25 to 17; class 3, 21 to 14; class 4, 17 to 11; class 5, 17 to 11; class 6, 13 to 7; class 7, 13 to 7; class 8, 13 to 7; class 9, 7 to 5; class 10, 7 to 5.

Detroit, Toledo and common points to Pacific coast, etc.—class 1, 30 to 21; class 2, 25 to 17; class 3, 21 to 14; class 4, 17 to 11; class 5, 17 to 11; class 6, 13 to 7; class 7, 13 to 7; class 8, 13 to 7; class 9, 7 to 5; class 10, 7 to 5.

Pittsburg, Buffalo and common points—class 1, 33 to 23; class 2, 27 to 18; class 3, 23 to 15; class 4, 15 to 12; class 5, 15 to 12; class 6, 11 to 7; class 7, 11 to 7; class 8, 7 to 5; class 9, 7 to 5; class 10, 7 to 5.

New York, Boston, Philadelphia, Baltimore and common points—class 1, 40 to 28; class 2, 35 to 24; class 3, 25 to 17; class 4, 20 to 14; class 5, 20 to 14; class 6, 15 to 13; class 7, 13 to 8; class 8, 10 to 7; class 9, 7 to 5; class 10, 7 to 5.

Differential on wool in grease, 7 1/2 cents. It is stated that the Canadian Pacific entered a bitter contest with the other lines in its reduction in its differentials, and only accepted the revision when the Northern and Southern Pacific declared that they would withdraw from the association unless the Canadian yielded to the above reduction. It is thought now that no further trouble will be experienced.

DON'T MISS THE OPPORTUNITY.

To Visit Ogden and Salt Lake City, Utah, or Hailey, Idaho. A grand excursion to the above named points will leave August 20th, via the Union Pacific, "The Overland Route," and for this occasion the exceedingly low rate of \$30 to Ogden and Salt Lake City and return, and \$35 to Hailey, Idaho, and return has been made from Missouri river terminals.

This excursion affords our patrons a magnificent opportunity to visit Garfield Beach on Great Salt Lake, the finest bathing resort in the world, and also visit Hailey Hot Springs, famous for its medicinal properties. Tickets good thirty days.

For further particulars address E. L. LOMAX, G. P. A., Omaha, Neb.

THE SENATORIAL BEE.

Faint Buzzings in J. M. Thurston's Bonnet-Adams' Head is Safe. Mr. J. M. Thurston has returned from his western trip. He joined Governor Alton's party, which passed through Omaha some weeks ago, at Salt Lake. From there the party went to San Francisco, thence to Portland and up the Columbia river. Returning to Portland, they then proceeded to Tacoma, where a steamer was taken to points along the coast of Alaska, touching at Port Victoria, Victoria, Gastown, Wrangell, Glacier Bay, Sitka, Chilkot bay, Juneau and Douglas Island.

A number of Nebraska people were met at Tacoma, and formed a pleasant party on the steamer. Mr. C. H. DeWey, W. V. Morse, wife and children, and N. W. Wells, of Omaha, and ex-Senator Harlan with a number of people from Iowa, were among those on board.

"The trip was purely one of pleasure," said Mr. Thurston to a New reporter last night, "and had no political or business significance whatever. I left Governor Alton's party at Tacoma and they returned home from which I had been invited to attend to, and have occupied about three weeks in getting home. On my arrival I found a letter from the general stating that they had arrived home."

Mr. Thurston was asked what foundation there was for the reported removal of President Adams. "I have not the least idea that the report has any foundation," replied Mr. Thurston. "I have never seen the general in the last few years about the Ames faction and the Dillon faction and the Adams faction. I have never seen the general in the last few years about the Ames faction and the Dillon faction and the Adams faction. I have never seen the general in the last few years about the Ames faction and the Dillon faction and the Adams faction."

ANOTHER BIG TOWER.

A lower similar in design to the Eiffel tower at Paris is to be built at Eagle Rock, N. J. It will be 400 feet high, but will be on a lofty summit. The electric light will be visible far out at sea.

Rheumatism.

BEING due to the presence of uric acid in the blood, is most effectively cured by the use of Ayer's Sarsaparilla. Be sure you get Ayer's and no other, and take it till the poisonous acid is thoroughly expelled from the system. We challenge attention to this testimony:—

"About two years ago, after suffering for nearly a year with rheumatoid gout, being able to walk only with great discomfort, and having tried various remedies, including mineral waters, without relief, I saw by an advertisement in a Chicago paper that a man had been relieved of this distressing complaint, after being cured by using Ayer's Sarsaparilla. I then decided to make a trial of this medicine, and took one bottle, and in a few days I began to improve at once, gaining in strength and complete cure. I have since had no return of the disease. Mrs. R. Irving Dodge, 110 West 23rd St., New York.

"One year ago I was taken ill with inflammatory rheumatism, being confined to my house six months. I came out of the sickness very much debilitated, with no appetite, and my system disordered in every way. I commenced using Ayer's Sarsaparilla and began to improve at once, gaining in strength and soon recovering my usual health. I cannot say too much in praise of this well-known medicine. Mrs. L. A. Stark, Nashua, N. H.

COUNCIL BLUFFS.

Work for a Milk Inspector.

Certain of the city papers have published the following: A man named Penny owns a large number of cattle which are being fed on the bottom lands near the river. Recently a strange disease broke out among the herd, and it spread with frightful rapidity. In a short time fully 150 head were afflicted, and the disease has appeared in other herds near at hand. Steps have been taken for an examination of the cattle by the state veterinarian, who will be assisted by Dr. Ramaciotti, of Omaha. Exciting has been taken not to allow the cattle now afflicted to mingle with others, thus preventing a spread of the disease beyond the three lots now in quarantine. As yet no fatal cases are reported, but it is feared the result will be the death of nearly, if not all, of those now afflicted. The nature of the disease is not known.

Dr. S. S. Stewart, assistant state veterinarian, states that the matter has been misrepresented. The disease is contagious and fatal, and a brief history of the case was given in the papers a few weeks ago. The disease has been spreading through the city for several weeks, and is not known to any particular herd or locality. It first was noticed among the cows belonging to citizens, which were herded in the western part of the city. The animals were not and will not interfere in the matter, as the result is not fatal. Notwithstanding the fact that the disease is contagious, and that it is not known to any particular herd or locality, it first was noticed among the cows belonging to citizens, which were herded in the western part of the city. The animals were not and will not interfere in the matter, as the result is not fatal. Notwithstanding the fact that the disease is contagious, and that it is not known to any particular herd or locality, it first was noticed among the cows belonging to citizens, which were herded in the western part of the city.
