When the appropriation bill comes up I will offer an amendment striking out the item making the appropriation for its support. Nine-tenths of the members know that the law is a fraud and say so in private. Now I am going to smoke those fellows out and put them on record. That is the way it was done during Grant's administration, and that is the way I am going to try to do it now. Talk a rout the spoils system, why, those three civil service commissioners are the biggest scoundrels that this country ever saw. They are trying to get possession of the entire government, and they are not a great ways behind it now. I believe the civil service law is unconstitutional and I am going to support an amendment to decide if the question ever came before that tribunal.
