

THE CONDITION OF TRADE.

A Good Supply of Money and an Active Demand.

CLEARINGS SHOW AN INCREASE.

Jobbers Report Business Lively and the Outlook Bright for a Handsome Gain in the Year's Total.

In Local Trade Circles.

The clearings of the week, as footed up by Mr. Hughes, footed \$3,783,470.05, an increase of 11 1/16 per cent. Balances were \$228,285.90. Money is in very good supply, with an active demand from jobbers and manufacturers, supplemented by liberal advances from builders and contractors.

Jobbers say trade is very good and increasing daily, and the year's business will surely show a handsome increase over 1888. Collections are fair, and outstandings are not as large as usual at this season, when the volume of business is considered.

The outlook in the wholesale and banking district is very comfortable and sanguine from a sides and a steady feeling seems to prevail. Retail trade is not so good owing chiefly to the dry warm weather of the month, but our merchants evidently have confidence that a demand will arise as soon as they have stocked up heavily with a finer class of goods than usual and look for ample returns. Prices on most staples are steady from a sides and a steady feeling seems to prevail. Retail trade is not so good owing chiefly to the dry warm weather of the month, but our merchants evidently have confidence that a demand will arise as soon as they have stocked up heavily with a finer class of goods than usual and look for ample returns.

Butter has advanced from an active demand for the better grades, but there is much of the so-called inferior grades, which is a little better. Coffee is firm for choice grades, and until this is disposed of, by export probably, there will be a depressed market for butter. The publication of the first definite estimates of the European crop by M. Licht, of Breslau, has had a marked effect on the market, and has created a depressed feeling that has been intensified so far as the local situation is concerned. The market for coffee is a little better, and until this is disposed of, by export probably, there will be a depressed market for butter.

On the Market To-day. Gus Bradenberger, of Molina, came in with hogs. C. W. Lumm, of Henderson, Ia., had hogs on the market. Bruen & Hamilton brought hogs in and are looking for a sale. C. S. Baird brought two car loads of hogs up from Landis, Mo.

Building Permits. The following permits were issued by Building Inspector Whitlock yesterday: Thomas Davis, cottage, Pierce and Ninth streets, \$1,000; J. H. Smith, dwelling, 6th and 10th streets, \$1,000; J. H. Smith, dwelling, 6th and 10th streets, \$1,000; J. H. Smith, dwelling, 6th and 10th streets, \$1,000.

Internal Revenue Changes. Internal Revenue Collector Peters has commenced to replace some of the Cleveland democrats holding office under his jurisdiction with good republicans. He has put G. W. Tierney into Her & Co.'s as well as A. Erick & Co.'s warehouses, as gauger, relieving E. H. Smith. Inasmuch as Tierney held a similar position at the Willow Springs distillery, his transfer caused a vacancy there, which was given to C. H. Wilson. Messrs. Hughes and Calkins have been named as successors to G. E. Gendulitz and John Steinbaker, removed.

A Unique Entertainment. The Knox Presbyterian church, on Ninth and Ohio, was the scene of a unique entertainment, Friday evening. There were seven booths, each representing a day in the week. This Monday was wash day; Tuesday, ironing day; Wednesday, mending day; Thursday, reception day; Friday, sweeping day; Saturday, baking day. Refreshments were served at each booth. The success of the affair was due in a great measure to the personal efforts of Mrs. H. H. Taylor, president of the Ladies' Aid society.

Marriage Licenses. The following licenses were issued by Judge Shields yesterday: Name and Residence. Age. J. P. Smith, Omaha, Kan., 29; Theodore Carey, Omaha, Kan., 19; Ole Peterson, Omaha, Kan., 30; Wiley Hickey, Topeka, Kan., 37; Helly Royster, Omaha, Kan., 30.

Small Customer—Maama wants a pound of boned codfish. Grocer—All right, give anything else. Grocer—A dozen eggs. Ladies—These boned codfish, too.

THE SPECULATIVE MARKETS.

Wheat Shows Its Only Firmness at the Start.

SPRITLESS TRADING IN CORN.

Oats Show Up Rather Firm—Provisions Prove Fairly Interesting—Cattle Business About the Same—Quotations.

CHICAGO PRODUCE MARKETS.

Chicago, Sept. 28.—[Special Telegram to The Bee.]—The wheat market was firm and active early today, but as a whole it was heavy in tone, and a sharp decline occurred in the last hour and a quarter. Sentiment was bearish, though great caution was exercised in starting the market. The demand was moderate and offerings were not excessive in the first half of the session.

Four out of five of the operators who were "chooping things up" a few days ago are outspoken for a reaction. Cables came along earlier than usual, and the blackboard was distinctly not bullish. For that matter it has not been bullish for two weeks, the interior receipts being largely in excess of the shipments, while exports are discouragingly light.

A great deal of steam has been let off in the speculative market since last Wednesday, and, as no new fuel has been added, the feeling is that of languor. Indications would point strongly in the direction of a further reaction but for the one fact that stocks of contract wheat are dangerously light and the quantity of arrivals continues to make a poor showing.

It is true that the market has averaged in the past ten days has started considerably ahead forward, but only a small percentage of it will come to Chicago. St. Louis will get the bulk of southwestern wheat, and Duluth and Minneapolis the bulk of northwestern wheat. The movement in the northwest promises to increase to a larger volume than in the past few weeks.

Indeed, the principal factor of weakness to-day was the assurance received by well informed people that a very urgent demand for cars in Minnesota and Dakota postponed a very heavy movement of spring wheat next week and possibly for considerable time further in the season. Dispositions from Duluth early in the day mentioned the working of 75,000 bushels of hard wheat for export, but this could not be confirmed. New York advised that eight loads had been taken there for shipment to South America.

The local market did not display decided weakness until nearly 12 o'clock. Up to that time December wheat averaged about 85c and May about 87c, the extreme range having been 82 1/2c for December and 89 1/2c for May. During the last hour, however, values receded, and the market did not manifest rallying power. Last prices were at about the bottom and the tone of the market was that of a steady decline.

Chicago, Sept. 28.—[115 p. m. close.—Wheat—Lower; September and October, 80 1/2c; December, 82 1/2c; May, 84 1/2c; 1890, 82 1/2c; 1891, 80 1/2c; 1892, 78 1/2c; 1893, 76 1/2c; 1894, 74 1/2c; 1895, 72 1/2c;
