Several of the older ones about the city it is feared will terminate fatally.

Mrs. Mel Gregory is very dangerously ill, and Miss Stevenson is also in a precarious condition.

The latter was reported last evening as being barely alive, and not expected to live until morning.

Butler Van Dyke, night yard master at the Northwestern, was taken before the insane commissioners yesterday for examination.

The board pronounced him sane, and he was released.

It is said to be a case of too much mother-in-law.

The lady visited the family and a rumpus ensued, which resulted in the family furniture to furnish the old lady money with which to travel.

The upshot was the preferring of the charge of insanity against the husband.

It is stated that all trouble is now amicably settled.

BRIDGEPORT, Oct. 9.—The wedding of Miss Maud McCallister and Mr. Charles L. Easton, secretary and treasurer of the Council Bluffs Gas and Electric Light company, was celebrated at the residence of the bride's father, Mr. Charles L. Easton, on Wednesday evening, the 7th inst.

Trying to Lease the Gas Works

Several of the proprietors of articles of special interest, as setting forth the intention of the company, the provision for the purchase of the plant and franchises of the Council Bluffs Gas and Electric Light and Power company, which was recently obtained by the Sperry Electric Light company, of Chicago, for lighting the city.

It will be seen that the company proposes to do business on a large scale, as its expressed purpose is to purchase the existing gas works and electric plant, and to control the light question in every particular.

Hon. George F. Wright, president of the gas company, was decided to be the party who would know more about the matter than anyone else, and was accordingly waited upon by the reporter.

He is now trying to get a monopoly in the illuminating business, and are you negotiating with them for the sale of your gas works?

"I don't know about the monopoly part, but I am trying to lease them my plant. But the result will be, 'I can't tell,'" was the reply.

"What is the situation at present as you understand it?"

"I understand that several propositions have been submitted, and are now under consideration. As you know, the Sperry company is the party who has the contract for lighting the city. Mr. Officer decided that he wanted to sell his plant. The Sperry folks looked into the matter, and concluded that they would like to lease it."

"But you don't want to lease it?"

"No, sir. I don't want to lease it. I want to build a plant myself. I don't want to lease it. I want to build a plant myself. I don't want to lease it. I want to build a plant myself."

"But you don't want to lease it?"

"No, sir. I don't want to lease it. I want to build a plant myself. I don't want to lease it. I want to build a plant myself. I don't want to lease it. I want to build a plant myself."

HOW TO CURE A GOLD.

Directions for Checking its Progress and Preventing Serious Illness.

Youth's Companion: When one becomes chilled, or takes cold, the mouths of myriads of little sweat glands are suddenly closed, and the impurities which are forced back at the interior of the body, vitiate the blood, and are then carried on the lungs and other internal organs.

Just beneath the surface of the skin, all over the body, there is a network of minute blood-vessels, finer than the finest lace. When one is chilled the blood is forced through these capillary vessels into one or more of the internal organs, producing inflammation or congestion, and thus often causing diseases dangerous to life.

Therefore, to treat a cold is at the earliest possible moment after you have taken it. And your prime object should be to restore the perspiration and capillary circulation.

As soon then, as you feel that you have a cold, you have a good fire in your room, says a writer in the Youth's Companion. Put your feet into water as hot as can be borne, and containing a tablespoonful of mustard.

Have it in a vessel so deep that the water will come up well toward the knees. Throw a blanket over the whole to prevent rapid evaporation and cooling. In from five to ten minutes take the feet out, wipe them dry, and get into a bed on which there are two extra blankets.

Just before or after getting into bed drink a large glass of lemonade as hot as possible, or a glass of hot water containing a teaspoonful of cream of tartar, with a little sugar, if desired.

Should the cold be in the chest, side or back, indicating pleurisy or pneumonia, dip a small towel in cold water, and wring it as dry as possible. Fold the towel so that it will cover a large surface of the chest, and place the pair. Cover this with a piece of flannel, and both with oiled silk, or better, with oiled linen; now wind a strip of flannel a foot wide several times around the chest.

The heat of the body will warm the body almost immediately; the oiled linen and flannel will retain the heat and moisture, and, steaming the part, will generally cause the pain to disappear.

Should there be pain or soreness in the throat you should treat it in a similar manner with wet compress and flannel bandage.

Eat sparingly of plain, simple food. Drink plenty of water, and use, if you can, bread and milk, milk toast, baked potatoes or raw oysters may be eaten.

By following the above directions intelligently and faithfully you will certainly check the progress of the cold and prevent serious, possibly fatal, illness.

HOUSES USED AS FUEL.

One Man's Recollection of a Fearful Iowa Winter.

The people of central and northern Iowa will long remember the horrible winter of 1872-3, when the weather was such that it was necessary to burn houses for fuel.
