posited along the line. Inside of two or three weeks, if the weather is favorable, the read will probably be finished.

General Manager Smith, of the Omaha street railway comonny, says that there is no eause for complaint about cold cars. He holds that if fires were kindled in them now. They would be more unconfortable to most persons or account of the heat and closeness than they are now, when slightly cool. He thinks that thre is so need of any fires in the cars until the mercury drops about the degrees above the freezing point. Then fires will be kept constantly burning.

Mr. Goodrich, the secretary of the company, says that there is probably no street railway company in the United States which has done so much for a city as this company has for Omeha, and yet received in return so much "roasting" by the press and people. "The people of South Omaha," he continued. "secons to have received the impression that, since the consolidation of the street car companies, the South Omaha extension has been abandoned, and the newspapers and people taxes been handing us over the coals. This is most emphatically a great mustake. In fact, the great argument for the consolidation was the fact that Dr. Mercer had the best route to South Omaha, and we wanted it. At present, the South Sixteenth attreet time is not paying, and will not until we get it running to South Omaha. We love forward to a suicential patromage of the line affect that time, and are as anxious as the people of South Omaha to see it comoleted. In two weeks, at the outside, the cars will be running."

THEIR SECOND MEETING.

THEIR SECOND MEETING.

Another Active Session of the Real Estate exchange was nearly if not quite as largely attended as was the opening meeting Monday. The room was comfertably filled at 11 o'clock by real estate and business men and half an hour was spent in discussion of business men and business prospects. One man intimated that no had a factory in his mind that could be secured for Omaha if the proper inducements were offered and he was immediately required to guarantee the presence of the man in question at the secure of the man in question at the presence of the man in question. PULL TOGETHER.

The Necessity of Harmonions Effort on the Part of Omahans.

Mr. W. V. Morse, a prominent wholesake merchant and capitalist, says that he heartily endoress the speeches made by Mr. Rosewater and other distinguished citizens at the initial meeting of the real estate exchange Monday. "Omahs is now at a point," he asserted, "where her citizens shall determine her future, whether she will always remain an ordinary, medium city, or become a vasimetropola. The concerted action of Omaha business men can easily bring about the latter result. The opportunity is waiting to be improved. A year will never open more auspriously than the year 1800 will open for Omaha. Over \$2,000, one to be spent in improvements. There is the new city hall, the new postoffice, the new bridge, the new visiduct and union derect, besides an amber of other cuterprises on a modest scale, which in the aggregate will distribute ever \$2,000, 100 among the mechanics and merchants of the city. If Omaha men with only appreciate the vame of concerted actions they continuous and assure a great future lor the city."

In this event, the association ment furm an entircip new circuit, which means the outsting of Kansas City, and the admission of two of the rollowing three cities, Indianapois, Toleid and Detroit. The Coyboys will thus be compelled to sue for mercy at the hands of the Western association or give up base ball entirely. It should be noted here that the only statement of a positive character made thus far a that Cincinnati will go into the National league within the next twenty four hours. The contingencies following are but suppositious.

Another piece of intelligence is that Artie Latham, the Brown's third-base buffoon.will put his six to a Cincinnati contract within the country, and a man who attends strictly to business all the Lime Latham and took an internal contract for the Coveland Contract on the Country man put off of the Cent far and close the deal for his transfer to Cincinnati

In speaking of the brotherhood scheme, Loftus asserted positively that it would be a go, but Loftus, like a good many other people, may be mustaken. From an unbiased standpoint, the whole scheme savors of the face and the bluff. It has ceased to be the huge bugaboo to the league and association megulas it was three weeks are. The players recent meeting in New York has had a decided tendency to weaken their cause, and it looks as if it was doomed to terminate in the most colossal fixele in the history of base ball, with possibly the exception of the old Union association crusade. Quite a number of blayers have already weakened and avowed their intention of adhering to the the league, probably foreseeing that in lieu of \$5.000 and \$6,000 selacies, special trains, first class hotels and valuable presents, they may find themselves adrift with highlier money or employment.
