

ANOTHER OMAHA SMELTER

It Will Be Established on the Bolt Line.

TONS OF ORE ARE IN SIGHT.

A. H. H. Clark Endeavoring to Induce Jay Gould to Extend the Missouri Pacific Road to Yankton.

Reducing Ore.

John Smiley has gone east to inquire into some new schemes for reducing ore which are now in operation in that part of the country. He says he intends with several other capitalists to erect smelting works in this city. The place selected is the tract of land immediately east of the present fair grounds...

ON TO YANKTON.

A. H. H. Clark Endeavoring to Extend the Missouri Pacific.

It is understood that A. H. H. Clark, general manager of the Missouri Pacific, left St. Louis last Saturday for New York, the object of his mission being to consult Gould about extending their line from Omaha to Yankton. Mr. Clark is quite anxious regarding this matter, and will use all his influence to push it through.

Vice President Holcomb said before leaving Omaha that no action would be taken at present toward the proposed extension of the line to the late Francis Cope, as general freight and passenger agent at Salt Lake City. Mr. Parker is in charge of the office and may possibly be retained permanently.

The cost in passenger rates has not reached Omaha as yet, but it is bound to come if insisted on by the Burlington & Northern from Chicago to St. Paul. There is no possible way of preventing such a result unless the association of railroad companies should have power and influence enough to force matters. Missouri river lines must either meet these reductions or lose business destined to Portland, Seattle, Puget Sound, Victoria and other northwestern Pacific coast ports.

Mr. Ward of the Mobile & Ohio road has been quoted as saying that he favors the removal of differential and placing south-bound Omaha rates on the same level as Kansas City. This seems to amuse freight agents here very much. They say that Mr. Ward has nothing whatever to do with this matter and express their regret that he should have expressed his intention to do so.

A. Well Established Fact. The fact has been abundantly proven that Chamberlain's Cough Remedy is a successful medicine yet discovered for acute throat and lung diseases, such as croup, colds and croup.

At high noon yesterday Miss J. L. Wheeler, daughter of Mr. and Mrs. S. E. Wheeler, 1814 Webster, was united in matrimony with Mr. E. A. Marjony, a commercial traveler well known in Omaha. The wedding occurred at the bride's home.

At this time the happy couple took the train for their future home in Salt Lake City.

WEBSTER'S WORK.

He Tells How He Has Served the City.

CITY ATTORNEY'S OFFICE, OMAHA, Neb., Jan. 1, 1890.

To the Honorable the Mayor and the City Council of the City of Omaha: Gentlemen: I have the honor to submit herewith my report as city attorney for the year ending January 1, 1890.

At the expiration of my predecessor's term of office in May, 1887, it was reported by Mr. Council that there were pending in the several courts, 157 suits against the city, involving claims to the amount of \$293,043.27. After a term of two and one-half years' service, I am able to report that, notwithstanding the fact that a large number of cases were commenced, grown out of the extensive improvements throughout the city, and added to by reason of the growth of the city, so large a number of cases have been disposed of by me that I shall leave to my successor only about two-thirds as many cases as were turned over to me...

When I took office there was in the judgment fund \$12,734.73. That fund has accumulated until today there is in the judgment fund \$71,259.43, notwithstanding the fact that for the year 1889 no tax was levied for that fund.

The duties of the office of city attorney are very burdensome, and there are yet pressing many other great public questions touching the taxing power of the city for local improvements. There are some cases pending in the supreme court of the state, involving the constitutionality of the charter authorizing the taxation of benefits, where land has been taken for the extension of the city.

Some strange natural phenomena are described in a report from the United States consul at Maracabo, in Venezuela. That part of the department of Colon situated between the rivers Santa Ana and Zulla and the Sierra of the Colombian frontier is very rich in asphalt and petroleum.

Official notice of the approval by congress of Mr. Peters' appointment as collector of internal revenue in the Omaha office was received at the revenue headquarters yesterday.
