How the South Is Waking Un.
Evan P. Howell of the Atlanta Constitution tells a story to show how the south is waking up industrially. A farmer friend of his was in the Constitution office, he says, and Howell asked him how his bee-spins were getting along. "Pretty well," the friend answered. "The bees work pretty hard all day, and lay up a heap of honey. But I think they might do a little better. My mind is ronning on crossing them with lightning bugs, so that they can work a little at night."

NOW RY-MINISTER LANGEFON LEARNED PRENCH.

The Hom. Fred Douglass, according to some authorities, seems to be having a hard time in Hayti and be would make a much hetter minister if he had a therough knowledge of the French lauguage. The Haytians speak french and this is the diplomatic tougue of the court. Ex-Minister Langeton told me the other day of his difficulties in this regard at the beginning of his mission and how he finally surmounted them. Said he:

Linds a young white man as my secretary, who was a countete master of both Spanish and French, and I supposed that I would be able to get along through him. At the first meeting of the diplomats a case very important to the United States was presented. It was given in the Spanish language, and the discussion upon it had to be conducted in French. I could not utter a word in enter language, and I remembered with regret an opportunity which tharles Sunner had offered me but which I had refused. He had told me that I ought to known French. If you care to bry I will teach you, he said.

A very simple apparatus for obtaining an electrical spark is made by a Gorman physicast. Round the center of a common lamp chimney is pasted a strip of tinfoil, and another strip is pasted from one end of the chimney to the within a quarter of an inch of this ring. Then a piece of silk is wrapped around a brush and the interior of the chimney rubbed briskly. In the dark a bright electric spark may be seen to pass from one piece of tinfoil to the other each time the brush is with drawn from the shinny. Many other experiments can be tried with the apparatus.

Even ratan teass it.
