## Cattle.

Cattin. Saturday, Jan. 25. The market on cattle was rabor 'irrogular and very uneven as lo prices, satesmen dif-foring it beir views concerning the trade the entire day. The quality of the offerings was only fair, only a few desirable beaves on sala. The movement after the market once opened was brisk and by midday about every-thing offered was out of first hause. Prices on best bed and burkers' cattle showed no charge, while common grades ruled any where from a shade to 56200 off, according to the quality of the stock offered.

hours. The week closed with a vory liberal run of hogs as compared with the moderate re-capito of the past few days. Nine include were carried over from Friday's market and eighty fresh loads arrived this morning. The market opened about 5c lower than it closed Friday, or lok lower than opening Friday morning. A firmor feeling was noted to-ward the does of the market.

CHICAGO PRODUCE MARKETS.

CHICAGO, Jan 25.- Hoseial Telegram to THE BER !- Wheat was heavy, only fairly active and lawer today. Theoretically, the market should have been strong on the crop and foreign estantion. Actually, it was weak. A local built writer describes the weak. A local buil writer describes the market as lim, but anively adds that "the fact may not at once be detected." It could not have been diducted today with a micro-scope. Prime had a "wears" crop lotter in the Tribune this morning, but it feil fat. Bradstreet reported that during the weak both coasts had exported 1,500,000 bashels of wheat and durin account 1, 711 on hardbol has both coasts had exported 1,530,000 bushels is of wheat and 1,201,000 bushels the correspond-ing period last year. Milwaukee estimated a decremes in the visible this week of 500,000 bushels. King of Toledo and Lindman of this city made it 100,000 bushels. Foreign markets came in easier. The local speculative temper is still bearish and a powerful party is working for a further re-duction in values. The opinion was well grounded that the heavy buying yesterday around the bottom was to cover shorts, and the argument was advanced that with this support withdrawn the market would natu-ally sag. Events proved the correctness of this surmise. The opinion was well grounded that the heavy buying yesterday around the bottom was to cover shorts, and the argument was advanced that with this support withdrawn the market would natu-ally sag. WARD M'ALLISTER AT HOMI. There is no Affectation 'About the Leader of Society. There is probably no man in this city so well known to the general public as is Ward McAllister, about whose personality there is such a popular mis-understanding, says the New York Times. That this misundorstanding should exist is not strange, for the very nature of the work that has given him his reputation—organizing and leading the movements of uppor tendom—is cal-culated to convey the idea of a "neavy-swell." This seems to be the prevail-ing idea of Mr. McAllister. A man with the airs of a nabob, the genee of a dancing master, and the e egance of a dancing.

naturn matter, and the e egaines of a diandy. If ever there lived a man that this description did not fit that man is Mr. McAilister. It needs but a call on and an interview with the functs acailed to have a second sec
